

State of California
California Regional Water Quality Control Board
Santa Ana Region

Order No. R8-2020-0034

Waste Discharge Requirements
for
Crestmore Redevelopment, LLC, an Indirect Subsidiary of VCP Management, LLC
(Viridian Partners)
Agua Mansa Commerce Park Specific Plan Project
City of Jurupa Valley
Riverside County

The California Regional Water Quality Control Board, Santa Ana Region (hereinafter Santa Ana Water Board), finds that:

1. This Order is for Waste Discharge Requirements (WDRs) for Crestmore Redevelopment, LLC, an Indirect Subsidiary of VCP Management, LLC (Viridian Partners) (herein after, discharger) for the Agua Mansa Commerce Park Specific Plan Project (Project).
2. Receiving waters and groundwater potentially impacted by this Project are protected in accordance with the Water Quality Control Plan for the Santa Ana Basin (1995) and subsequent amendments (Basin Plan) and other plans and policies. The Basin Plan includes water quality standards, which consist of existing and potential beneficial uses of waters of the State, water quality objectives to protect those uses, and the State and federal antidegradation policies.
3. WDRs are necessary to address impacts of dredged and fill material on the beneficial uses of waters of the State (WOTS).
4. On November 8, 2019, MIG, Inc., on behalf of the discharger, submitted a Report of Waste Discharge (ROWD). The Project was assigned the Santa Ana Water Board WDID Number 332019-31.
5. An application fee of \$1,638.00 was received on September 5, 2019. An additional check for \$3,143.00 based on total Project impacts was received on August 10, 2020. The fee amount was determined as required by California Code of Regulations (CCR) title 23, sections 3833(b)(3) and 2200(a)(3) and was calculated as Category A - Fill & Excavation Discharges (fee code 84) with the dredge and fill fee calculator.

6. The ROWD was considered complete on July 31, 2020.
7. On July 18, 2019, the U.S. Army Corps of Engineers issued an Approved Jurisdictional Delineation that determined that no waters of the United States (WOTUS) were present within the Project boundaries.
8. This Order regulates the discharge of fill material to WOTS. Onsite WOTS consist of eight separate features: an isolated freshwater emergent wetland feature (1) with an associated isolated riparian wetland (2); an isolated riparian feature (3); and an isolated open water feature (Crestmore Lake) (4) with four associated lacustrine fringe wetland features (5-8). The Project overlays Riverside A and Riverside B Groundwater Management Zones. Surface water that leaves the Project area is intercepted by Riverside County Flood Control and Water Conservation District's Belltown Market Street and Agua Mansa storm drains, which are tributary to Santa Ana River, Reach 4.
9. The Discharger proposes to implement the "Agua Mansa Commerce Park Specific Plan," which would permit the development of the 302.12-acre Project site as an industrial and commercial development. The Project site was formerly occupied by the Riverside Cement Plant and used for mining and cement production. Operations of this facility as a cement plant ceased in 2014. Currently, the site is being decommissioned and prepared for environmental remediation.
10. As mentioned, the Project is located on the former site of the Riverside Cement Plant in the City of Jurupa Valley, Riverside County. The Project is bounded by El Rivino Road on the North, Rubidoux Boulevard on the West, Agua Mansa Road on the South, and previously developed industrial properties on the East. The Project's coordinates are 34.0265° latitude and -117.3842° longitude. The site is within an un-sectioned portion of Jurupa Land Grant of the U.S. Geological Survey 7.5-minute quadrangle map Fontana, California. A map showing the Project location is found in Attachment A of this Order.
11. Riverside A and Riverside B Groundwater Management Zones both have the following designated beneficial uses (existing or potential):
 - i. Municipal and Domestic Supply (MUN)
 - ii. Agricultural Supply (AGR)
 - iii. Industrial Service Supply (IND)
 - iv. Industrial Process Supply (PROC)

