California Regional Water Quality Control Board, San Diego Region

August 16, 2012

In reply refer to / attn.: Place ID 631926-cmeans

Mr. Shawn Atherton Wastewater Superintendant City of Encinitas 2695 Manchester Avenue Cardiff by the Sea, CA 92007

Subject: February 24, 2012 Sanitary Sewer Collection System Inspection Final Report

Dear Mr. Atherton,

On February 24, 2012, United States Environmental Protection Agency (USEPA) contractors, State Water Resources Control Board (State Board) and California Regional Water Quality Board, San Diego Region (San Diego Water Board) staff conducted a compliance inspection of the City of Encinitas Sanitary Sewer Collection System, for compliance with State Board Order No. 2006-0003-DWQ, Statewide Waste Discharge Requirements for Sanitary Sewer Systems and San Diego Water Board Order No. R9-2007-0005, Waste Discharge Requirements for Sewage Collection Agencies in the San Diego Region.

Please find attached the Final Report for the City of Encinitas Sanitary Sewer Collection System inspection. The Major Findings section of this report includes deficiencies in the City's program that are alleged violations of the State Board and San Diego Water Board Orders. As documented in the report these alleged violations fall under the category of Sanitary Sewer Overflow Reporting and Documentation.

Each alleged violation noted in the report should be addressed to bring your program into compliance with the Waste Discharge Requirements regulating your system. Please provide a written response to this by September 17, 2012 describing the actions the City has taken, or will take, to address these alleged violations within your program.

9174 Sky Park Court, Suite 100, San Diego, CA 92123 | (858) 467-2952 | www.waterboards.ca.gov/sandiego

In the subject line of any response, please include the information located in the heading of this letter: "in reply refer to." For questions or comments, please contact Christopher Means of my Staff by phone at 858-637-5581, or by email <u>cmeans@waterboards.ca.gov</u>.

Respectfully,

Chiara Clemente Senior Environmental Scientist Compliance and Assurance Unit Regional Water Quality Control Board

<u>Narrative</u>

On February 24, 2012 a USEPA contractor inspected the City of Encinitas Collection System in Encinitas, CA. Discharges from the Facility are regulated by the Sanitary Sewer System Waste Discharge Requirements 2006-0003-DWQ, and its accompanying Amended Monitoring Plan Order No. 2008-0002-EXEC (hereafter Amended MRP). In addition, discharges from the City's collection system are regulated by San Diego Water Board Order No. R9-2007-0005. The primary purpose of the inspection was to determine the accuracy and reliability of the Discharger's self-monitoring and reporting program. The primary on-site representatives were Shawn Atherton (Superintendent) and Ben Taylor (Field Supervisor).

The primary goals of this inspection were to gather necessary information for compliance and enforcement purposes as stated in the Compliance and Enforcement Plan for the Sanitary Sewer Overflow Reduction Program posted on the Sanitary Sewer Overflow Reduction Program website and to evaluate the effectiveness of controls used by the City to prevent discharges as prohibited by the Clean Water Act (CWA). The inspection encompassed on-site inspections and subsequent review of pertinent sewer system information, including review of Sewer System Management Plans (SSMPs); maintenance, operations, and management activities; Sewer Use Ordinance; financial information; and other areas needed to verify the discharger's compliance with all requirements of the SSSWDR, including efforts to eliminate, reduce, and/or mitigate sanitary sewer overflows (SSOs).

The State Water Resources Control Board (State Water Board), Office of Enforcement and the participating Regional Water Quality Control Board (San Diego Water Board) are conducting Compliance Inspections of sewer collection systems. The inspections are being conducted as part of the combined Water Boards' enforcement response to verify compliance with "Waste Discharge Requirements for Sanitary Sewer Systems," Water Quality Order No. 2006-0003-DWQ (hereafter referred to as SSSWDR (the acronym for the term Sanitary Sewer Systems Waste Discharge Requirements in Water Board vernacular)), and its incorporated Amended MRP.

