

## **Notice of Section 401 Application Reception**

**File Number:** 332022-27

**Project Name:** Perris Dam Emergency Release Facility (ERF) Project

**Received:** 10/05/2022

**Date Posted:** 10/11/2022

**End of 21 Day Public Comment Period:** 11/01/2022

**Project City:** Perris

**Project County:** Riverside

**Applicant Organization:** California Department of Water Resources

**Applicant Name:** David Sarkisian

**Waterboard Staff:** TBA

### **Brief Description of Project:**

**Project Description:** The overall project purpose is to modify the current emergency release structure for Perris Dam and to construct a water conveyance facility to reliably and safely control a reservoir release and convey emergency flows (up to the maximum design flow capacity of 3,800 cubic feet per second from Lake Perris to the Perris Valley Channel in the event of an emergency drawdown.

**Project Activities:** The proposed activity, requiring a permit, is to discharge fill in waters of the U.S. and State associated with the construction of the Perris Dam Emergency Release Facility Project (project) to modify the existing emergency release structure for the Perris Dam and to construct a water conveyance facility to connect with the Perris Valley Channel in the event DWR executes an emergency drawdown to drain the reservoir. The proposed activity would consist of levee construction, construction of a conveyance channel, bank stabilization, as well as appurtenant structures.
