

State of California
California Regional Water Quality Control Board
Santa Ana Region

February 2, 2024

STAFF REPORT

ITEM: *7

SUBJECT: Bombay Partners V Ontario, LLC, Ramona Indian Warehouse, Perris, Riverside County, Order R8-2024-0005

DISCUSSION:

Based on the scope of the federal regulatory definition of waters of the United States (WOTUS), not all discharge activities are considered discharges of dredged or fill materials to WOTUS. Pursuant to the Porter-Cologne Water Quality Control Act (Wat. Code, § 13000 et seq.), the tentative Order prescribes Waste Discharge Requirements (WDRs) for dredged and fill materials to surface waters that are not considered WOTUS and are subject to the federal Clean Water Act. (See Wat. Code, § 13263, subd. (a).) Non-WOTUS surface waters are referred to as waters of the state.

The proposed Order prescribes WDRs for the Ramona Indian Warehouse (Project) of Bombay Partners V Ontario, LLC (Discharger).

The Project involves the construction of a warehouse building in the northern portion of the City of Perris, near a designated truck route intended to increase employment and provide development compatible with the March Air Reserve Base/Inland Port Airport (MARB/IPA) Airport Land Use Compatibility Plan.

The warehouse building will comprise of a rectangular 232,575-square-foot warehouse building that includes 10,000 square feet of ancillary office space, with 215 parking stalls, 52 trailer parking stalls, and 39 dock positions that will support warehousing, showroom, and office use within a single building.

The proposed Project will facilitate completion of a controlled system, identified as Line E, that will redirect storm water flows from the intersection of Ramona Expressway and Perris Boulevard. Line E will alleviate flooding threats to human life and traffic flow on a major transportation corridor in accordance with the City's Master Drainage Plan. The widening of Ramona Expressway will replace the existing concrete brow ditch with Line E replaced by Line E.

Maps showing the Project location are found in Attachment A of the tentative Order R8-2024-0005.

A total of 0.58 acres of waters of the state are present on the Project site, comprising 0.02 acre of streambed, a 0.39-acre of seasonal pool (520 linear feet), and 0.17 acre of concrete brow ditch. Implementation of the Project would result in the permanent physical loss of all 0.58 acres (1,567 linear) of onsite, non-wetland waters. The permanent impacts are a result of the construction of the reach of Line E within the property limits and site grading for the development of the warehouse and associated infrastructure.

The Permittee has proposed to provide compensatory mitigation for permanent impacts to waters of the state at a ratio of 1.5:1 (mitigation: impact) for impacts to the earthen drainage, sheet flow, and seasonal pool and at a ratio of 1:1 for impacts to the function of 0.17 acre of the concrete brow ditch, which will be replaced by the construction of Line E, through the purchase of 0.41 acres of re-establishment and 0.375 acres of rehabilitation credits at the Riverpark Mitigation Bank for a total of 0.785 acres.

The Project activities would implement Best Management Practices (BMPs) to control and prevent discharges, such as sediment from erosion of soil surfaces and other pollutants that could impact surface waters. The Discharger will implement BMPs as part of the stormwater pollution prevention measures in accordance with appropriate stormwater permit requirements.

Santa Ana Water Board staff are relying on the City of Perris' Initial Study/Mitigated Negative Declaration for compliance with the California Environmental Quality Act (CEQA) and staff have determined that no further environmental review is required for the Project under the CEQA Guidelines.

For further information on the proposed Project, please contact Santa Ana Water Board staff Kyle Fructuoso at Kyle.Fructuoso@waterboards.ca.gov.

RECOMMENDATION:

Adopt Order R8-2024-0005 as presented.

