

Appendix F

Time Variable Sediment Toxicity Response to Baseline Loading Plots for the EFDC Toxics Model at the Impaired Shoreline Areas

Figure F-1. Bed TPAH concentrations at the Paleta Creek mouth for the baseline loading condition.	1
Figure F-2. Bed PCB concentrations at the Paleta Creek mouth for the baseline loading condition.	1
Figure F-3. Bed chlordane concentrations at the Paleta Creek mouth for the baseline loading condition.	2
Figure F-4. Bed TPAH concentrations at the Switzer Creek mouth for the baseline loading condition.	2
Figure F-5. Bed TPCB concentrations at the Switzer Creek mouth for the baseline loading condition.	3
Figure F-6. Bed chlordane concentrations at the Switzer Creek mouth for the baseline loading condition.	3
Figure F-7. Bed lindane concentrations at the Switzer Creek mouth for the baseline loading condition.	4
Figure F-8. Bed TPAH concentrations at the Downtown Anchorage mouth for the baseline loading condition.	4
Figure F-9. Bed TPCB concentrations at the Downtown Anchorage mouth for the baseline loading condition.	5
Figure F-10. Bed chlordane concentrations at the Downtown Anchorage mouth for the baseline loading condition.	5

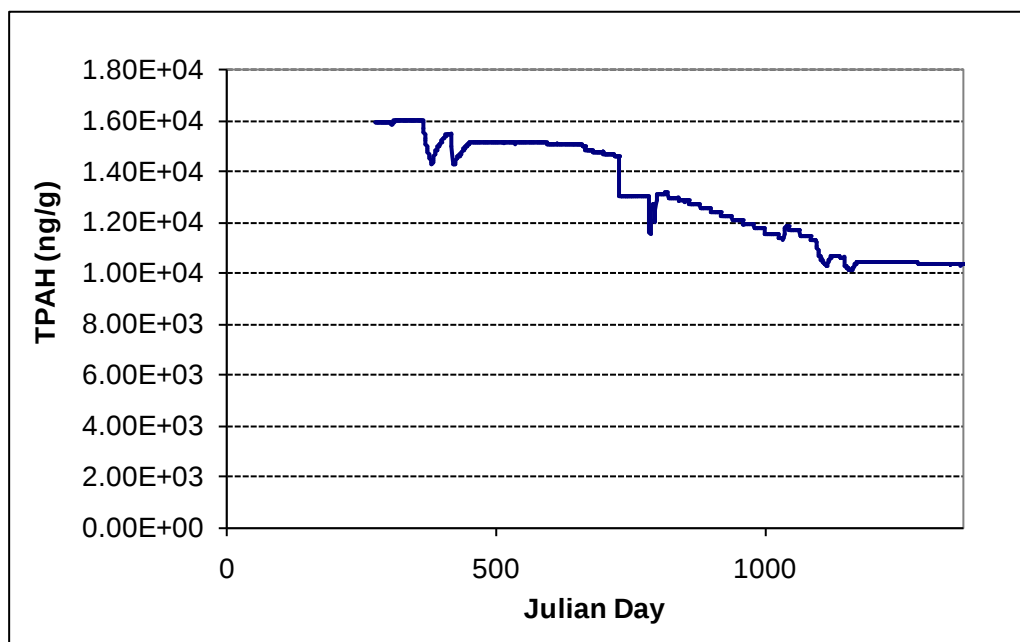

Figure F-1. Bed TPAH concentrations at the Paleta Creek mouth for the baseline loading condition.

