| SAN MATEO COUNTY | Roads: Design, construct, and maintain roads to i) reduce road-related sediment delivery to channels to ≤ 500 cubic yards per mile per 20-year period; and ii) limit the length of roads that are hydrologically connected to 25 percent of total road length; and iii) ensure culvert inlets have low plug potential; and iv) install critical dips at culverted crossings that have a diversion potential; and | PLANNING AND PRIORITIZING  
Comply with NPDES Permit No. CAS612008 (also referred to as the Municipal Regional Stormwater Permit).  
AND  
Create an inventory of roads that may contribute to sediment delivery to streams and develop a prioritized list and schedule of actions.  
Where performance standards are not achieved or where road-related sediment sources are not covered by NPDES Permit No. CAS612008, do one of the following:  
EITHER  
Submit a Report of Waste Discharge to the Water Board that provides, at a minimum, the following: description of the road network and/or segments; identification of erosion and sediment control measures to achieve performance standard(s) specified in this table; and a schedule for implementation of identified control measures. For paved roads, erosion and sediment control actions could primarily focus on road crossings to meet the performance standard.  
OR  
Comply with applicable Waste Discharge Requirements (WDRs) or waiver of WDRs. | San Mateo County | 3 years from effective date of this Basin Plan amendment  
5 years from effective date of this Basin Plan amendment  
As specified in applicable WDRs or waiver of WDRs |
