

**CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
SAN FRANCISCO BAY REGION**

ORDER R2-2019-0022

**RESCISSION OF SITE CLEANUP REQUIREMENTS
(ORDER NOS. 01-066, R2-2002-0033, R2-2002-0128, AND R2-2004-0006) for:**

**Chevron USA Products Company
Bay Cities Oil Marketers, Inc.
Dillingham Construction N. A., Inc.
Texaco, Inc., Equiva Services, LLC
Phillips Petroleum Company
ExxonMobil Oil Corporation
Exxon Mobil Corporation
Atlantic Richfield Company
Napa County Flood Control and Water Conservation District**

For the property located at:

**EAST BANK OF THE NAPA RIVER BETWEEN SIXTH STREET AND TULUCAY
CREEK, NAPA, NAPA COUNTY**

The California Regional Water Quality Control Board, San Francisco Bay Region (hereinafter the Regional Water Board), finds that:

1. **Regional Water Board Orders:** The Regional Water Board adopted a series of cleanup orders to address petroleum contamination at this site considering the Napa River channel widening conducted by the Napa River Flood Control Project (Project):
 - a. Order No. 01-066 established site-wide cleanup requirements for Napa County Flood Control and Water Conservation District (District) and five parcel-specific parties. The order approved the District's cleanup plan, set cleanup levels, and required cleanup plan implementation.
 - b. Order No. R2-2002-0033 amended Order No. 01-066 to remove Task 7 and revise several task compliance dates.
 - c. Order No. R2-2002-0128 amended Order No. 01-066 to remove Task 3 and modify compliance dates for Task 5 and Task 6.
 - d. Order No. R2-2004-0006 further amended Order No. 01-066 to add three parcel-specific parties after petroleum contamination was found on three additional parcels during cleanup plan implementation.

These orders named the dischargers responsible for remediation of soil and groundwater concurrently with the construction of the flood control project, as shown in the table below.

Case Number	Case Name	Discharger	Former Address
28S0008	Bay Cities Oil	Chevron USA Products Company	477 Oil Company Road, Napa
28S0045	Basalt Rock Co.- Dillingham Construction	Dillingham Construction N. A., Inc	301 River Street, Napa
28S0031	Basalt Rock Co.- Dillingham Construction	Dillingham Construction N. A., Inc.	903 Eighth Street, Napa
28S0033	Texaco Oil Terminal	Texaco Inc. Equiva Services, LLC	506 Oil Company Road, Napa
28S0032	Phillips Terminal Oil	Phillips Petroleum Co.	901 Eighth Street, Napa
28S0035	Former Exxon Oil Terminal	ExxonMobil Oil Corp.	385 Oil Company Road, Napa
28S0036	Mobil Bulk Plant (former) - Napa	ExxonMobil Oil Corp.	415 Oil Company Road, Napa
28S0034	Former ARCO Oil Terminal	Atlantic Richfield Company	100 Oil Company Road, Napa
28S0046	Napa County Flood Protection Project	Napa County Flood Protection and Water Conservation District	

2. **Compliance with Board Orders:** The dischargers have completed all tasks in the Orders.

Task 1: Hydraulic Containment, Discharge, and Mitigation Plan
 Task 2: Best Management Plan and Stormwater Pollution Prevention Plan
 Task 3: Soil Treatment Plan
 Task 4: Post-Construction Monitoring Plan
 Task 6: Certification of Soil Treatment Unit Construction
 Task 7 Evaluation of River Bank Stabilization Measures
 Task 8: Summary Report of Remedial Action Results and Findings
 Task 9 Post-Construction Contingency Plan (PCCP)

The February 1, 2019 PCCP requires semi-annual, post flood event, and post-earthquake event inspections, and annual reporting. Future PCCP implementation is required in Waste Discharge Requirement (WDR) Order No. R2-2019-0023. This Order sets stream maintenance requirements for a larger area that encompasses the Site.