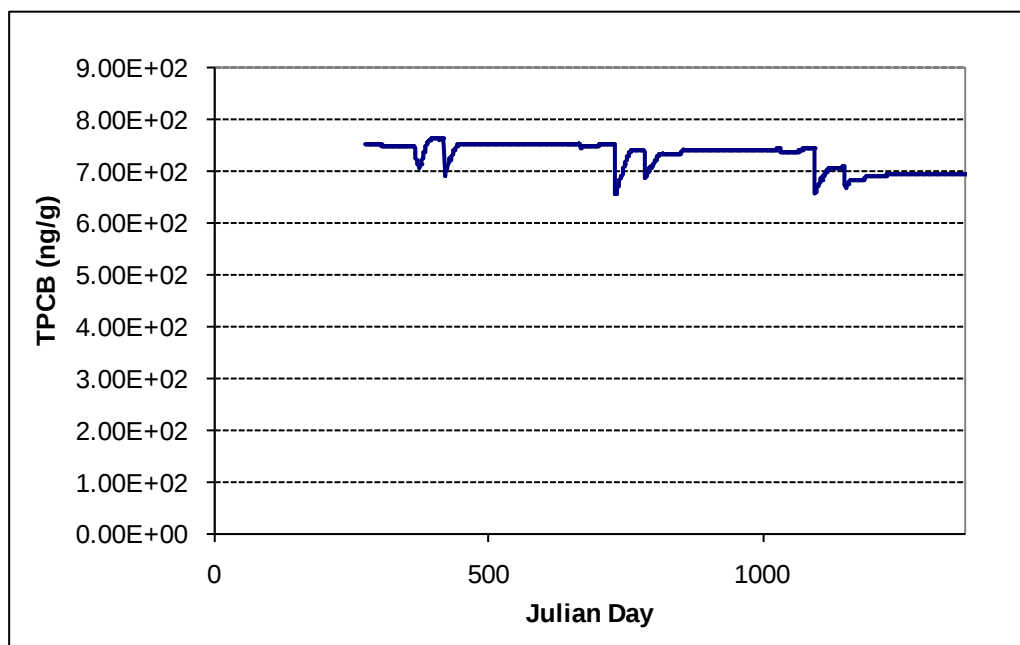

Figure F-2. Bed PCB concentrations at the Paleta Creek mouth for the baseline loading condition.

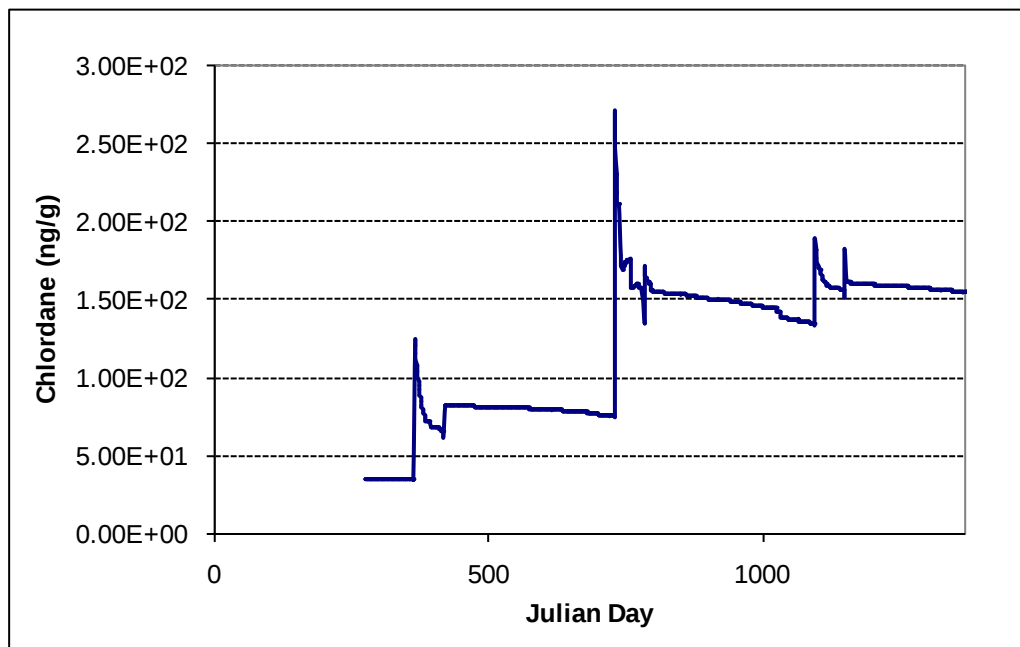

Figure F-3. Bed chlordane concentrations at the Paleta Creek mouth for the baseline loading condition.

