From: Rita Mines Evans Cannabis Cultivator  
To: State Water Board

I am writing this letter in response to receiving your letter for public comment. I have spent enormous amounts of money, time, effort and hard manual work into getting my property compliant for the regional water board order.

Engineering has been done. I have been working at it non-stop for almost 3 years. I have another fix to a culvert. Plus one more culvert to put in, along with a minor drainage pool fix. That is what Fish and Wildlife, Stormer, from the State water board, and my engineer agreed to when on my property last month.

So I am begging you to Grandfather my property into the state water board resource plan, PLEASE! It will destroy the small farmer if not. I feel people who put everything into compliance early should not be punished. No one will fix their problems and the environment will suffer. Not a positive result.

Sincerely,

Rita Mines Evans