12. Santa Ana, Reach 4 and its tributaries have the following designated beneficial uses (existing or potential):
 - v. Agricultural Supply (AGR)
 - vi. Groundwater Recharge (GWR)
 - vii. Water Contact Recreation (REC1)
 - viii. Non-contact Water Recreation (REC2)
 - ix. Warm Freshwater Habitat (WARM)
 - x. Wildlife Habitat (WILD)
 - xi. Rare, Threatened, or Endangered Species (RARE)
 - xii. Spawning, Reproduction, and Development (SPWN)
13. Onsite WOTS include isolated riparian wetlands, isolated emergent wetlands, isolated lacustrine fringe wetlands, and an isolated perennial open water pond (Crestmore Lake) totaling 10.973 acres of WOTS.
14. The Project would permanently impact 0.332 acre of isolated riparian WOTS through mass grading to construct the Project. The Project would avoid 10.641 acres of WOTS onsite, including Crestmore Lake and its associated lacustrine fringe wetlands.
15. The discharger would provide compensatory mitigation for the permanent loss of 0.332 acre of WOTS with the purchase of 1.36 acres of re-establishment and/or rehabilitation credits at Riverpark Mitigation Bank.
16. The Santa Ana Water Board has the authority to regulate the discharge of dredged and fill materials through the issuance of WDRs pursuant to California Water Code (CWC) section 13263. The Santa Ana Water Board has determined that WDRs are necessary to adequately address the Project's potential impacts on the beneficial uses of WOTS.
17. CWC section 13263 authorizes the Santa Ana Water Board, after any necessary hearing, to prescribe requirements as to the nature of any proposed discharge with relation to the conditions existing in the disposal area or receiving waters upon, or into which, the discharge is made or proposed. The requirements must implement any relevant water quality control plans that have been adopted and take into consideration the beneficial uses to be protected, the water quality objectives reasonably required for that purpose, other waste discharges, the need to prevent nuisance, and the provisions of CWC section 13241. In accordance with subdivision (g) of section 13263, all discharges of waste into WOTS are privileges, not rights, and the WDRs in this Order shall not create a vested right to continue to discharge and are subject to rescission or modification.

18. Pursuant to CWC section 13267, the Santa Ana Water Board, in establishing or reviewing any water quality control plan or WDRs, or in connection with any action relating to any plan or requirement authorized by CWC Division 7, may investigate the quality of any WOTS within its region. In conducting such an investigation, the Santa Ana Water Board may require that any person who has discharged, discharges, or is suspected of having discharged or discharging, or who proposes to discharge waste within its region, furnish, under penalty of perjury, technical or monitoring program reports. The burden, including costs, of these reports must bear a reasonable relationship to the need for the report and the benefits to be obtained from the reports. The WDRs contained in this Order incorporate requirements for water quality monitoring and Project reporting, which are necessary to ensure that the discharge of dredged and fill material complies with WDRs and is protective of the environment.
19. The WDRs in this Order are adopted pursuant to CWC sections 13263 and 13267. The WDRs set forth the requirements, prohibitions, and other conditions to implement the Basin Plan, and the discharger's responsibilities for monitoring and reporting. The discharger is responsible for ensuring compliance with the WDRs. In addition, this Order also regulates the discharge of fill material to WOTS.
20. It is the policy of the State of California that every human being has the right to safe, clean, affordable, and accessible water adequate for human consumption, cooking, and sanitary purposes. This Order promotes that policy by requiring that discharges not exceed maximum contaminant levels designed to protect human health and ensure that water is safe for domestic use.
21. Pursuant to CCR Title 14, Chapter 3, section 15096, as a responsible agency, the Santa Ana Water Board is required to consider California Environmental Protection Agency (CEQA) documents prepared by the lead agency to determine a Project should receive WDRs. A responsible agency has responsibility to mitigate and avoid only the direct and indirect environmental effects of those parts of the project that it decides to carry out, finance, or approve. Further, the responsible agency must make findings as required by CCR section 15091 and, if necessary, section 15093 for each and every significant impact of the project.
22. A draft Project Environmental Impact Report (EIR) was provided with the discharger's application. On April 16, 2020, the City of Jurupa Valley, as lead CEQA agency, certified the final EIR for the Project. A Notice of Determination was filed with Office of Planning and Research's State Clearinghouse on May 11, 2020.
23. As required by CCR section 15096, in approving this Order, the Santa Ana Water Board has considered the EIR certified by the City of Jurupa Valley and