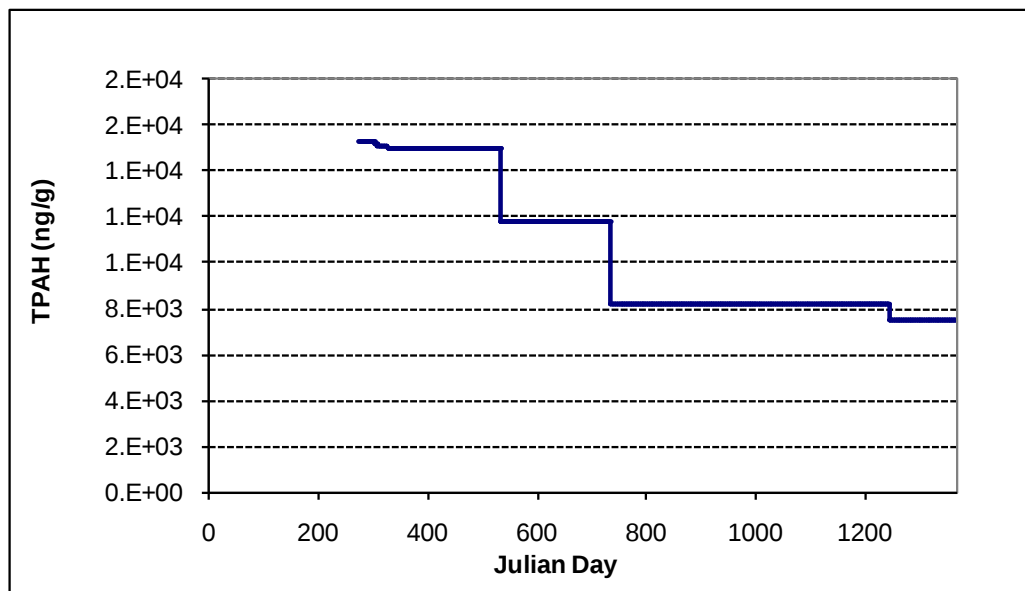

Figure F-4. Bed TPAH concentrations at the Switzer Creek mouth for the baseline loading condition.

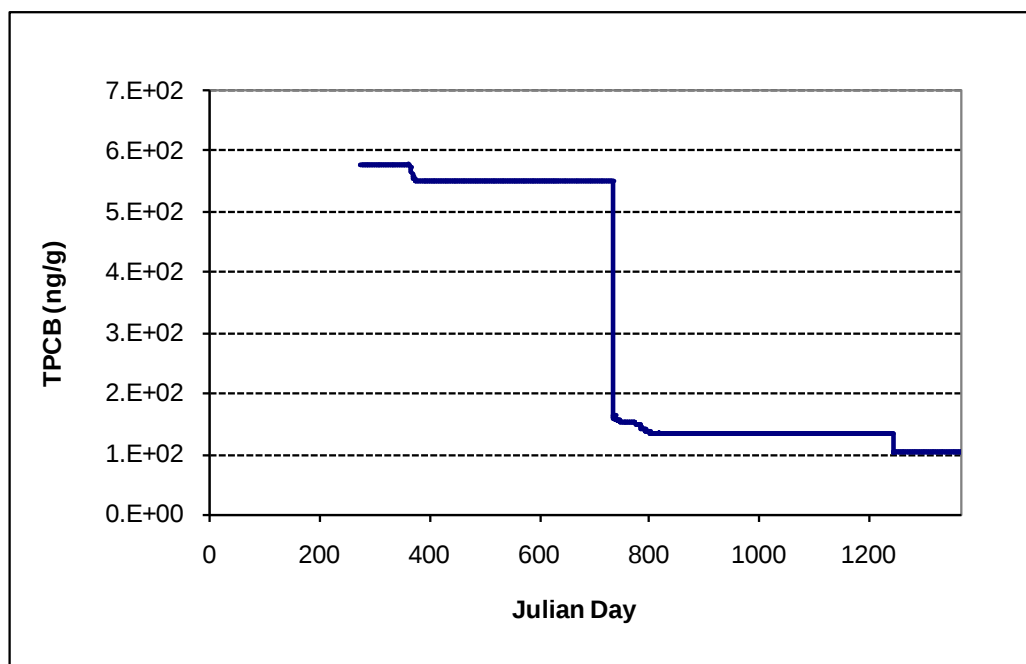

Figure F-5. Bed TPCB concentrations at the Switzer Creek mouth for the baseline loading condition.

