Subject: Cannabis Policy and Staff Report

Hello,

I sat in today's meeting so here are some questions that came to my mind.

If money is not being provided to enforcement based on the fees collected where will the money come from?

Who will be doing the enforcement? Will it be the local county and cities? Code enforcement? State? How often will cultivators be inspected for compliance?

Are any regulations being set for sustainability? Recycling water? Etc. At least maybe some kind of percentage.

Water is very important so where will this water come from?

Will they be billed on usage?

Are the local water utilities involved in this?

How steep will penalties be?

Will you receive a warning letter first and have a compliance date?

How is the water resources board providing notification to individuals?

Can waste tire filtration systems be used in any way for engineering growth of filtration systems

Can it be mandated for new roadways that roads have to use a percentage of rubberized asphalt (RAC)

I hope that California takes a stand and mandates recycling efforts.

Thank you. I found this meeting to be very interesting.