The collection system is regulated under the SSSWDR (2006-0003-DWQ) and associated Amended MRP (2008-0002-EXEC), which requires all public agencies that own or operate a sanitary sewer system comprised of more than one mile of pipes that convey wastewater to a publicly owned treatment facility to apply to the State Water Board for coverage under the SSSWDR. Applicable public agencies were required to file a Notice of Intent (NOI) for each individual sanitary sewer collection system owned or operated by the public agency by November 2, 2006. State Water Board records show that the City of Encinitas filed an NOI with the State Water Board to enroll the City of Encinitas Collection System which was assigned WDID #9SSO10650 by the State Water Board, effective on August 24, 2006.

No prior inspection of the collection system had been conducted by either the State Water Board, or the San Diego Water Board.

System Overview

The City of Encinitas owns and operates the City of Encinitas Collection System, a small-sized sanitary sewer collection system that serves the entire area of the City of Encinitas, San Diego County, California. Sewage conveyed by the collection system is ultimately treated at the Encina Water Pollution Control Facility (WDID No. 9-000000125) and the San Elijo Water Reclamation Facility (WDID No. 9-00000030).

According to the City of Encinitas "Collection System Questionnaire" (Questionnaire) required by the SSSWDR, last updated by the City on February 14, 2012, and confirmed during the inspection, the collection system serves an estimated population of approximately 36,100, and contains 123.1 miles of gravity sewers, 4.13 miles of force mains (pressurized sewers), and 10,183 sewer service connections. The City has not provided an estimate of the total length of sewer service laterals (in miles), as required by the Questionnaire. The City had indicated in the Questionnaire that the agency does not have responsibility for any portion of sewer service laterals. The City reported a total of three Category 1 SSOs, two Category 2 SSOs, and three Private Lateral Sewer Discharges (PLSDs) since obtaining coverage under the SSSWDR. Due to the small number of reported spills, the inspectors conducted a data review for the period of May 2, 2006 (effective date of the Order) through February 23, 2012.

The inspectors split into two teams at approximately 8:45 AM. Team 1 focused on field activities and Team 2 focused on a review of documentation and SSO tracking and reporting processes.

Time	Inspection Activity/Task
7:15 AM	Entry and Opening Meeting
7:45 AM	Management Staff Interviews
8:45 AM	Team 1 Left Office for Field Activities/Team 2 Conducted Document Review
8:55 AM	First Site Visit – Team 1 (Moonlight Beach Pump Station)
9:45 AM	Second Site Visit – Team 1 (Coast Boulevard Pump Station)
10:50 AM	Third Site Visit – Team 1 (Olivenhain Pump Station)
11:30 AM	Fourth Site Visit – Teams 1 and 2 (Field Crew Visit 1)
11:45 AM	Fifth Site Visit – Teams 1 and 2 (Field Crew Visit 2)
12:10 PM	Returned to Public Works for Follow-Up and Closing Meeting
12:30 PM	Exited the Inspection

Inspection Timeline

ļ

Major Findings

SSO History

 State Water Board Order 2006-0003-DWQ, Part C.2 prohibits the discharge of untreated or partially treated wastewater that creates a nuisance as defined in California Water Code Section 13050(m). Based on a review of the SSO Public Report generated from the California Integrated Water Quality System (CIWQS) online reporting system, the City has reported three Category 1 SSOs and two Category 2 SSOs since obtaining permit coverage in 2006 resulting in untreated wastewater being discharged by the City from the collection system creating a nuisance such as potential injury to health and offense to the senses. Refer to Attachment 1 for the SSO Public Report Detail Page which provides summaries of the reported Category 1 and Category 2 SSO discharges, Attachment 2 for General Information Reports for the five reported Category 1 and 2 SSOs and Attachment 3 for the SSO Public Report Detail Page for PLSDs.