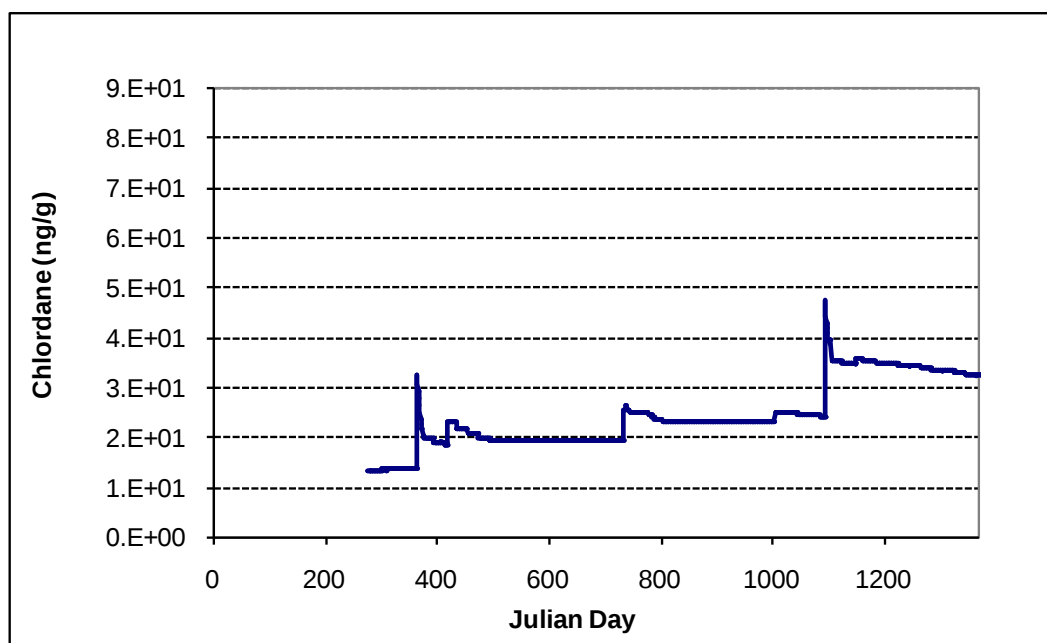

Figure F-6. Bed chlordane concentrations at the Switzer Creek mouth for the baseline loading condition.

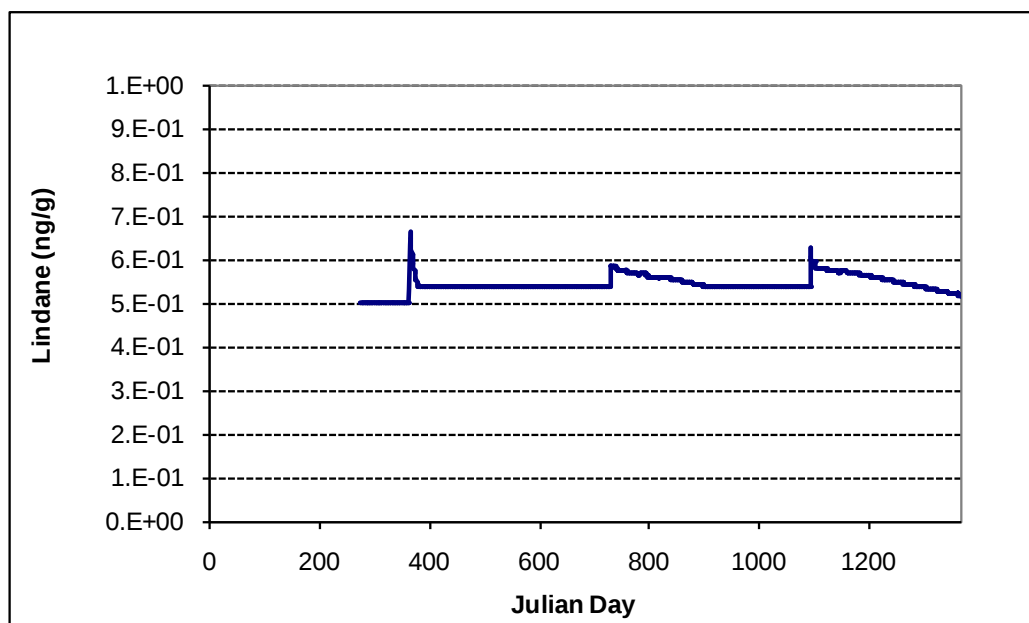

Figure F-7. Bed lindane concentrations at the Switzer Creek mouth for the baseline loading condition.

Figure F-8. Bed TPAH concentrations at the Downtown Anchorage mouth for the baseline loading condition.