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
SANTA ANA REGION

ORDER R8-2024-0005

WASTE DISCHARGE REQUIREMENTS
FOR
DISCHARGES OF DREDGED OR FILL MATERIALS TO WATERS OF THE STATE
RAMONA INDIAN WAREHOUSE
RIVERSIDE COUNTY

FINDINGS

The Santa Ana Regional Water Quality Control Board (Santa Ana Water Board) hereby finds as follows:

1. This Order prescribes Waste Discharge Requirements (WDRs) for the Ramona Indian Warehouse (Project) of Bombay Partners V Ontario, LLC (Discharger).
2. Receiving waters and groundwater potentially impacted by this Project are protected in accordance with the operative Water Quality Control Plan for the Santa Ana River Basin (Basin Plan) and all other pertinent plans and policies. The Basin Plan includes water quality standards, which consist of existing and potential beneficial uses of waters of the state, water quality objectives to protect those uses, and the state and federal antidegradation policies.
3. The Santa Ana Water Board has the authority to regulate the discharge of dredged and fill materials by prescribing WDRs pursuant to California Water Code section 13263. The Santa Ana Water Board has determined that WDRs are necessary to adequately address the Project's potential impacts on the beneficial uses of waters of the state.
4. This Order is issued in compliance with the State Water Resources Control Board's (State Water Board) *State Policy for Water Quality Control: State Wetland Definition and Procedures for Discharges of Dredged or Fill Material to Waters of the State* (Dredge and Fill Procedures), as revised on April 6, 2021.
5. On October 3, 2023, HELIX Environmental Planning, Inc, on behalf of the Discharger, submitted an Application for Discharges of Dredged or Fill Materials to Waters of the State (Application) for the Project, which was assigned Santa Ana Water Board WDID No. 332023-28.
6. The Application was deemed complete on November 2, 2023.
7. On November 9, 2023, the United States Army Corps of Engineers determined that waters of the United States were not present within the Project boundaries.

Project Description and Discharge Characteristics

8. The Project includes construction of a warehouse building in the northern portion of the City of Perris, near the designated truck route and within the March Air Reserve Base/Inland Port Airport (MARB/IPA) Accident Potential Zone (APZ) II, which will increase employment opportunities and provide development compatible with the MARB/IPA Airport Land Use Compatibility Plan.
9. The warehouse building will be comprised of a rectangular 232,575-square-foot non-refrigerated warehouse building that includes 10,000 square feet of ancillary office space, with 215 parking stalls, 52 trailer parking stalls, and 39 dock positions that will support warehousing, showroom, and office use within a single building. Three vehicle/truck access points will be provided on Indian Avenue, Ramona Expressway, and Perris Boulevard.
10. The warehouse requires separate entrances for commercial trucks and passenger cars. The truck ingress/egress will occur on the truck route off Indian Avenue, and passenger car ingress/egress will occur via the Ramona Expressway. The City of Perris requires the Project to include a slowdown turn lane along Ramona Expressway for an entrance to the facility; this will result in the widening of the Ramona Expressway and the need to remove the existing concrete brow ditch. The brow ditch will be replaced by Line E.
11. Additionally, the Project includes construction of a portion of the Line E flood control facility through an underground pipe that will collect water flows from the southwest corner of the property and connect them to the existing Perris Valley Master Drainage Plan (MDP) Lateral Line E-11 on Perris Boulevard. Line E will alleviate flooding threats to human life and traffic flow on a major transportation corridor in accordance with the MDP. Additionally, a closed piping system to capture storm flows will reduce potential contaminants from surface flows entering the open channel.
12. The construction of a section of Line E on the Project site is required for public safety. Stormwater currently flows on the property and during heavy storms, flooding of the intersection of Perris Boulevard and Ramona Expressway requires the closure of the intersection. Stormwater will be accommodated through an underground water quality basin and the construction of an on-site portion of Line E, which is a part of the City's storm drainage system.
13. As best management practices, the Project includes construction of a 30-inch-diameter lateral pipe that can connect the outlet pipe from the proposed onsite basin to the existing Perris Valley MDP Lateral Line E-11.
14. The Project is located within the City of Perris in Riverside County and encompasses approximately 15.67 acres (33°50'41.8" N, -117°13'45.3" W). The

Project site is located at the intersection of Ramona Expressway and Indian Avenue. Maps showing the Project location are found in Attachment A of this Order.

