Project Name: SR-210/Alder Avenue Interchange Project

Date Posted: 4/28/2022

Received: 4/21/2022

Project City: Rialto

Project County: San Bernardino

Applicant Organization: City of Rialto Public Works Department

Applicant Name: David Hammer

Waterboard Staff: MZ

Brief Description of Project:

Project Description: The City of Rialto (City), in cooperation with the California Department of Transportation (Caltrans) District 8 and the Lewis Management Group, is proposing to improve the existing SR-210/Alder Avenue Interchange located in Rialto, California. The SR-210/Alder Avenue Interchange is a major access point for existing residential and commercial uses. Widening of the eastbound (EB) and westbound (WB) off-ramps and improvements to Alder Avenue will enhance safety and improve operations, remove existing bottlenecks, and accommodate future growth and development.

Project Activities: The project proposes to maintain the existing spread diamond interchange configuration and provide improvements to Alder Avenue and the SR-210 off-ramps through restriping and roadway widening. A new drainage inlet would be provided near the beginning of the retaining wall at the EB off-ramp and would connect to the existing inlet on the west. Existing drainage inlets along Alder Avenue between Sierra Lakes Parkway/Casmalia Street and WB on- and off-ramps would be relocated under new sidewalks and would connect to the existing pipes. Overside drains would also be provided at the left shoulder of WB on- and off-ramps to divert flows from the ramps to new bioswales for treatment and discharge to the existing pipes. In addition, guardrail/end treatments are proposed at the Alder Avenue NB and SB bridge approaches.
