⁶ Flow calculated in the field using a timed-volume (bucket) method.⁷ The monitoring location was dry and was not sampled. Surface water was found upstream of this location and was sampled on 8/29/00. It was located on the property at the base of the drainage area.⁸ Jubilee Station was found to be dry. Groundwater was found surfacing upstream on 9/26/00 by RB staff. The location was sampled for the remainder of the monitoring period by Hines Nursery.

⁹ Flow measurement recorded at time of sampling. Flow measured by Hines Nursery staff using 24-hr water level recorder and Parshall flume installation. Only one sample was collected from flowing water being discharged from the Hines Property at the time of sample collection.¹⁰ ADF is average daily flow measured by water level recorder.