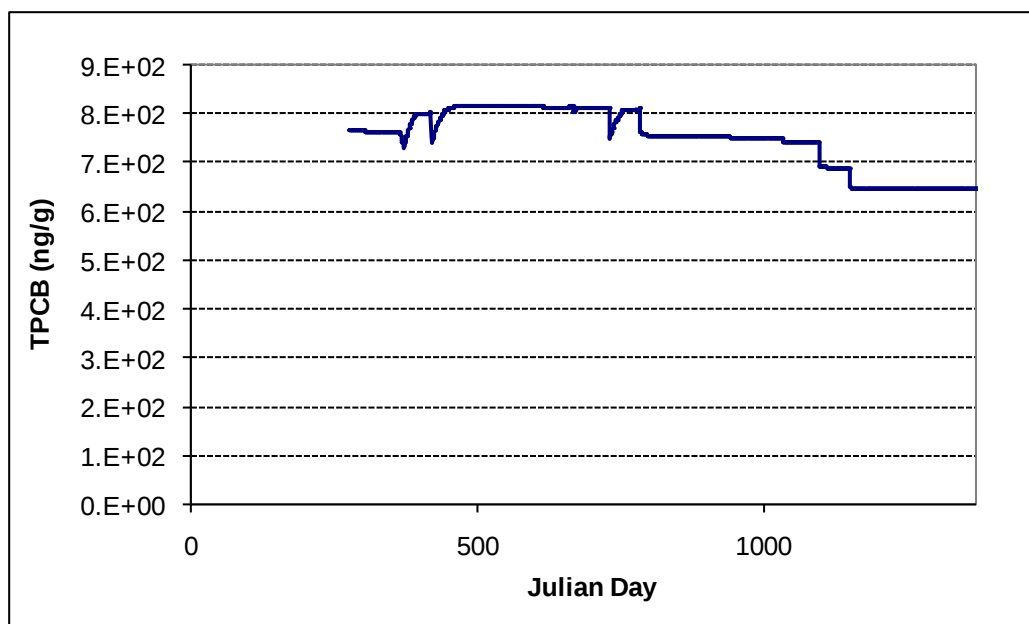

Figure F-9. Bed TPCB concentrations at the Downtown Anchorage mouth for the baseline loading condition.

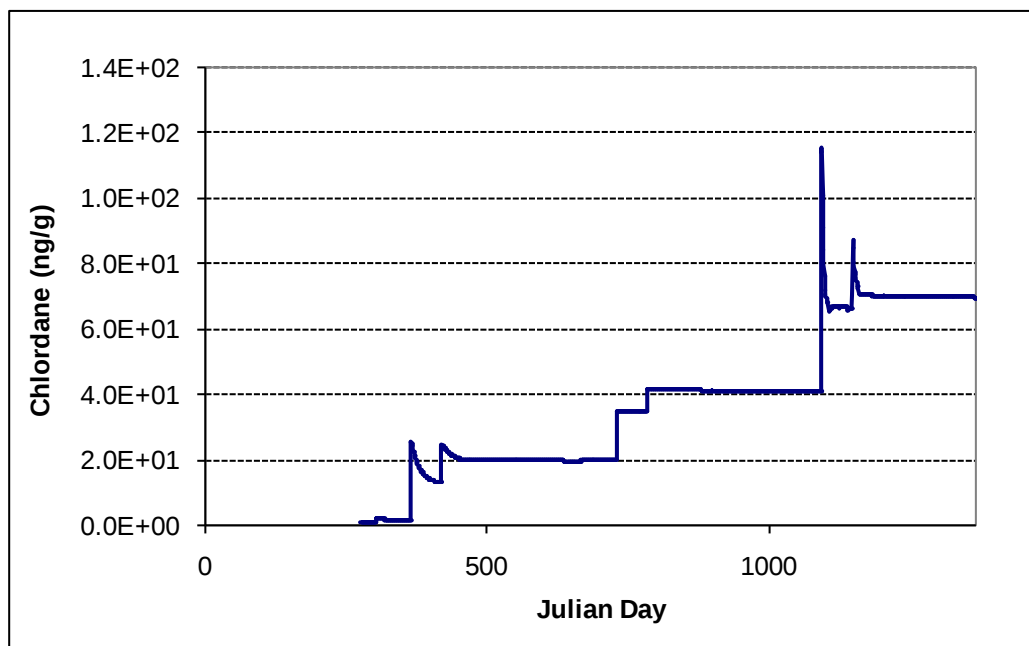

Figure F-10. Bed chlordane concentrations at the Downtown Anchorage mouth for the baseline loading condition.
