**To:** Frevert, Kathy@Waterboards  
**Subject:** Comments on Proposed Regulatory Framework

Kathy:

Keep up the good work. Water is a scarce resource and we should ALL conserve. Some people have considered water like oil -- its unlimited and its use has no effect on our environment and our future. Those people could not be more wrong. Those are the same people that think dinosaurs never existed.

Everyone (every community) must do its job to protect our natural resources.

This letter was written after I received something from our city...

Please..... keep protect our future.
