**Subject:** RE: Update on Santa Margarita Watershed WQIP B.3 submittal - Consultation Committee review period now June 8 to June 15 and through August 7

All Concerned,

I have reviewed Draft Section B.3-Goals, Strategies and Schedules of the SMR Water Quality Improvement Plan, which includes the Draft SMR Watershed Management Area Analysis, and have the following comments:

1) In general, this document is very comprehensive and thorough and does a good job of presenting goals, strategies, and schedules.

2) One of the compliance pathways presented in Section 3.2.1 Upper SMR Subwatershed is Pathway 2 - Demonstration that the Santa Margarita Estuary targets (based on the proposed TMDL alternative) have been attained. The algal biomass numeric targets for the Santa Margarita Estuary are closely linked to dissolved oxygen. Therefore, if the dissolved oxygen target is different for the upper SMR subwatershed than for the estuary, algal biomass targets may be different as well, and this may also influence the required load reduction goal, compliance pathway 1. It is understood that there are also other potential pathways to compliance.

3) While it is clear in the B.3 submittal that the WQIP concerns controlling non-stormwater MS4 sources prohibited by the existing MS4 Permit requirements (Order No. R9-2015-0100), it is not made clear how agricultural sources will be controlled. I assume agricultural sources not addressed in the WQIP will be addressed under the agricultural orders (Orders No. R9-2016-0004 and R9-2016-0005). It would be helpful to have more discussion and clarity on this topic in the WQIP.

Importance: High

To the Consultation Committee and Copermittees-

I am providing additional clarification on the direction given to the Copermittees by the San Diego Water Board on the review time available for Consultation Panel Members.

The San Diego Water Board is requiring that the Copermittees provide the Consultation Committee members a review and comment period from today's date, June 9, through the end of the estimated 30-day formal public comment period (approximately August 7) of the B.3 submittal to provide written comments. The Copermittees must consider the Consultation Committee comments received during this time period (June 9 through August 7) in the development of the Plan. The Consultation Members must have adequate time to review and comment on the Plan. In short the Consultation Committee members have until August 7 or thereabouts to make comments that will be considered for this Plan.

In addition, the Copermittees are to e-mail the Consultation Committee comments to all committee members whether they are received by June 15 or thereafter.

If you have any questions, please e-mail me.

Dear Committee Members,

Below is a link to the Draft Section B.3-Goals, Strategies and Schedules of the SMR Water Quality Improvement Plan and the Draft SMR Watershed Management Area Analysis (included as Appendix 3C). In order to consider comments prior to submittal to the SDRWQCB, we respectfully request your comments by Close of Business on June 15th. If you are unable to provide comments by that time, you may continue to review the documents throughout the 30 day public review period which will begin after submittal on July 7th. I have also attached a draft of the meeting notes from our discussion on May 17. Thank you for your time and effort.

Subject: Update on Santa Margarita Watershed WQIP B.3 submittal - Consultation Committee review period now June 8 to June 15

Consultation Committee members,

Good news, you won't have to spoil your Memorial Day weekend reviewing the B.3 submittal. We are pushing back the date to give you the B.3 draft to June 8; comments will be due by close of business June 15. I'm sorry for any inconvenience this change might have caused.

Best Wishes,

Stuart

Stuart E. McKibbin, P.E., C.F.M.  
Chief of Watershed Protection Division
