“October 1, 2010 Quarterly Update”

I. Introduction

This report addresses violations of Waste Discharge Requirements (WDRs) for discharges to surface water during calendar year 2009. Discharges to surface water are issued a combined WDR/NPDES permit. This report updates the tables and figures presented in the Annual 13385 (o) report with data populated in CIWQS and SMARTS II as of October 2, 2010.

The [NPDES Permit Program](#) controls water pollution by regulating point sources that discharge pollutants into waters of the United States. Point sources are discrete conveyances such as pipes or man-made ditches. Typical point source discharges include discharges from: municipalities or publicly owned treatment works (POTWs), industrial facilities, and urban areas regulated under the Storm Water Program. The NPDES program is delegated to the State Water Board in accordance with the United States Environmental Protection Agency's approval, and is implemented through Chapter 5.5 of the California Water Code.

The State and Regional Water Boards administer the NPDES program. The nine Regional Water Boards lie within different watersheds and are as follows (see [Appendix A](#) for map and details):

- Region 1 – [North Coast Regional Water Board](#)
- Region 2 – [San Francisco Bay Regional Water Board](#)
- Region 3 – [Central Coast Regional Water Board](#)
- Region 4 – [Los Angeles Regional Water Board](#)
- Region 5 – [Central Valley Regional Water Board](#) (With Offices in Redding [5R], Sacramento [5S] and Fresno [5F])
- Region 6 – [Lahontan Regional Water Board](#) (With offices in South Lake Tahoe [6A] and Victorville [6B])
- Region 7 – [Colorado River Basin Regional Water Board](#)
- Region 8 – [Santa Ana Regional Water Board](#)
- Region 9 – [San Diego Regional Water Board](#)

California Water Code, Chapter 5.5 implements provisions of the federal Water Pollution Control Act and establishes a regulatory program for discharges to surface water. This report summarizes information regarding violations of waste discharge requirements to surface waters pursuant to Water Code, Chapter 5.5, Section 13385(o), and enforcement actions taken by the State and Regional Water Quality Control Boards (Water Boards) in response to those violations.

“October 1, 2010 Quarterly Update”

[California Water Code Section 13385\(o\)](#)

The state board shall continuously report and update information on its Internet Web site, but at a minimum, annually on or before January 1, regarding its enforcement activities. The information shall include all of the following:

(1) A compilation of the number of violations of waste discharge requirements in the previous calendar year, including stormwater enforcement violations.

(2) A record of the formal and informal compliance and enforcement actions taken for each violation, including stormwater enforcement actions.

(3) An analysis of the effectiveness of current enforcement policies, including mandatory minimum penalties.

This is the third quarterly update of the 2009 13385(o) report to meet the requirements to continuously report and update the information. This report and the supporting metadata are available at the [Water Board's Internet Web site](#).

The Water Boards use the [California Integrated Water Quality System](#) (CIWQS) database to track violations and the resulting enforcement actions. The CIWQS database contains information on violations and enforcement actions that have occurred since July 1, 1999. On September 21, 2009 NPDES Stormwater data was migrated from CIWQS to a new stormwater database named SMARTS II.

Most of the tables in this report are available for continuous public use through the State Water Board's Internet site. Use of live, [public reports](#) allows the public access to violation and enforcement data from all dischargers regulated by the Water Boards, and gives the user control over how to sort and filter this data to meet specific information needs. These public reports can be found on the Water Board's Web site at: http://www.waterboards.ca.gov/water_issues/programs/ciwqs/publicreports.shtml.

“October 1, 2010 Quarterly Update”**II. Violations of Waste Discharge Requirements**

This section presents a compilation of the number of violations of waste discharge requirements in the previous year.

NPDES Wastewater

Wastewater facilities discussed in this report are those facilities that are permitted to discharge pollutants to surface waters and include sewage treatment plants, food processors, oil refineries, power plant cooling waters, pulp and paper mills, mining operations, fish hatcheries, etc. During this reporting period, there were 1,898 active wastewater facilities regulated by [NPDES](#) waste discharge requirements in California. These facilities are divided into two categories:

- Major facilities – Facilities with an average daily discharge greater than 1 million gallons per day or those that pose a high degree of threat to water quality;
- Minor facilities – Facilities with an average daily flow less than 1 million gallons per day and that have a lower threat to water quality.