SSO Reporting & Documentation

- 1. State Water Board Order 2006-0003-DWQ, Amended MRP, Section A specifies SSO reporting timeframes for Category 1 and Category 2 SSOs. In addition, San Diego Water Board Order No. R9-2007-0005, Provision C.3 requires that the City provide notification of PLSDs. The City provided a log of "Sewer Related Customer Calls" (refer to Attachment 4) that documents 15 sewer related calls received by the City for a time period of October 11, 2010 through the date of this inspection. In addition, the inspectors requested that the City run several queries on the City's Cityworks database related to sewer spills and response. One of the queries indicated that a potential PLSD may have been responded to on January 30, 2011 that was not reported in CIWQS. It appears, based upon a review of the Sewer Related Customer Calls log (refer to Attachment 4) and a review of data in the Cityworks database (refer to Attachment 5) that the City had failed to report at least one PLSD and may not have reported several more potential SSOs, PLSDs, and system backups in CIWQS that have been reported to and responded to by the City. It should be noted that the documentation in the referenced documents does not typically provide details regarding the volume or destination of the SSO reported to or discovered by the City. Therefore, it is difficult to determine the accuracy of the City's reporting.
- 2. State Water Board Order 2006-0003-DWQ Amended MRP, Attachment A, Section A.4 requires that all SSOs that meet the criteria for Category 1 SSOs must report minimal information to the Online SSO Database as soon as possible but no later than three business days after the enrollee is made aware of the SSO. In addition, a final certified report must be completed through the online SSO System within 15 calendar days of the conclusion of SSO response and remediation.

First, the City incorrectly reported a Category 1 SSO as a Category 2 SSO. Specifically, the City reported a Category 2 SSO on December 10, 2007 at 989 Sidonia Street (refer to Attachments 1 and 2); however, the City reported that the spill was 345 gallons, some of the flow entered a storm drain, and only 100 gallons were able to be recovered. Therefore, it appears that the City incorrectly reported this as a Category 2 spill instead of a Category 1.

Second, the City failed to certify two reported SSOs within 15 days of the conclusion of SSO response and remediation. The SSOs occurred on July 2, 2007 and December 10, 2007 (SSO previously mentioned earlier in this finding).

- The July 2, 2007 SSO was reported to have occurred at 3049 Camino Del Rancho with a spill response completion date and time of July 2, 2007 at 2:30 PM. The City did not certify the report until December 2, 2010, a timeframe of over 1,200 days.
- The December 10, 2007 SSO was reported as a Category 2 SSO and to have occurred at 989 Sidonia Street. The Online SSO System did include a spill response completion date and time; however, the City reported an estimated spill end date/time of December 10, 2007 at 8:17 AM. The City did not certify the report in CIWQS until May 19, 2008 (161 days after the event). It should be noted that the City did not meet the certification requirements of a Category 2 SSO either (i.e., within 30 days after the end of the calendar month in which the SSO occurs).
- 3. State Water Board Order 2006-0003-DWQ, Amended MRP, Section B.1 (Record Keeping) states that "Individual SSO records shall be maintained by the Enrollee for a minimum of five years from the date of the SSO." Since obtaining permit coverage, the City has reported a total of five Category 1 and Category 2 SSOs and three PLSDs. The City was not able to provide supporting documentation for two reported SSOs and one reported PLSD. Further, the City provided three inconsistent types of documentation for the other reported SSOs and PLSDs. Specifically, the City provided one or a combination of the following types of documentation: Cityworks Work Orders, Line Maintenance Reports (used to document field activities) (refer to Attachment 6), Sanitary Sewer Overflow Report Form, and hand written notes. Examples of the types of documentation can be found respectively in Attachments 5, 6, 7 and 8. A summary of the documentation available for each SSO and PLSD is provided in the following table.