15. A total of 0.58 acres of waters of the state are present on the Project site, comprising of 0.02 acre of streambed, a 0.39-acre of seasonal pool (520 linear feet), and 0.17 acre of concrete brow ditch.
16. The onsite waters are separated into two portions, two drainages, and a seasonal pool. Drainage one consists of a short earthen bottom (0.008 acre, approximately 47 linear feet) connection from a box culvert under Indian Avenue located in the southwest corner of the property to the concrete brow ditch (0.17 acre, 922 linear feet). Drainage No. two is composed of a short, defined channel (0.002 acre, 23 linear feet) that dissipates into sheet flow (0.01 acre, 55 Linear feet). Drainage No. 2 does not connect to downstream resources. The seasonal pool consists of rainfall and sheet flow formed from the overflow of the existing storm drain. No wetland or vernal pool indicator species were observed.
17. The Project implementation will result in the permanent physical loss of all 0.58 acres (1,567 linear feet), non-wetland waters of the state. The permanent impacts are due to construction of reach of Line E within the property limits and site grading for the proposed warehouse and associated infrastructure.
18. The Project will impact onsite waters and drainages tributaries to the San Jacinto River, Reach 3. San Jacinto River, Reach 3 has the following designated intermittent beneficial uses: Agricultural Supply, Groundwater Recharge, Water Contact Recreation, Non-contact Water Recreation, Warm Freshwater Habitat, Wildlife Habitat. Additionally, the San Jacinto River, Reach 3 has the following designated existing beneficial uses: Rare, Threatened, or Endangered Species.
19. The Permittee has proposed to provide compensatory mitigation for permanent impacts to waters of the state at a ratio of 1.5:1 (mitigation : impact) for impacts to the earthen drainage, sheet flow, and seasonal pool and at a ratio of 1:1 for impacts to the concrete brow ditch, which will be replaced by the construction of Line E, through the purchase of 0.41 acres of re-establishment and 0.375 acres of rehabilitation credits at the Riverpark Mitigation Bank for a total of 0.785 acres.

Regulatory Considerations

20. Pursuant to Water Code section 13263, subdivision (a), which provides that the Santa Ana Water Board may, after any necessary hearing, prescribe requirements (WDRs) as to the nature of any proposed discharge with relation to the conditions existing in the disposal area or receiving waters upon, or into which, the discharge is made or proposed. The WDRs are required to implement any relevant water quality control plans that have been adopted and take into

consideration the beneficial uses to be protected, the water quality objectives reasonably required for that purpose, other waste discharges, the need to prevent nuisance, and the provisions of Water Code section 13241.

21. This Order is adopted pursuant to Water Code section 13267, subdivision (b)(1) which authorizes the Santa Ana Water Board to require technical and monitoring program reports, submitted under penalty of perjury, from persons discharging or proposing to discharge waste within the Santa Ana Region, in connection with the issuance of WDRs. This Order incorporates requirements for water quality monitoring and Project reporting, which are necessary to ensure that the discharge of dredged and fill material complies with WDRs and is protective of water quality. In accordance with Water Code section 13267, the burden, including costs, of generating these reports bears a reasonable relationship to the need for the report and the benefits to be obtained from them.
22. The Santa Ana Water Board has considered the federal and state antidegradation policies (State Water Board Resolution 68-16 and 40 C.F.R. § 131.12) and finds that the discharge permitted under this Order is consistent with those policies. Filling wetlands, riparian areas, headwaters, and other waters causes partial or complete loss of the beneficial uses provided by those waters. This Order requires that impacts to waters of the state be mitigated through avoidance and minimization to the maximum extent practicable and that unavoidable loss of beneficial uses is offset with compensatory mitigation, including the restoration (reestablishment or rehabilitation), establishment (creation), enhancement, and/or preservation of other waters of the state. The mitigation requirements in this Order comply with the State Water Board's Dredge and Fill Procedures.
23. This Order is subject to modification or revocation upon administrative or judicial review, including review and amendment pursuant to Water Code section 13330 and California Code of Regulations, title 23, section 2050 et seq. Additionally, the Santa Ana Water Board reserves the right to suspend, cancel, or modify and reissue this Order, after providing notice to the Discharger, if the Santa Ana Water Board determines that the Project fails to comply with any of the conditions of this Order; or when necessary to implement any new or revised water quality standards and implementation plans adopted or approved pursuant to the Porter-Cologne Water Quality Control Act (Wat. Code, § 13000 et seq.).
24. The provisions of this Order are severable and, if any provision of this Order or the application of any provisions of this Order to any circumstance is held invalid, the application of such provision to other circumstances and the remainder of this Order shall not be affected thereby.