The waste discharge requirements (“NPDES permits” or “permits”) are issued as individual permits or as general permits. Dischargers eligible for coverage under a general permit must enroll and agree to comply with the conditions of the general permit. A summary of active NPDES facilities by category and Regional Water Board is shown in Table 1.

Table 1: NPDES Wastewater Permits by Category and Regional Office

Regional Offices	Minor Facilities			Total
	Major Facilities Individual Permits	General Permit Enrollees	Individual Permits	
1	15	13	31	59
2	55	187	31	273
3	23	68	16	107

5S	37	113	53	203
6	3	15	11	29
6A	1	7	6	14
6B	2	8	5	15
7	8	40	18	66
8	21	323	12	356
9	40	78	17	135
Total	266	1,307	334	1,907

“October 1, 2010 Quarterly Update”

Table 2 lists the total number of violations of NPDES permits by Regional Water Board office for each of the past nine years. The table shows a generally consistent number of violations statewide although this does not track for all of the Regional Water Board offices. The increase in the number of violations from the year 2003 is in part explained by increased diligence in recording violations. Data for 2009 is still incomplete since monitoring reports are still being reviewed by the regional boards.

Table 2: Number of Violations of NPDES Wastewater Permits 2000 to 2010

Regional Office:											1Q+2Q
	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010

6B	5	10	21	25	22	13	119	50	62	42	24
7	148	207	229	334	176	194	276	307	316	175	193
8	460	304	201	111	222	243	163	135	156	54	59
9	557	221	160	256	652	219	372	418	218	69	29
Total	6,665	5,791	5,853	6,044	6,546	6,567	7,404	6,548	6,667	5,793	3,336

Table 3 provides a comparison of the average number of violations per facility in violation.

“October 1, 2010 Quarterly Update”**Table 3: Number of Violations per Wastewater Facility for 2009**

Regional Office	NPDES Facilities	Facilities with 1-25 violations during 2009	Facilities with more than 25 violations during 2009	Total Violations	Average Number of Violations per facility in violation
1	59	23	2	165	6.60
2	273	39	2	180	4.39
3	107	18	3	147	7.00
4	542	228	11	1,865	7.80
5F	48	13	2	126	8.40
5R	89	20	2	123	5.59
5S	203	90	27	2,742	23.44
6A	14	6	2	105	13.13
6B	15	6	1	42	6.00
7	66	14	2	175	10.94
8	356	40	1	54	1.32
9	135	7	2	69	7.67
Total	1,907	504	57	5,793	Average: 8.52

The data in Table 3 indicate an uneven distribution of the average number of violations per facility among the different Regional Water Board offices. The reasons for this variability include differences in facility-specific requirements, differences in Regional Water Board office processes, the priority assigned to report review and data entry, and the differences in rates of compliance among dischargers.

A breakdown of the violation types and the number of violations identified as priority violations is presented in Table 4. A more detailed description of each violation category is provided in [Appendix B](#). Violations vary from not submitting monitoring reports on time to acute toxicity violations. The Water Boards identify priority violations based on criteria identified in the [Water Quality Enforcement Policy](#)¹. A priority violation represents a greater threat to water quality than other violations. Fifty eight percent of NPDES wastewater violations have been identified as priority violations.

It is important to note that the term “priority” violation used in this context is different than “serious” violations discussed in the following section on mandatory minimum penalties. The term “serious” violation is defined in sections 13385(h) and 13385.1 of the California Water Code. All “serious” violations are considered priority violations, but not all priority violations are “serious” violations.