subsequent information provided by the discharger. More specifically, the Santa Ana Water Board considered those sections of the EIR pertaining to impacts to water quality standards. Based on the mitigation proposed in the EIR and the Conditions set forth in this Order, potentially adverse impacts to water quality standards should be reduced to a less than significant level and beneficial uses protected, if all stated mitigation and conditions are performed.

24. The Santa Ana Water Board has considered antidegradation pursuant to State Water Resources Control Board (State Water Board) Resolution No. 68-16 and Title 40, Code of Federal Regulations section 131.12 and finds that the discharge permitted under this Order is consistent with those provisions. State Water Board Resolution No. 68-16 requires that existing quality of waters be maintained unless degradation is justified based on specific findings. Minimal water quality degradation may be allowed only if any change in water quality is consistent with the maximum benefit to the people of the State; the degradation will not unreasonably affect present and anticipated beneficial uses; and the degradation will not result in violation of any applicable water quality control plan. Discharges must meet requirements that will result in the best practicable treatment or control to avoid pollution or a condition of nuisance.
25. Consistent with the antidegradation policy, any degradation resulting from the discharges authorized by this Order provides the maximum benefit to the people of the State. Flood protection is critical to the safety of the public. Moreover, this Order contains WDRs to ensure present and future beneficial uses are maintained or enhanced through compensatory mitigation and monitoring requirements for authorized impacts to WOTS. The WDRs ensure that the highest level of water quality is maintained consistent with the maximum benefit to the people of the State by prohibiting certain discharges, requiring the implementation of best management practices, and requiring the discharger to submit an annual report.
26. The Santa Ana Water Board has notified the discharger and other interested agencies and persons of its intent to prescribe WDRs for the discharge and has provided them with an opportunity for public hearing and an opportunity to submit their written views and recommendations.

IT IS HEREBY ORDERED that the discharger, in order to meet the provisions contained in CWC Division 7 and regulations adopted thereunder, shall comply with the following:

DISCHARGE SPECIFICATIONS:

1. No activities associated with the Project shall cause or threaten to cause a nuisance or pollution as defined in CWC section 13050.

2. The discharge of any substance in concentrations toxic to animal or plant life is prohibited.
3. The groundwater in the vicinity of the Project shall not be degraded as a result of the Project activities or placement of fill for the Project.
4. The discharger shall comply with conditions described in and required by the State Water Board's NPDES General Permit for Storm Water Discharges Associated with Construction and Land Disturbance Activities (Order No. 2009-0009-DWQ, as amended by Order No. 2012-0006-DWQ; NPDES No. CAS000002) and any subsequent approvals.
5. The discharger shall comply with the local regulations associated with the Santa Ana Water Board's Municipal Stormwater Permit issued to Riverside County and co-permittees under NPDES No. CAS618033 and Waste Discharge Requirements Order No. R8-2010-0033, and subsequent iterations thereof.
6. If construction dewatering discharges, including temporary stream diversions are necessary to carry out the Project, the discharger shall comply with Santa Ana Water Board Order No. R8-2020-0006, General Waste Discharge Requirements for Discharges to Surface Waters that Pose an Insignificant (De Minimis) Threat to Water Quality
7. The discharge of fill materials shall be limited to the placement of native fill and inert materials, as defined in CCR Title 27, Division 2, section 20230. The discharge of fill material other than native soil is prohibited, unless authorized by the Santa Ana Water Board.

