

## **Notice of Section 401 Application Reception**

**File Number:** 362021-08

**Project Name:** Euclid Commerce Center Project

**Date Application Posted:** 8/10/2021

**Received:** 5/07/2021

**Project City:** Chino

**Project County:** San Bernardino

**Applicant Organization:** Euclid Kimball Partners, LP

**Applicant Name:** Brad Boatman

**Waterboard Staff:** MAZ

### **Brief Description of Project:**

**Project Description:** The project purpose is linear transportation (i.e., road improvements and road crossings) to increase site circulation and provide access to the Euclid Commerce Center Development along State Route (SR)-83 as the ultimate improvements for SR-83 have not been improved. The project is a Highway Improvement Agreement (HIA) cooperative project for Caltrans. The existing SR-83 facility located within the City of Chino has been designated in the City of Chino's General Plan as a California Department of Transportation (Caltrans) Facility, Major Arterial (Expressway), 8 lanes, and in the City of Chino's Preserve Specific Plan as a Caltrans Facility, Major Arterial (Expressway), 8 lanes.

**Project Activities:** The limits of proposed work begin approximately 360 feet south of the intersection of Euclid Avenue and Kimball Avenue and extend southerly approximately 1,700 feet. As shown in the enclosed Figure 4 of Attachment A, the proposed activity is the construction of a linear transportation project (i.e., road crossings) to include the grading and reconstruction of NWW-1, the construction of two new culvert road crossings, and modifications to an existing culvert outlet that will provide access from Euclid Avenue to the Euclid Commerce Center. Each culvert road crossing will include a driveway/access road, signal equipment, sidewalk, and utilities. Heavy equipment will be used on site during construction of the proposed project includes excavators, backhoes, and scrapers. Project construction is scheduled to start in June 2021 and will be completed in August 2021 (90 working days). Fill/excavation activities are scheduled to begin in June 2021 and will be completed in July 2021 (30 working days).
