

## **Notice of Intent Application Reception**

**File Number:** 362026-04

**Project Name:** Colton Emergency Road Repair

**Received:** 1/23/2026

**Date Posted:** 1/27/2026

**End of 21 Day Public Comment Period:** 2/16/2026

**Project Location:** 34.022527° N, -117.339434° W

**Project City and County:** Colton, San Bernardino

**Applicant Organization:** Southern California Edison (SCE)

**Applicant Name:** Robert LeMoine

**Waterboard Staff:** TBA

### **Brief Description of Project:**

**Project Description:** The purpose of the project is to restore safe and reliable access for SCE to existing transmission lines and associated critical electrical infrastructure.

**Project Activities:** The proposed work is limited to the minimum necessary to regrade the slope faces and stabilize the crossing so that utility crews can safely traverse the area and perform required infrastructure operations. The proposed emergency work involves re-grading the existing vertical slope faces on both sides of the feature to create a stable transition that allows the success road to safely traverse the area. The Project will maintain the existing flowline elevation to ensure that natural hydrology and drainage patterns are preserved and that no alteration of downstream flow conditions occurs. Throughout construction, appropriate Best Management Practices (BMPs) will be implemented to prevent soil, Sediment, or other materials from entering the feature. These measures will be installed prior to ground disturbance and maintained for the duration of the work to protect water quality and avoid impacts to waters of the U.S. and State.