DISCHARGE PROHIBITIONS:

1. The direct discharge of wastes, including rubbish, refuse, bark, sawdust, or other solid or liquid wastes, into channels, surface waters, or any place where they would contact or be eventually transported to surface waters, including flood plains, is prohibited.
2. The discharge of oil or other floating materials from any activity in quantities sufficient to cause deleterious bottom deposits, turbidity, or discoloration in surface waters is prohibited.
3. The discharge of silt, sand, clay, or other earthen materials from any activity in quantities sufficient to cause deleterious bottom deposits, turbidity, or discoloration in surface waters is prohibited.
4. Discharges to surface waters of wastes or pollutants that are not otherwise regulated by a separate NPDES permit are prohibited.

5. During the grading and filling operation, there shall be no onsite fueling, lubrication, changing of oil or other equipment fluids and their filters, or any other maintenance or storage of construction equipment within or next to drainage areas or other surface runoff conveyances.

PROVISIONS:

1. Prior to the start of Project grading activities, the discharger shall submit to the Santa Ana Water Board the receipt of the purchase of 1.36 acre of re-establishment and/or rehabilitation credits at Riverpark Mitigation Bank.
2. The discharger shall maintain a copy of this Order at the Project site so that it is always available to site operating personnel. Key operating personnel shall be familiar with the Order's content.
3. The discharger shall comply with all of the requirements of this Order. Any violation of this Order constitutes a violation of the CWC, may constitute a violation of the federal Clean Water Act and its regulations, and is grounds for enforcement action, termination of this Order, revocation and re-issuance of this Order, denial of an application for re-issuance of this Order, or a combination thereof.
4. The discharger shall take all reasonable steps to minimize or prevent any discharge that has a reasonable likelihood of adversely affecting human health or the environment.
5. The provisions of this Order are severable and, if any provision of this Order or the application of any provisions of this Order to any circumstance is held invalid, the application of such provision to other circumstances and the remainder of this Order shall not be affected thereby.
6. The filing of a request by the discharger for modification, revocation and re-issuance, or termination of this Order or a notification of planned changes or anticipated noncompliance does not stay any requirements of this Order.
7. The requirements prescribed herein do not authorize the commission of any act causing injury to the property of another, nor protect the discharger from liabilities under federal, State, or local laws, nor guarantee the discharger a capacity right in the receiving waters.
8. This Order does not convey any property rights of any sort, or any exclusive privilege.

9. This Order is not transferable in its entirety or in part to any person or organization except after notice to the Santa Ana Water Board in accordance with the following terms:
 - a. The discharger shall notify the Santa Ana Water Board by submitting a Transfer of Property Ownership Report, of any change in ownership or interest in ownership of the Project area. The discharger and purchaser shall sign and date the notification and provide such notification to the Santa Ana Water Board at least ten days prior to the transfer of ownership. The purchaser shall also submit a written request to the Santa Ana Water Board to be named as the discharger in a revised order.
 - b. Until such time as this Order has been modified to name the purchaser as the discharger, the discharger identified in this Order shall continue to be responsible for all requirements set forth in this Order.
10. In the event of any change in control or ownership of land or waste discharge facility presently owned or controlled by the discharger, the discharger shall notify the succeeding owner or operator of the existence of this Order by letter, a copy of which shall be forwarded to the Santa Ana Water Board.
11. The discharger shall submit an Annual Report each year on the anniversary of this Order. Annual reporting shall continue until a *Notice of Project Complete Letter* is issued to the discharger. The contents of the Annual Report shall include a construction summary, Project process and schedule (including ground disturbance, site clearing and grubbing, site construction), and implementation status of Best Management Practices during the Active Discharge Period. If the Project has not started, the discharger shall provide an estimated start date and reasons for delay.
12. The discharger shall submit a *Commencement of Construction Report* at least seven days prior to start of initial ground disturbance activities.
13. The discharger shall submit a *Request for Notice of Completion of Discharges Letter* following completion of active Project construction activities, including any required restoration and discharger-responsible mitigation. This request shall be submitted to the Santa Ana Water Board staff within thirty days following completion of all Project construction activities. Upon acceptance of the request, Santa Ana Water Board staff will issue to the discharger a *Notice of Completion of Discharges Letter*, which will end the active discharge period and, if appropriate, associated annual fees.
14. The discharger shall submit a *Request for Notice of Project Complete Letter* when construction and any required post-construction monitoring is complete and

