File Number: 332022-32

Project Name: Santa Rosa Mine Road Pipeline Repair Project

Received: 10/27/2022

Date Posted: 11/22/2022

End of 21 Day Public Comment Period: 12/13/2022

Project City: Perris

Project County: Riverside

Applicant Organization: Western Municipal Water District

Applicant Name: Anthony Budicin

Waterboard Staff: TBA

Brief Description of Project:

Project Description: Emergency actions to repair the unexpected, ruptured water main line were taken to maintain service of a publicly owned facility that is essential for public health, safety, and welfare. Additionally, the rupture location adjacent to a public road required immediate action to prevent an emergency from occurring, i.e., possible erosion of a road embankment.

Project Activities: Repair of Western Municipal Water District's (public utility) ruptured 10-inch potable water pipeline. No excavation was required since potable water pipe discharge flow moved all ground covering, exposing pipe that runs perpendicular through the drainage structure, allowing repair to occur once the leak was isolated. The exposed pipe was backfilled with Class II Road base. The estimated project area is 0.0005 acres.