Event ID	SSO Start Date	Documentation Provided to EPA Inspection Team	Spill Type	SSO Vol	Vol of SSO Recovered	Vol of SSO Reached Surface
653552	7/2/2007	No Documentation	Category 1 SSO	330	100	230
708917	12/10/2007	No Documentation	Category 2 SSO	345	100	0
746771	11/13/2009	Line Maintenance Report	Category 1 SSO	650	200	450
748988	1/30/2010	Work Order/Line Maintenance Report	Category 2 SSO	42	15	0
775088	12/28/2011	Work Order/Hand Written Notes	Category 1 SSO	183,600	183,600	183,600
724490	8/10/2008	Line Maintenance Report/Sanitary Sewer Overflow Report Form	Category 1 PLSD	450	50	400
734561	3/3/2009	No Documentation	Category 1 PLSD	25	0	25
740206	6/29/2009	Work Order	Category 1 PLSD	375	0	375

4. State Water Board Order 2006-0003-DWQ, Amended MRP, Attachment A (Notification) requires that for any discharges of wastewater that results in a discharge to a drainage channel or a surface water, the Discharger shall, as soon as possible but not later than two (2) hours after becoming aware of the discharge, notify the State Office of Emergency Services (OES). Based upon documentation provided in CIWQS, it appears that on at least three occasions during the

- period of review, the City failed to notify OES of a Category 1 SSO within the two hour requirement.
- The City reported that a Category 2 SSO (as previously noted, it should have been reported as a Category 1 SSO) occurred on December 10, 2007 at 989 Sidonia Street which resulted in the discharge of 345 gallons. According to the information contained within CIWQS, the estimated spill end time was December 10, 2007 at 8:17 AM. According to the documentation in CIWQS, OES was not notified of the occurrence of the SSO (refer to Attachment 2).
- The City reported that a Category 1 SSO occurred on November 13, 2009 at 840 Val Sereno Street which resulted in the discharge of 650 gallons. According to the information contained within CIWQS, the estimated spill end time was November 13, 2009 at 8:20 AM. According to the documentation in CIWQS, OES was not notified of the occurrence of the SSO (refer to Attachment 2).
- The City reported that a Category 1 SSO occurred on December 28, 2010 at the 3000 block of Manchester Avenue which resulted in the discharge of 183,600 gallons. The City reported an inconsistent timeframe for the SSO indicating that the SSO would have started after the City was notified or discovered the SSO, as well as after the time City staff arrived at the SSO site. Specifically, the City reported the start time of the SSO as 11:45 AM, the time the City was notified or discovered the spill as 11:05 AM, and the time the City arrived at the SSO site as 11:15 AM. It should be noted that the OES notification timeframe requirement was exceeded based on the reported SSO start time of 11:45 AM. The City reported the start time).

It should also be noted that the inspectors did not request phone documentation of the call to verify the information contained within CIWQS. It should also be noted that there are several potential SSOs and PLSDs that were not reported in CIWQS that were not reviewed for OES reporting time compliance.

5. State Water Board Order 2006-0003-DWQ, Provision J.1.(i) states that "All reports required by this Order and other information required by the State or Regional Water Board shall be signed and certified by a person designated, for a municipality, state, federal or other public agency, as either a principal executive officer or ranking elected official, or by a duly authorized representative of that person, as described in paragraph (ii) of this provision. (For purposes of electronic reporting, an electronic signature and accompanying certification, which is in compliance with the Online SSO database procedures, meet this certification requirement.)"

Further, according to the CIWQS SSO Discharger Work Book "there are two levels of access available to staff entering the information: legally responsible officials (LROs) and data submitters. LROs have full access to enter information and certify spill reports. Data submitters, on the other hand, only have authority to enter information - they can't certify SSO reports, including a "No Spill Certification". An enrollee can have multiple LROs and data submitters to enter the necessary information into the SSO database for their sanitary sewer system."