no further Project activities will occur. This request shall be submitted to Santa Ana Water Board staff within thirty days following completion of all Project activities. Upon approval of the request, the Santa Ana Water Board staff will issue to the discharger a *Notice of Project Complete Letter*, which will end the post discharge monitoring period and associated annual fees.

15. The discharger shall retain records of all monitoring information, including all calibration and maintenance records, copies of all reports required by this Order, and records of all data used to complete the application for this Order. Records shall be maintained for a minimum of five years from the date of the sample, measurement, report, or application. Records may be maintained electronically. This period may be extended during the course of any unresolved enforcement action or litigation regarding this discharge or when requested by the Santa Ana Water Board.
16. The Santa Ana Water Board and other authorized representatives shall be allowed:
 - a. Entry upon premises where a regulated facility or activity is located or conducted, or where records are kept under the requirements of this Order;
 - b. Access to copy any records that are kept under the requirements of this Order;
 - c. To inspect any facility, equipment (including monitoring and control equipment), practices, or operations regulated or required under this Order; and
 - d. To photograph, sample, and monitor for the purpose of assuring compliance with this Order.
17. This Order becomes effective on the date of adoption by the Santa Ana Water Board.
18. This Order will remain valid for five years from the date of this Order.

I, Hope A. Smythe, Executive Officer, do hereby certify that the foregoing is a full, true, and correct copy of an order adopted by the California Regional Water Quality Control Board, Santa Ana Region, on September 11, 2020.

HOPE A. SMYTHE
Executive Officer

State of California
California Regional Water Quality Control Board
Santa Ana Region

September 11, 2020

STAFF REPORT

ITEM: *

SUBJECT: Crestmore Redevelopment, LLC, an Indirect Subsidiary of VCP Management, LLC (Viridian Partners), Agua Mansa Commerce Park Specific Plan Project, City of Jurupa Valley, Riverside County, Order No. R8-2020-0034

DISCUSSION:

California Water Code (CWC) section 13376 states that any person discharging dredged or fill material or proposing to discharge dredged or fill material into the navigable waters of the United States (U.S.) within the jurisdiction of this State shall file a report of the discharge in compliance with CWC section 13260. Section 13260(a) of the CWC requires a report of waste discharge (ROWD) be filed by any person discharging waste or proposing to discharge waste that could affect the quality of the waters of the State (WOTS). Under federal Clean Water Act (CWA) section 401, applicants for a federal permit or license for any activity that may result in a discharge of fill to waters of the U.S. must obtain a state Water Quality Certification (Certification) that the proposed activity will comply with state water quality standards.

Most Certifications are issued in connection with U.S. Army Corps of Engineers (USACE) CWA section 404 permits for dredged and fill material discharges. The State Water Resources Control Board (State Water Board) and Regional Water Quality Control Boards administer the Certification program in accordance with the requirements of California Code of Regulations Title 23, section 3830 *et seq.* Since November 2003, Certifications have been issued by the Executive Officer accompanied by authorization to discharge in accordance with State Water Board Order No. 2003-0017-DWQ, "Statewide General Waste Discharge Requirements for Dredged or Fill Discharges that Have Received State Water Quality Certification."