25. A request for modification, revocation and re-issuance, or termination of this Order or a notification of planned changes or anticipated noncompliance does not stay any requirements of this Order.
26. The requirements prescribed herein do not authorize the commission of any act causing injury to the property of another, nor protect the Discharger from liabilities under federal, state, or local laws, nor guarantee the Discharger a capacity right in the receiving waters.
27. This Order does not convey any property rights of any sort, or any exclusive privilege. The ability to discharge waste is a privilege, not a right; nothing in this Order shall create a vested right to continue any discharges authorized herein, which are subject to rescission or modification. (Wat. Code, § 13263, subd. (g).)

CEQA and Public Participation

28. On February 14, 2023, the City of Perris, as the lead agency under the California Environmental Protection Act (CEQA; Public Resources Code, § 21000 et seq.) conducted an Initial Study and adopted a Mitigated Negative Declaration (MND) for the Project (State Clearinghouse 2022070543). The lead agency filed a Notice of Determination with the Riverside County Clerk on February 15, 2023.
29. The Santa Ana Water Board is a responsible agency under CEQA for the purposes of issuing this Order. As a responsible agency, the Santa Ana Water Board is “responsible for considering only the effects of those activities involved in a project which it is required by law to carry out or approve.” (Public Resources Code, § 21002.1, subd. (d).) In approving this Order, the Santa Ana Water Board has considered the MND adopted by the City of Perris and subsequent information provided by the Discharger. More specifically, the Santa Ana Water Board considered those sections of the MND pertaining to impacts to water quality. The Santa Ana Water Board finds that compliance with the mitigation measures of the MND and conditions in this Order will reduce potentially adverse impacts to water quality to a less than significant level and protect beneficial uses of receiving waters.
30. The Santa Ana Water Board, in a public meeting, heard and considered all comments pertaining to the WDRs for the discharge.

REQUIREMENTS

IT IS HEREBY ORDERED, pursuant to Water Code sections 13263 and 13267, that the Discharger shall comply with the following:

A. Discharge Specifications

1. No activities associated with the Project shall cause or threaten to cause a condition of nuisance, contamination or pollution as defined in Water Code section 13050.
2. The groundwater in the vicinity of the Project shall not be degraded resulting from the Project activities or placement of fill materials.
3. The Discharger shall, as applicable, obtain coverage under and comply with the State Water Board's NPDES *General Permit for Storm Water Discharges Associated with Construction and Land Disturbance Activities* (Order 2022-0057-DWQ) and any subsequent amendments (Construction General Permit). If the Project construction activities do not require coverage under the Construction General Permit, the Discharger shall develop and implement a runoff management plan or equivalent construction best management practices (BMP) plan, to prevent the discharge of sediment and other pollutants during construction activities.
4. The Discharger shall comply with the local regulations associated with the Santa Ana Water Board's Municipal Stormwater Permit issued to Riverside County and co-permittees under NPDES No. CAS618033 and WDRs Order R8-2010-0033, and subsequent iterations thereof.
5. If construction dewatering discharges including temporary stream diversions, are necessary to carry out the Project, the Discharger shall enroll and comply with the Santa Ana Water Board Order R8-2020-0006, *General Waste Discharge Requirements for Discharges to Surface Waters that Pose an Insignificant (De Minimis) Threat to Water Quality*.
6. Discharges of fill materials shall be limited to the placement of native fill and "inert waste", as defined in California Code of Regulations, title 27, section 20230. Fill materials other than native soil shall not be discharged as part of the Project.
7. Construction and post-construction best management practices (BMPs) shall be implemented.

