**Subject:** Support 241 Toll Road's Waste Discharge Requirement Permit

I support the Waste Discharge Requirement (WDR) permit submitted by the Foothill/Eastern Transportation Corridor Agency (TCA) for the Tesoro Extension project in Orange County.

Well-planned transportation and infrastructure projects like the Tesoro Extension build prosperous communities. With the large-scale residential/commercial construction underway at Rancho Mission Viejo, it's vital that I-5 have an alternative route - that route needs to be the 241 Toll Road's Tesoro Extension.

TCA will create, restore and/or enhance 34.82 acres of habitat for .4 acre of impact the extension will have. TCA will utilize best management practices to maintain existing drainage flow patterns and treat all road runoff to the maximum extent before discharging to receiving waters to maintain existing beneficial uses and meet water quality objectives established by the Regional Board and the Water Quality Control Plan for the San Diego Basin.

Join me and support TCA's WDR application.

Sincerely,

Gary

Chair and Members of Regional Water Board

Dear Regional Water Board,

As a concerned citizen, I ask you to adopt the staff-recommended findings for denial of the Tesoro Extension. These findings properly reflect the law and the necessity to understand the totality of the Foothill tollroad's impacts to water quality prior to allowing construction to begin.

Please vote to extend the toll road. It will relieve the traffic thru San Clemente. It can be built with impacting the beaches. Don't listen the Northern Californian voices of the California State Parks Foundation.

Walt Jester

I respectfully ask the Regional Board to finalize this decision at your hearing on March 16, 2015. Thank you for considering my views.

Sincerely,

Mr. Walter Jester
