

Appendix F

**Statistical Comparison of Measured  
Values and Modeled Values for  
Flow and Water Quality**

**Used in the Chollas Creek Metals Total Maximum Daily Load**

California Regional Water Quality Control Board, San Diego Region

## **Introduction**

This appendix compares measured flow and water quality values against those generated from model runs. Data are presented side-by-side for direct comparison. Simple statistical comparisons are also offered.

## **Flow**

Table F-1 lists all modeled and measured values from November 1, 2001 to December 30, 2003 for the Chollas Creek Watershed. Table F-2 shows all observed values above 2.28 cubic feet per second (cfs), which is the definition of wet weather conditions, and the corresponding modeled average flows. Also in Table F-2 are the percent and actual differences. Table F-3 gives the total volume per day in cubic feet (cf) for corresponding dates in Table F-2. Figure F-1 plots volume per day from the model versus volume per day from the observed values. The  $R^2$  value is 0.7035 for 26 data pairs. Table F-4 gives the total volume for the 28 days in liters for modeled and observed values and the percent differences and actual differences between the two. Table F-5 gives summary statistics of the 26 values in both the modeled and observed value data sets and from the percent differences and actual differences.

## **Water Quality**

Tables F-6 and F-7 show the measured water quality data and the corresponding model results. Tables F-8 and F-9 show the percent and actual differences of the water quality data that corresponds with flows over 2.28 cfs. Tables F-10 and F-11 show the five dates that both measured flow and water quality data were available. The loads per day were calculated and compared, by percent and actual difference, with the model values for the same days.

Appendix F  
 Statistical Comparison

May 30, 2007

Table F-1. All modeled and measured values. Observed values have approximately the same significant figures as the original values in copermittees reports.