B. Discharge Prohibitions

1. Permanent impacts to waters of the state from the Project shall not exceed quantities identified in Finding No. 17.
2. Except as expressly authorized in another WDRs order, waste shall not be discharged in a manner or location other than as described in the Application referenced in Finding No. 5, or the findings herein.
3. Except for authorized fill material discharges to waters of the state, the direct discharge of wastes, including rubbish, refuse, bark, sawdust, or any other solid or liquid wastes, into channels, surface waters, or any place where they would contact or be eventually transported to surface waters, including flood plains, is prohibited.
4. The discharge of oil or other floating materials from any activity in quantities sufficient to cause deleterious bottom deposits, turbidity, or discoloration in surface waters is prohibited.
5. The discharge of silt, sand, clay, or other earthen materials from any activity in quantities sufficient to cause deleterious bottom deposits, turbidity, or discoloration in surface waters is prohibited.
6. Discharges to surface waters of wastes or pollutants that are not authorized by this Order or regulated by a separate permit are prohibited.
7. During the grading and filling operation, there shall be no onsite fueling, lubrication, changing of oil or other equipment fluids and their filters, or any other maintenance or storage of construction equipment within or next to drainage areas or other surface runoff conveyances.

C. Mitigation Requirements

1. Prior to discharging fill materials into waters of the state, the Discharger shall submit to Santa Ana Water Board staff a fully executed purchase agreement of 0.41 acre of re-establishment credits and 0.375 acre of rehabilitation credits from Riverpark Mitigation Bank or another approved mitigation bank by Santa Ana Water Board staff.
2. The Discharger shall retain responsibility for providing compensatory mitigation until the Santa Ana Water Board has received documentation of the fully executed credit purchase.

D. Provisions

1. The Discharger shall maintain a copy of this Order at the Project site so that it is always available to site operating personnel. Key operating personnel shall be familiar with the Order's content.
2. The Discharger shall take all reasonable steps to minimize or prevent any discharge that has a reasonable likelihood of adversely affecting human health and the environment.
3. This Order is not transferable to any person without written approval by the Santa Ana Water Board's Executive Officer. Prior to any change in ownership, the Discharger shall notify the Santa Ana Water Board's Executive Officer in writing at least 30 days in advance. The notice shall include a written transfer agreement between the existing owner and the new owner. At a minimum, the transfer agreement shall contain a specific date for transfer of responsibility for compliance with this Order and an acknowledgment that the new owner or operator is liable for compliance with this Order from the date of transfer. The Santa Ana Water Board may require modification or revocation and reissuance of this Order to change the name of the Discharger and incorporate other requirements as may be necessary under the Water Code.
4. The Discharger shall submit an annual report each year on the anniversary of this Order. Annual reporting shall continue until a *Notice of Project Complete Letter* is issued to the Discharger. The contents of the annual report shall include a construction summary, Project status and schedule (including ground disturbance, site clearing and grubbing, and site construction), and the implementation status of Best Management Practices (BMPs) during the active discharge period. If the Project has not started, the Discharger shall provide an estimated start date and reasons for any expected delays.
5. The Discharger shall submit a *Commencement of Construction Report* at least seven days prior to start of initial ground-breaking activities.
6. The Discharger shall submit a *Request for Notice of Project Complete Letter* when construction and any required post-construction monitoring is complete and no further Project activities will occur. This request shall be submitted to Santa Ana Water Board staff within 30 days following the completion of all Project activities. Upon approval of the request, Santa Ana Water Board staff will issue to the Discharger a *Notice of Project Complete Letter* and prepare a draft order terminating this Order for approval by the Santa Ana Water Board. The *Notice of Project Complete Letter* will end the post-discharge monitoring period, and either the

expiration or Board approval of the termination of this Order will end the associated annual fees.