City staff stated during the inspection that the City's Field Supervisor (Ben Taylor) had been gaining access to the CIWQS system with the Superintendent's (Mr. Atherton) credentials to enter and submit data into CIWQS as well as certify the reports as the Superintendent. IT is the

inspector's opinion that the Field Supervisor should not be using the Superintendent's credentials to enter and submit information or certify reports.

Areas of Concern

SSO Reporting & Documentation

- 1. The City does not require field crews to take photographs to capture field observations during SSO events, or sanitary spills or backups.
- 2. City representatives do not have a quality assurance program in place to ensure that the information entered into work orders in the Cityworks database system is complete and accurate. It appears, based upon a review of the Cityworks system, that there may be work orders that contain information regarding SSOs and/or PLSDs that have not been reported to regulatory agencies.

Overflow Emergency Response Plan

 The SSMP provided to the inspection team did not contain several sections/attachments referenced in the plan and therefore several components of the SSMP and Overflow Emergency Response Plan were not able to be evaluated. It is the inspector's opinion that the City review their SSMP and Overflow Emergency Response Plan to ensure that they conform to the requirements in the Order.

- 3. PLSD Public Report Detail Page (May 2, 2006 through February 23, 2012)
- 4. "Sewer Related Customer Calls" Log
- 5. Cityworks Report for January 30, 2010 Sewer Response Work Order
- 6. Line Maintenance Report for SSO on November 13, 2009
- 7. California Regional Water Quality Control Board San Diego Region Sanitary Sewer Overflow Report Form for the PLSD that occurred on August 10, 2008
- 8. Handwritten Notes for December 28, 2011 Reported SSO

COLLECTION SYSTEM INFORMATION:

INSPECTED ITEM	RESPONSE
1. Sanitary Sewer System Category	Municipal
2. Population served by agency's sanitary sewer system The population estimate was provided in a Pre-inspection Questionaire and was based on an estimation by the City.	36,100
3. Approximate size of the service area served by the sewer collection system	15 square miles
 4. Miles of sanitary sewer in the collection system a. Gravity b. Force main 	123.1 4.13
5. Number of pump stations in the collection system	4
6. Average monthly household user fee for sewage collection only	\$53.64
 7. Budget for operation and maintenance sanitary sewer system facilities a. Last fiscal year b. Current fiscal year c. Following fiscal year The budget information is based on data provided in a Pre-inspection Questionaire. Due to time limitations, information regarding budgets was not discussed during the inspection.	\$3,819,462 \$4,419,039 N/A
8. Number of staff (FTEs) that conduct sewer operation and maintenance tasks	8
 9. Collection system maintenance equipment owned by the agency a. Combination vactor truck(s) (hydro flush/vacuum) b. Mechanical rodder(s) c. Closed-circuit television (CCTV) inspection trucks d. Standalone CCTV camera units 9a. City staff stated that one of the vactor trucks is designated for the separate storm sewer system and one is designated for the sanitary sewer system. 	2 1 1 N/A
10. Method for assigning and tracking work orders for sewer system maintenance The City uses the Cityworks computerized maintenance management system (CMMS) work order system for assigning and tracking work orders. The City implemented the use of the Cityworks system in January 2009.	Cityworks
 Budget for capital expenditures for sanitary sewer system facilities Last fiscal year Current fiscal year Following fiscal year The budget information is based on data provided in a Pre-inspection Questionaire. Due to time limitations, information regarding CIP budgets was not discussed during the inspection. 	\$507,178 \$3,602,075 N/A

.