Because of Supreme Court decisions that have limited the authority of the USACE to regulate discharges of dredged and fill material to waters of the U.S., certain discharges of dredged or fill material to surface WOTS are no longer subject to USACE jurisdiction

Crestmore Redevelopment, LLC,
an Indirect Subsidiary of VCP Management, LLC (Viridian Partners)
Agua Mansa Commerce Park Specific Plan Project

(these waters are known as non-federal waters). As a result, these discharges are not subject to a CWA section 404 permit from the USACE and do not require Certification because federal waters have been redefined. In the absence of a project's need to obtain a Certification for waters now deemed only State waters, the State Water Board has asserted the State's authority to regulate discharges of dredged and fill materials to WOTS under the Porter-Cologne Water Quality Control Act.

On May 4, 2004, the State Water Board issued Water Quality Order No. 2004-0004-DWQ, "Statewide General Waste Discharge Requirements for Dredged or Fill Discharges to Waters Deemed by the U.S. Army Corps of Engineers to Be Outside of Federal Jurisdiction." Numeric impact thresholds, however, limit the application of Order No. 2004-0004-DWQ to relatively small discharges of dredged or fill material. Therefore, individual WDRs are issued by the applicable Regional Water Quality Control Board.

On November 8, 2019 the Santa Ana Regional Water Quality Control Board (Santa Ana Water Board; SARWQCB) received from MIG, Inc. on behalf of Crestmore Redevelopment, LLC, an Indirect Subsidiary of VCP Management, LLC (Viridian Partners) (discharger), an ROWD (SARWQCB WDID No. 332019-31) for the Agua Mansa Commerce Park Specific Plan Project (Project). An application fee of \$1,638.00 was submitted with the ROWD. On July 18, 2019, the USACE issued an Approved Jurisdictional Delineation that determined that no waters of the U.S. were present within the Project boundaries.

Upon review of the ROWD and supplemental information submitted by the discharger, Santa Ana Water Board staff deemed the ROWD complete on July 18, 2020. An additional check for \$3,143.00 based on total Project impacts was received on August 10, 2020.

The discharger proposes to implement the "Agua Mansa Commerce Park Specific Plan," which would permit the development of the 302.12-acre Project site as an industrial and commercial development. The Project site was previously operated as the Riverside Cement Plant, which ceased operations in 2014. The Riverside Cement Facility is currently being decommissioned and being prepared for environmental remediation.

As mentioned, the Project is located on the former site of the Riverside Cement + in the City of Jurupa Valley, Riverside County. The Project is bound by El Rivino Road on the North, Rubidoux Boulevard on the West, Agua Mansa Road on the South, and previously developed industrial properties on the East. A map showing the Project location is found in Attachment A of the tentative Order No. R8-2020-0034.

The Project would permanently impact 0.332 acre of WOTS that are present on-site. Mass grading to prepare the site for construction of the industrial and commercial development would discharge fill to isolated riparian WOTS. The Project would have no temporary impacts. 10.641 acres of on-site WOTS will be avoided by project activities.

The discharger would provide compensatory mitigation for permanent impacts to 0.332 acre to WOTS by purchasing 1.36 acres of re-establishment and/or rehabilitation mitigation credits at the Riverpark Mitigation Bank.

Pursuant to the California Environmental Quality Act, on April 16, 2020, the City of Jurupa Valley, as lead agency, certified the final Environmental Impact Report (EIR) for the Project. The City filed a Notice of Determination at the Office of Planning and Research's State Clearinghouse on May 11, 2020.

The Santa Ana Water Board staff has considered the EIR certified by the City of Jurupa Valley and subsequent information provided by the discharger. More specifically, the Santa Ana Water Board staff considered those sections of the EIR pertaining to impacts to water quality standards. Based on the mitigation proposed in the EIR and the Conditions set forth in the tentative Order No. R8-2020-0034, potentially adverse impacts to water quality standards should be reduced to a less than significant level and beneficial uses protected, if all stated mitigation and conditions are performed. Mitigation includes the purchase of 1.36 acres of WOTS re-establishment mitigation credits at the Riverpark Mitigation Bank (an approximate 4:1 mitigation ratio of mitigation: impact).

RECOMMENDATION:

Adopt Order No. R8-2020-0034 as presented.