7. The Discharger shall retain records of all monitoring information, including all calibration and maintenance records, copies of all reports required by this Order, and records of all data used to complete the application for this Order. Records shall be maintained for a minimum of five years from the date of the sample, measurement, report, or application. Records may be maintained electronically. This period may be extended for any unresolved enforcement action or litigation regarding this discharge or when requested by the Santa Ana Water Board.
8. The Discharger shall report any noncompliance that may endanger human health or the environment. Information shall be provided orally to the Santa Ana Water Board office and the Office of Emergency Services within twenty-four (24) hours of when the Discharger becomes aware of the incident. If noncompliance occurs outside of business hours, the Discharger shall leave a message on the Santa Ana Water Board's office voicemail. A written report shall also be provided within five business days of the time when the Discharger becomes aware of the incident. The written report shall contain a description of the noncompliance and its cause, the period of noncompliance, the anticipated time to achieve full compliance, and the steps taken or planned to reduce, eliminate, and prevent recurrence of the noncompliance. All other forms of noncompliance shall be reported with the Discharger's next scheduled Monitoring Report, or earlier if requested by the Executive Officer.
9. Before initiating a new discharge or making a material change in the character, location, or volume of an existing discharge, the Discharger shall report all pertinent information in writing to the Santa Ana Water Board, and if required by the Santa Ana Water Board, obtain revised requirements before any modifications are implemented.
10. The Discharger shall allow the Santa Ana Water Board, or an authorized representative, upon presentation of credentials and other documents as may be required by law to:
 - a. Enter premises where a regulated facility or activity is located or conducted, or where records are kept under the requirements of this Order;
 - b. Access and copy any records that are kept under the requirements of this Order;

- c. Inspect any facility, equipment (including monitoring and control equipment), practices, or operations regulated or required under this Order; and
 - d. Photograph, sample, or monitor for the purpose of assuring compliance with this Order or as otherwise authorized under the pertinent California Water Code.
- 11. This Order becomes effective on the date of adoption by the Santa Ana Water Board.
- 12. This Order will remain valid for five years from the date of its adoption. The Discharger shall file a new dredge and fill application in accordance with California Code of Regulations, title 23, division 3, chapter 9 no later than 180 days in advance of this expiration date. The application, with filing fee, will be discussed between the Discharger and Santa Ana Water Board staff regarding any need for additional information and changes in fees prior to the issuance of new WDRs.

LIST OF ATTACHMENTS

Attachment A—MAPS
Attachment B—REPORTS and NOTIFICATIONS
Attachment C—SIGNATORY REQUIREMENTS

ENFORCEMENT

The Santa Ana Water Board reserves the right to take any enforcement action authorized by law. Accordingly, failure to timely comply with any provisions of this Order may subject the Discharger to enforcement action. Such actions include, but are not limited to, the assessment of administrative civil liability pursuant to Water Code sections 13323, 13268, and 13350, a Time Schedule Order (TSO) issued pursuant to Water Code sections 13300 and 13308, or referral to the California Attorney General for recovery of judicial civil liability. Failure to comply with this Order may result in the assessment of administrative civil liability of up to \$10,000 per violation, per day, depending on the type of violation.

ADMINISTRATIVE REVIEW

Any person aggrieved by this Santa Ana Water Board action may petition the State Water Board for review in accordance with Water Code section 13320 and California Code of Regulations, title 23, section 2050 et seq. To be timely, the petition must be received by the State Water Board by 5:00 pm on the 30th day after the date of this Order; if the 30th day falls on a Saturday, Sunday or state holiday, the petition must be received by the State Water Board by 5:00 pm on the next business day. The law and

regulations applicable to filing petitions are available on the [State Water Board website](http://www.waterboards.ca.gov/public_notices/petitions/water_quality) (http://www.waterboards.ca.gov/public_notices/petitions/water_quality). Copies will also be provided upon request.

ATTACHMENT B—REPORTS AND NOTIFICATIONS

Copies of this Form

To identify your Project, it is necessary to include a copy of the Project-specific Report and Notification Cover Sheet below with your report (see below). Please retain a copy for your records.

