ARCO #5346 is located at 250 Diamond Drive in Lake Elsinore. In December 1998, gasoline impacted soil was discovered in samples collected during fuel dispenser upgrade work. Site assessment work included installation, monitoring, and sampling of over 30 groundwater monitoring wells to delineate the groundwater plume. Remedial efforts included groundwater extraction and treatment, which treated over 4 million gallons of impacted groundwater. In December 2022, the Santa Ana Water Board determined Site conditions met the State Water Resources Control Board's Low Threat Underground Storage Tank Case Closure Policy and issued the 60-day public notification of case closure, followed by a No Further Action determination in June 2023.
