The General Order can be accessed at [the Clean Water Act Section 401 - Certification and Wetlands Program, General Orders webpage](https://www.waterboards.ca.gov/water_issues/programs/cwa401/generalorders.html)

([https://www.waterboards.ca.gov/water\\_issues/programs/cwa401/generalorders.html](https://www.waterboards.ca.gov/water_issues/programs/cwa401/generalorders.html)).

On September 3, 2019, the State Water Board received a complete Notice of Intent (NOI) requesting authorization for the Applicant's TD1367680 Latigo-Potrero 66kV Subtransmission (Lake Eleanor Creek) Deteriorated Pole Replacement Project (Project). After reviewing the NOI, the State Water Board has determined that the Project meets General Order requirements for Nationwide Permit 12: Utility Line Activities.

## **II. Project Purpose**

As described in the Project NOI and supplemental information (hereafter referred to as the Application), which is incorporated herein by reference, the purpose of the Project is to replace three existing deteriorated wood poles and associated anchors with in-kind wood poles and anchors at approximately the same location (within 5 feet of existing wood poles).

## **III. Project Location**

The Project is located on the Latigo-Potrero 66kV Subtransmission Line within the Lake Eleanor Open Space and is adjacent to Westlake Boulevard Route 23 between East Potrero Boulevard and Sycamore Canyon Drive, in Thousand Oaks, Ventura County, California. The Project coordinates are 34.130225°N, -118.855333°W.

## **IV. Receiving Waters Information**

The Project is located within the jurisdiction of the Los Angeles Regional Water Quality Control Board. Receiving waters and groundwater potentially impacted by this Project are listed in Table 1. These waters are regulated in accordance with the applicable water quality control plan (Basin Plan) for the region and other plans and policies of the California Water Boards, which may be accessed online at [the State Water Boards' Plans and Policies webpage](http://www.waterboards.ca.gov/plans_policies/) ([http://www.waterboards.ca.gov/plans\\_policies/](http://www.waterboards.ca.gov/plans_policies/)).

**VI. Description of Indirect Impacts to Waters of the State**

The State Water Board recognizes the potential for indirect impacts to waters of the state associated with the Project. Potential indirect adverse effects include but are not limited to: increased sediment loading to streams from riparian and/or upland areas used for access or staging areas, possibility of introducing invasive species into the

<sup>1</sup> Includes only temporary direct impacts to waters of the state and does not include upland areas of temporary disturbance which could result in a discharge to waters of the state. Temporary impacts, by definition, are restored to pre-project conditions and therefore do not include a physical loss of area or degradation of ecological condition.

Project areas, and changing timing of runoff delivery to streams in the Project area. The Project, as designed, will not have significant indirect impacts to waters of the state.

## **VII. Avoidance and Minimization**

In order to avoid and minimize impacts to waters of the state and their designated beneficial uses, the Applicant will follow the avoidance and minimization measures as proposed in their Application.

## **VIII. Mitigation for Temporary Impacts**

All temporarily affected areas will be restored to pre-construction contours and conditions upon completion of construction activities in compliance with the General Order and according to the restoration plan submitted by the Applicant in the Application.

## **IX. California Environmental Quality Act (CEQA)**

The State Water Board has determined that the Project is exempt from review under the California Environmental Quality Act (CEQA) pursuant to California Code of Regulations, title 14, section 15301. Additionally, the State Water Board finds that no exceptions to the exemptions apply to the activities approved by this NOA.