3. **Basis for Rescission:** The dischargers have complied with the requirements of Order No. 01-066 as amended. The site qualifies for low-threat closure pursuant to the State Water Resources Control Board's (State Water Board) [Low-Threat Underground Storage Tank Case Closure Policy](#) (LTCP). The LTCP focuses on leaking fuel underground storage tank sites but can be used for other petroleum-impacted sites.

The Site meets the LTCP's general criteria and media-specific criteria, as shown in the following table.

LTCP General Criteria	Meets LTCP Criteria?
a. The unauthorized release is located within the service area of a public water system;	Yes
b. The unauthorized release consists only of petroleum;	Yes
c. The unauthorized ("primary") release from the UST system has been stopped;	Yes
d. Free product has been removed to the maximum extent practicable;	Yes
e. A conceptual site model that assesses the nature, extent, and mobility of the release has been developed;	Yes
f. Secondary source has been removed to the extent practicable;	Yes
g. Soil or groundwater has been tested for methyl tert-butyl ether and results reported; and	Yes
h. Nuisance as defined by Water Code section 13050 does not exist at the Site.	Yes
Groundwater Media-Specific Criteria (see below)	Yes
Petroleum Vapor Intrusion to Indoor Air Media-Specific Criteria (see below)	Yes
Direct Contact and Outdoor Air Exposure Media-Specific Criteria (see below)	Yes

- a. **Groundwater Media-Specific Criteria:** The Site meets the LTCP groundwater-specific criterion No. 5. The most recent groundwater monitoring event was conducted in September 2014. The results of the 2014 sampling event indicated that hydrocarbons were present in MW-3 at concentrations above site specific cleanup goals for diesel range organics and oil range organics at 640 µg/l for both analytes. Concentrations of hydrocarbons in the other eight groundwater monitoring wells are below site-specific cleanup goals. Concentrations of hydrocarbons have declined in all groundwater monitoring wells and that trend is expected to continue. All nine groundwater monitoring wells have been properly destroyed.
- b. **Petroleum Vapor Intrusion to Indoor Air Media Specific Criteria:** Petroleum release sites shall satisfy the media-specific criteria for petroleum vapor intrusion

to indoor air. Petroleum vapor intrusion to indoor air is not possible at this time or reasonable expected in the future because there are no buildings at the Site. The PCCP specifies that no development of the Site is allowed, and the property cannot be transferred without Regional Water Board permission.

- c. **Direct Contact and Outdoor Air Exposure Media-Specific Criteria:** The concentrations of petroleum constituents in soil will have no significant risk of adversely affecting human health because the soil cap acts as an engineering control combined with the PCCP as an administrative control. Implementation of the PCCP will ensure no contact with the contaminated groundwater.
4. **California Safe Drinking Water Policy:** It is the policy of the State of California that every human being has the right to safe, clean, affordable, and accessible water adequate for human consumption, cooking, and sanitary purposes. This order promotes that policy because Site Cleanup Standards (contained in Order R2-2001-066 and designed to meet criteria for dredged soil, and saltwater ecological protection) are and will continue to be met in existing and future supply wells. There are no wells at the Site and residual contamination has been capped to prevent impact to the Napa River. The closest known groundwater well is 300 meters to the south.
5. **CEQA:** This action rescinds orders to enforce the laws and regulations administered by the Regional Water Board. Rescission of the Orders is not a project as defined in the California Environmental Quality Act (CEQA). There is no possibility that the activity in question may have a significant effect on the environment. (Cal. Code Regs., tit. 14 §§ 15378 and 15061, subd. (b) (3).)
6. **Notification:** The Regional Water Board has notified the discharger and all interested agencies and persons of its intent under Water Code section 13304 to rescind site cleanup requirements for the discharge and has provided them with an opportunity to submit their written comments.
7. **Public Hearing:** The Regional Water Board, at a public meeting, heard and considered all comments pertaining to this discharge.

IT IS HEREBY ORDERED, pursuant to sections 13304 and 13267 of the Water Code, that Order Nos. 01-066, R2-2002-0033, R2-2002-0128, and R2-2004-0006 are rescinded.

I, Michael Montgomery, Executive Officer, do hereby certify that the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, San Francisco Bay Region, on July 15, 2019.

Michael Montgomery
Executive Officer
