San Diego, CA 92123

RE: Carlsbad Desalination Project, Resolution No. R9-2008-0039

Dear Chairman Wright and Members of the Board:

I am writing on behalf of the San Diego County Taxpayers Association, a non-profit, non-partisan organization, dedicated to promoting accountable, cost-effective and efficient government and opposing unnecessary new taxes and fees. For the past six decades, our organization has saved the region’s taxpayers millions of dollars, as well as generated information to help educate the community-at-large.

Given the significant utility rate increases that have impacted San Diego's ratepayers in the past few years, we support the efforts made by the City of Carlsbad and Poseidon Resources to develop new potable water supplies – at no risk to taxpayers.

In evaluating the benefits this project provides to ratepayers, it’s important to recognize that the estimated cost of public and private infrastructure projects across Southern California has risen astronomically due to increases in construction costs. It is clear that without the upfront financial investment by Poseidon Resources, Carlsbad’s private sector partner, this project would have failed to reach this pivotal point in the approval process.

Furthermore, the long-term water purchase agreements Poseidon has secured with several public water agencies across the County ensures the cost of water to be equal to or less than the cost of imported water.

Not to be overlooked is Poseidon’s commitment to create an energy efficient, environmentally-benign project. As part of their Marine Life Mitigation Plan, they have pledged to restore up to 55.4 acres of wetlands and to provide long-term maintenance of the Agua Hedionda Lagoon. This commitment alone represents significant financial value to the taxpayers in the form of avoided costs to local government for the lagoon’s upkeep.

Finally, this project will generate jobs and critical revenues for local governments including $2.4 million in property tax per year for the next 30 years, as well as $10.4 million in sales tax during construction, and $2.9 million per year thereafter.
At a time when ratepayers are facing mandatory conservation and higher water rates, the SDCTA requests your immediate approval of the project's Marine Life Mitigation Plan.

Sincerely,

Lani Lutar  
President & CEO
