Response to comment

March 5, 2020

Mr. Alfred Javier, Director of Environmental and Regulatory Compliance, Eastern Municipal Water District  
February 14, 2020

	Comment	San Diego Water Board Response	Action Taken
General Comment No. 1	“Therefore, EMWD would like to ensure that the determination finding for the recycled water use for the Auld Hydrologic Area would still apply when the Order is rescinded.”	The California Regional Water Quality Control Board, San Diego Region (San Diego Water Board) will incorporate the determination made in the Fact Sheet for Order No. 2000-165, Waste Discharge Requirements for Eastern Municipal Water District, Temecula Valley Regional Water Reclamation Facility, Riverside County into the Notice of Applicability that will be issued to enroll Eastern Municipal Water District in Order WQ 2016-0068-DDW, Water Reclamation Requirements for Recycled Water Use, for the distribution and use of recycled water within the San Diego Region.	No action required.
