Brian, I appreciate your comments, however the timely adoption of revised NPDES Permits is essential. This permit is ready and I do not at this time have a compelling reason to further delay adoption. JHR

Hi John, I noticed the Continental Maritime(CM) NPDES permit is still on the schedule for the 25 July hearing. Since many of the conditions in that permit are the same or similar to conditions in the Navy and other shipyard permits it makes a lot of sense to postpone the CM permit. My concern is the CM permit will set precedent for the other permits. I don't understand why the a single shipyard permit would be separated from the others. I request the Regional Board consider postponing the CM permit to align with the other NPDES permits.

vr,
Brian Gordon