Report Submittal Instructions

- 1) Check the box on the *Report and Notification Cover Sheet* next to the report or notification you are submitting.
 - a) Part A (Annual Report): Submitted annually from the anniversary of the Project effective date until a *Notice of Project Complete Letter* is issued.
 - b) Part B (Project Status Notifications): Used to notify the Santa Ana Water Board of the status of the Project schedule that may affect Project billing.
- 2) Sign the *Report and Notification Cover Sheet* and attach all information requested for the Report Type.
- 3) Electronic Report Submittal Instructions:
 - a) Submit signed *Report and Notification Cover Sheet* and required information via email to: RB8-401Reporting@waterboards.ca.gov
 - b) Include in the subject line of the email: Order R8-2024-0005 and Report Type Name

Definition of Reporting Terms

- 1) **Active Discharge Period:** The active discharge period begins with the effective date of this Order and ends on the date that the Discharger receives a *Notice of Completion of Discharges Letter* or, if no post-construction monitoring is required, a *Notice of Project Complete Letter*. The Active Discharge Period includes all elements of the Project, including site construction and restoration, and any Discharger-responsible compensatory mitigation construction.
- 2) **Request for Notice of Completion of Discharges Letter:** This request by the Discharger to the Santa Ana Water Board staff pertains to projects that have post construction monitoring requirements (e.g., if site restoration were required to be monitored for five (5) years following construction). Santa Ana Water Board staff will review the request and send a *Completion of Discharges Letter* to the Discharger upon approval. This letter will initiate the post-discharge monitoring period and a change in fees from the annual active discharge fee to the annual post-discharge monitoring fee.

Definition of Reporting Terms

- 3) **Request for Notice of Project Complete Letter:** This request by the Discharger to the Santa Ana Water Board staff pertains to projects that either have completed post-construction monitoring and achieved performance standards, or have no post-construction monitoring requirements and no further Project activities are planned. Santa Ana Water Board staff will review the request and send a *Project Complete Letter* to the Discharger upon approval. Termination of annual invoicing of fees will correspond with the expiration or termination by Board action of this Order.

Map/Photo Documentation Information

When submitting maps or photos, please use the following formats.

1. Map Format Information:

Preferred map formats of at least 1:24000 (1" = 2000') detail (listed in order of preference):

- **GIS shapefiles:** The shapefiles shall depict the boundaries of all Project areas and extent of aquatic resources impacted. Each shape should be attributed with the extent/type of aquatic resources impacted. Features and boundaries should be accurate to within 33 feet (10 meters). Identify datum/projection used and, if possible, provide map with a North American Datum of 1983 (NAD83) in the California Teale Albers projection in feet.
- **Google KML files** saved from Google Maps: My Maps or Google Earth Pro. Maps shall show the boundaries of all Project areas and extent/type of aquatic resources impacted. Include URL(s) of maps. If this format is used, include a spreadsheet with the object ID and attributed with the extent/type of aquatic resources impacted.
- **Other electronic format** (CAD or illustration format) that provides a context for location (inclusion of landmarks, known structures, geographic coordinates, or USGS DRG or DOQQ). Maps shall show the boundaries of all Project areas and extent/type of aquatic resources impacted. If this format is used, include a spreadsheet with the object ID and attributed with the extent/type of aquatic resources impacted.
- Aquatic resource maps marked on paper **USGS 7.5-minute topographic maps** or **Digital Orthophoto Quarter Quads (DOQQ)** printouts. Maps shall show the boundaries of all Project areas and extent/type of aquatic resources impacted. If this format is used, include a spreadsheet with the object ID and attributed with the extent/type of aquatic resources impacted.

- 2. Photo-Documentation:** Include a unique identifier, date stamp, written description of photo details, and latitude/longitude (in decimal degrees) or map

Map/Photo Documentation Information
indicating location of photo. Successive photos should be taken from the same vantage point to compare pre/post-construction conditions.
