

**Amendment to the Santa Ana Region Basin Plan – Resolution No. R8-2017-0014
Response to Comments received by State Water Resources Control Board**

Response to Comments

Chris Crompton

Water Quality Compliance Manager,
Orange County Public Works
Letter dated September 7, 2018

Comment: The County encourages State Board adoption of this BPA [Selenium TMDLs Basin Plan Amendment], as, due in large part to being a product of significant stakeholder engagement, the BPA presents an improvement to existing regulations concerning Selenium for the freshwater portions of the Newport Bay Watershed.

Response:

Water Board staff appreciate Orange County's support for this BPA and acknowledge the significant contributions that the County, the Nitrogen and Selenium Management Program (NSMP) Funding Partner agencies, and other stakeholders have made to assist Regional Board staff in completing this project.