COLLECTION SYSTEM INFORMATION:

	RESPONSE
12. Portion of sewer service laterals that agency is responsible for	Connection at Main
13. Number of sewer service lateral connections	10,183
14. Number of wastewater treatment plants (WWTPs) that ultimately receive wastewater from this collection system:	2
WWTP Name(s): <u>Encina Water Pollution Control Facility and</u>	
San Elijo Water Reclamation Facility	
Sewage conveyed by the collection system is ultimately treated at the Encina Water Pollution Control Facility (WDID No. 9-000000125) and San Elijo Water Reclamation Facility (WDID No. 9-000000030).	
15. Does this collection system discharge into any other collection systems?	No
Collection System Name: N/A	
WDID No: MA	
16. Do any upstream collection systems greater than 25,000 gallons/day (gpd) discharge into this collection system?	Yes
Collection System Name: <u>Rancho Santa Fe Community Services District</u> WDID No: <u>9SSO10696</u>	
17. Percentage of flow in the collection system from the following sources: a. Residential	
b. Commercial	90
c. Industrial	10
d. Institutional	N/A
The City indicated the percentages in their Pre-inspection Questionaire.	N/A
18. Has the agency developed standard and emergency operating procedures for each asset (e.g., pump stations, WWTP process units, and collection system force mains) in the event of a power and/or pumping failure?	Yes
19. Are pump stations in the collection system connected to a supervisory control and data acquisition (SCADA) system or an auto dialer system to detect pump failures or high/low wet well levels? If yes, how many?	Yes
20. Other: Pump Station Schematics	N/A
The field component of this inspection incorporated site reviews of the Moonlight Beach, Coast Boulevard, Cardiff, and Olivenhain Pump Stations. The inspection Beam was provided station schematics and standard operating procedures for each Facility prior to the site visits. A minor schematic modification to the Cardiff Pump Station was required due to the existence of an emergency pump truck 'by-pass' connector on the east side of the station. The schematic was updated and forwarded to the inspection team on March 6, 2012.	

WDID No. 9SSO10650 WDR Order Nos. 2006-0003-DWQ & 2008-0002-EXEC

OVERALL	RATING:	U
		_

	EVALUATION
 Number of SSOs that occurred during the past twelve months that: a. Discharged to waters of the United States: <u>0</u> 	
b. Entered a storm sewer system and discharged to waters of the United States: 0	
c. Entered a storm sewer system but were contained prior to discharge to waters of the United States: <u>3</u>	
d. Discharged to private residences/buildings: 0	
1b. According to the CIWQS Violation Report, the City has reported three Category 1 SSOs and two Category 2 SSOs since obtaining coverage under the permit in 2006. At the time of the inspection, the City had also reported three Category 1 PLSDs since obtaining permit coverage in 2006.	
Refer to the 'Major Findings - SSO History' section of this report for details.	
2. Does the agency hold post-SSO briefings with collections staff, management and others involved, to evaluate root cause of SSOs and document service changes necessary to prevent the reoccurrence of the SSO and be prepared in responding to SSOs in the future?	N
The frequency of post-SSO briefings was not discussed during the inspection with the exception of the spill at the Olivenhain Pump Station. City representatives stated that a post-SSO briefing was conducted in response to the major SSO reported at this pump station in December 2011.	
 Provide a description of steps taken by the agency to mitigate largest (by volume) SSO event which occurred during previous 12 months : 	S
On December 28, 2011, the City experienced a forcemain failure at their Olivenhain Pump Station. The City reported that approximately 183,600 gallons of sewage were spilled, captured, and returned to the sanitary system. The City enlisted pumping trucks from Atlas and neighboring organizations to collect the spill and return spilled sewage to sanitary system. Refer to Attachments 1, 2, and 8 for details of the overflow.

This section was rated "unsatisfactory" due to checklist item 1.	

SSO HISTORY:

SSO REPORTING & DOCUMENTATION:

=

OVERALL RATING: U

INSPECTED ITEM	EVAL
 Has the Enrollee obtained an SSO Database account by registering through the Californ Integrated Water Quality System (CIWQS) [Part G.3]? 	nia Yes
 Has the Enrollee updated the "Collection System Questionnaire" in the SSO Database a least every 12 months [Part G.3]? a. When was the questionnaire last updated? <u>February 14, 2012</u> 	at S
3. Have all Category 1 SSOs been reported in the Online SSO Database within 3 days of t Enrollee becoming aware of the SSO [Part A.4]?	he N
4. Have all Category 2 SSOs been reported in the Online SSO Database within 30 days of the Enrollee becoming aware of the SSO [Part A.5]?	S
 What is the Enrollee's policy on reporting private lateral sewage discharges in the Online SSO Database [Part A.6]? The City has reported a total of three PLSDs since obtaining coverage under the order Attachments 4, 5, and 6 provide details regarding several potential unreported lateral discharges; however, the documentation does not provide many details regarding the 	er.
volume or destination of the overflows. Therefore, it is difficult to determine the accuracy of the City's reporting. Refer to the 'Major Finding - SSO Reporting & Documentation' section of this report for details.	
6. Do field forms/processes used by the Enrollee to document the occurrence of SSOs ensure that all information identified in Part A.9, A.10, and A.11 is recorded and able to reported in the Online SSO Database?	be
During a review of the City's public reporting documentation process contained in hand written form, the inspectors noted several calls reporting sewer overflows (main and laterals) and backups to homes and businesses. It appeared based upon a review of that information that the City may not have reported numerous SSOs and PLSDs a required. Refer to the 'Major Findings - SSO Reporting and Documentation' section o this report for details.	w Is
7. Has the Enrollee maintained individual SSO records for a period of at least five years fro the date of the SSO occurrences [Part B.1]?	om U
The City was not able to provide adequate documentation to support the information entered into CIWQS. Refer to the 'Major Findings - SSO Reporting and Documentation section of this report for details.	
8. Does the agency require crews to take photographs of SSOs?	M
It is not standard practice for field crews to take photographs of SSOs. However, photographs have been taken in certain instances. For example, a significant numbe of photos were taken during the SSO at the Olivenhain Pump Station in December 2011.	r
9. Does the SSMP identify the chain of communication for reporting SSOs, from receipt of complaint or other information, including the person responsible for reporting SSOs to the State and Regional Water Board and other agencies if applicable [Part D.13(ii)(c)]?	
The copy of the SSMP provided to the inspector did not contain several sections/attachments. As a result, this checklist item was not evaluated as the information was not provided as referenced in the SSMP.	

S = Satisfactory, M = Marginal, U = Unsatisfactory, N = Not Evaluated/Not Applicable

PLSD Public Report Detail Page

May 6, 2006 through February 23, 2012

PLSD Public Report - Detail Page ----- -

Here is the detail page of your PLSD public report search for the selected region, responsible agency, or collection system. These results correspond to the following search criteria:

÷...

- - -

SEARCH CRITERIA: (REFINE SEARCH)

- 2 Region (9)
- ¿ Spill Type (private_cat1_2)
- ¿ End Date (2/23/2012)

The table below presents important details for all sewage discharge locations, as submitted through individual PLSD reports, which meet the search criteria selected. If data is not shown for a particular field, it means the Enrollee did not provide the information and was not required to do so. To view the entire PLSD report for a specific sewage discharge location, please select the corresponding EVENT ID.

Sewer Work Orde was instructed to call the County Health Department(858) 565-	······································
5255 and the Water Quality Control Board(858) 822-8344.	
By CREW, RODDER: 1/31/2010 10:08:08 PM	
I called the County Health Department at approximately	
5:34PM. Contact person was Holly. I gave her all the information regarding the spill. She took my information	
including a contact number. The number I gave her was the	
WWC Duty Cell Number. At approximately 6:00PM, I received	
a call from Todd Burton. He is the County Health Haz-Mat	
Duty Man. I gave him the information regarding the spill. He	
instructed me to contact the homeowner at 989 Sidonia Street	
and explain to them that the field next to there home had	
soaked up some wastewater. No one was home.	
By CREW, RODDER: 1/31/2010 10:26:30 PM	
Contacted the Regional Board (858-822-8344 around 6:05	
PM. I left a message on their answering machine. I left my	
name as well as contact number(WWC Duty Phone (760) 685-	
5541.