Total	2,552	3,241	5,793	100%

“October 1, 2010 Quarterly Update”

NPDES Stormwater

The [Stormwater Program](#) has five categories of dischargers subject to the federal Stormwater permit requirements. At the time of this report, nearly 25,000 facilities or permittees are regulated by NPDES stormwater permits in California. Below is a brief description of the five categories:

- **Industrial Activities** – The Industrial Storm Water General Permit Order 97-03-DWQ ([General Industrial Permit](#)) is an NPDES permit that regulates discharges associated with 10 broad categories of industrial activities other than construction. In general, discharges from manufacturing, transportation, and recycling facilities are subject to this permit.
- **Construction Activities** – Dischargers whose projects disturb one or more acres of soil or are part of a larger common plan of development or sale are required to obtain coverage under the General Permit for Discharges of Storm Water Associated with Construction Activity ([Construction General Permit - CGP - Order No. 99-08-DWQ](#)). Construction activity subject to this permit includes clearing, grading and disturbances to the ground such as stockpiling, or excavation, but does not include regular maintenance activities performed to restore the original line, grade or capacity of the facility. Typical CGP permit coverage lasts about 1 year, so this permit program sees a lot of turnover. Because construction activities are temporary and the most prevalent pollutant problem is sediment discharges, the State Water Board has adopted this permit separate from the General Industrial Permit,.
- **Linear Stormwater Facilities** –Underground/Overhead Projects disturbing at least 1 acre but less than 5 acres (including trenching and staging areas) are covered by the Statewide General Permit for Storm Water Discharges Associated with Construction Activity from Small Linear Underground/Overhead Projects ([Small LUP General Permit](#))
- **Municipal Stormwater Phase I Facilities** – The Municipal Storm Water Permits regulate storm water discharges from municipal separate storm sewer systems (MS4s). Under [Phase I](#), which began in 1990, the Regional Water Boards have issued NPDES MS4 permits to permittees serving populations greater than 100,000 people. Many of these permits are issued to a group of co-permittees encompassing an entire metropolitan area.
- **Municipal Stormwater Phase II Facilities** – Under [Phase II](#), the State Water Board adopted a General Permit for the Discharge of Storm Water from Small MS4s (WQ Order No. 2003-0005-DWQ) to provide permit coverage for smaller municipalities (10,000 to 100,000 people), including non-traditional small MS4s which are governmental facilities such as military bases, public campuses, prisons and hospital complexes.

Stormwater permits are generally issued as individual permits to the Phase 1 MS4s and as general permits to the other categories. Dischargers eligible for coverage under a general permit must enroll and agree to comply with the conditions of the general permit.

“October 1, 2010 Quarterly Update”

Table 5 shows active NPDES stormwater facilities by category and Regional Board.

Table 5: NPDES Stormwater Permittees by Permit Type and Regional Office

Regional Offices	Construction	Industrial	Municipal	Total
1	142	353	21	516
2	686	1,340	105	2,131

Total	1,528	2,550	2,615	1,819	2,140	2,156	1,616	1,765	2,454	1,831	711

“October 1, 2010 Quarterly Update”

A breakdown of the construction and industrial stormwater violations by violation type is shown in Table 7. Approximately, 10 percent of NPDES stormwater violations in 2009 have been identified as priority violations.

Table 7: NPDES Stormwater Violations by Category for 2009

Description of Violation Category (See Appendix B)	Non-Priority Violations	Priority Violations	Total	% of Total
Reporting	764	101	865	47%
Deficient BMP Implementation	663	23	686	37%
Incomplete/Insufficient SWPPP	109	10	119	6%
Unauthorized Discharge	56	3	59	3%
Other Requirement	70	2	72	4%
Failure to Pay Fees	4	0	4	0%
Monitoring	5	6	11	1%
Hydro Modification	0	0	0	0%
Groundwater	0	0	0	0%
Category 2 Pollutant	0	0	0	0%
Category 1 Pollutant	3	12	15	1%
Sanitary Sewer Overflow	0	0	0	0%
Total	1,674	157	1,831	100%

Most of the violations documented in the stormwater program are reporting violations. Most violations, other than reporting, in the stormwater program are discovered through site inspections. Ensuring compliance with stormwater NPDES permit requirements for the nearly 16,000 permitted stormwater activities require a large field presence.

