**Project Name:** Victorville-Century Line1 Tower 205-4 Stabilization & Access Road Emergency Repair

**Received:** 1/29/2026

**Date Posted:** 2/06/2026

**End of 21 Day Public Comment Period:** 2/26/2026

**Project Location:** 34.285507° N, -117.473217° W

**Project City and County:** Near Lytle Creek, San Bernardino

**Applicant Organization:** Los Angeles Department of Water and Power

**Applicant Name:** Katherine Rubin

**Waterboard Staff:** TBA

### **Brief Description of Project:**

Project Description: Due to recent storms & their erosion impacts, approximately 200 feet of the 1,100 feet of service road leading to tower 205-4 L 1 and the ground surrounding the transmission tower have become unstable, affecting access and long-term support of the structure. The purpose of this project is to stabilize the eroded areas, protect the transmission tower foundation, and begin to restore safe and reliable access for inspection, maintenance, and continued operation of the VIC-CEN line through the area.

Project Activities: Work will include stabilization of the eroded service road and adjacent areas, re-grading as necessary, and implementation of erosion control and drainage measures to protect the tower foundation and restore safe access. Construction activities will utilize standard equipment such as loaders and excavators. No material removal or off-site hauling is anticipated as part of this work.
