

Table 7.8.3-5 Required TMDL Implementation Measures for Sediment Discharges Associated with Grazing

Source(s) and Performance Standard(s)	Actions	Implementing Parties	Completion Dates
<p>Surface erosion associated with livestock grazing: Attain or exceed minimal residual dry matter values consistent with University of California Division of Agriculture and Natural Resources guidelines; and</p> <p>Roads: Design, construct, and maintain rural roads to minimize road-related sediment delivery to stream channels; and</p> <p>Gullies and/or shallow landslides: Promote natural recovery and minimize human-caused increases in sediment delivery from unstable areas.</p>	<p>Submit a Report of Waste Discharge¹ to the Water Board that provides, at a minimum, the following: description of the property; identification of site-specific erosion control measures to achieve performance standard(s) specified in this table; and a schedule for implementation of identified erosion control measures.</p>	<p>Landowner and/or ranch operator</p>	<p>June 2014</p>
	<p>Comply with applicable waste discharge requirements (WDRs) or waiver of WDRs.</p>	<p>Landowner and/or ranch operator</p>	<p>As specified in applicable WDRs or waiver of WDRs</p>
	<p>Report progress on implementation of site specific erosion control measures.²</p>	<p>Landowner and/or ranch operator</p>	<p>As specified in applicable WDRs or waiver of WDRs</p>
<p>¹ Or compliance with applicable conditional waivers of WDRs that may be adopted by the Water Board. ²These reports may be prepared individually or jointly or through a recognized third party.</p>
