The State Water Board may certify the EIR and adopt the General Order at the end of this meeting. Details of the meeting are provided below.

**BACKGROUND**

The State Water Board is preparing a General Order for composting operations. The General Order will be used by the Regional Water Quality Control Boards (Regional Water Boards) to streamline permitting and protect water quality. The General Order includes conditions that address appropriate water quality protection measures at existing and proposed composting operations.

The project may have significant effects on agriculture, air quality, biological resources, cultural resources, energy, geology and soils, greenhouse gases, hazards and hazardous materials, hydrology and water quality, noise, transportation, and utilities. The draft EIR analyzes potential impacts associated with the adoption of the proposed General Order and reasonably attempts to identify potential mitigation measures to address any identified significant impacts.