“October 1, 2010 Quarterly Update”**Compliance and Enforcement at Federal Facilities**

Federal facilities include facilities owned or operated by the federal government. These include national parks, Department of Energy facilities, Department of Defense (DOD) facilities, etc. DOD facilities fall under one of the following three categories:

- Active bases where the military currently conducts operations,
- Base Realignment and Closure (BRAC) installations which are being cleaned up and prepared for transfer to communities and to other federal, state, and local agencies, and
- Formerly Used Defense Sites (FUDS) which are properties that DOD once owned, operated or leased.

Table 8: Federal Facilities Regulated Under the NPDES Program by Region

“October 1, 2010 Quarterly Update”**III. Summary of Enforcement Actions Taken for Violations**

This section presents information on formal and informal compliance and enforcement actions taken for each violation.

NPDES Wastewater

Enforcement actions taken in response to violations include both informal and formal actions. An informal enforcement action is any enforcement action taken by Water Board staff that is not defined in statute, such as staff letters and notices of violation. Formal enforcement actions are statutorily recognized actions to address a violation or threatened violation such as Cleanup and Abatement Orders. [Appendix C](#) describes the enforcement options used by the Water Boards.

Total	7,404	5,316	↓ 72%	6,548	4,594	↓ 70%	6,667	4,146	↓ 62%	5,793	3,422	↓ 59%

More than 90% of violations with completed enforcement

Between 80% and 90% of violations with completed enforcement

Less than 80% of violations with completed enforcement

Table 9 shows the number of violations recorded from 2006 to 2009. It also lists the number of violations for which there is a completed enforcement action entered in CIWQS (enforcement is still pending for some, but not all, of these violations). The percentages at the bottom of the table show each violation category as a percentage of the total number of violations and the percentage of violations linked to an enforcement action. While the Water Boards' enforcement authorities are significant, resource levels generally preclude enforcement against every violation. The appropriate level of enforcement response is described in the Water Board's [enforcement policy](#).

“October 1, 2010 Quarterly Update”

As noted, there can be a significant lag in the time between the discovery and reporting of a violation, and the resulting enforcement action. This is due to available staffing and the time it takes to pursue enforcement, particularly for complex enforcement cases. Also, minor violations may be resolved before enforcement is taken. As a result, the percentage of violations where enforcement has been taken is lower for more recent violations, and tends to increase as time goes by and additional actions are taken for past violations. The data for 2009 will likely change significantly since not all violations have yet been recorded for 2009.

NPDES Stormwater

Table 10 show the number of stormwater violations for the last four years. It also lists the number of stormwater violations addressed by enforcement actions. The percentages at the bottom of the table show the total number of violations receiving enforcement as a percent of the total number of violations.

More than 90% of violations with completed enforcement

Between 80% and 90% of violations with completed enforcement

Less than 80% of violations with completed enforcement

Data from SMARTS II.

Table 10 shows a very high enforcement response rate, much higher than in Table 9 for wastewater. This is due in part to the fact that these violations are often entered into the database at the same time the enforcement action is entered into the database.

“October 1, 2010 Quarterly Update”**IV. Mandatory Minimum Penalties (MMPs) Update*****Summary of MMP Violations and MMP Enforcement Actions***

According to the CIWQS database, 26,405 violations subject to mandatory minimum penalties occurred between January 1, 2000 and September 30, 2010. Of these, 23,299 (88 percent) are recorded as having received a minimum or greater penalty. Some portion of the reported effluent violations may qualify for statutory exemptions.

Table 11 shows the number of violations that have been identified by each Regional Water Board office by violation type. [Appendix D](#) provides a list of every facility with violations subject to mandatory minimum penalties.

Table 11: Violations Subject to MMPs by Violation Type from January 2000 to September 2010

Regional Offices	Effluent		Reporting Serious MMPs	Total
	Chronic MMPs	Serious MMPs		
1	969	665	141	1,775
2	1,002	874	1	1,877

Total	14,255	9,504	2,646	26,405

“October 1, 2010 Quarterly Update”

Figure 1 shows MMP violations since 2000 by violation type. We see a variation through the years. There is significant increase in the count of violations in 2006 due to the greater emphasis on documentation of serious violations for late reports, especially within the Los Angeles Regional Water Board as a result of implementation of the statewide initiative for MMP enforcement. MMPs for late reports began in 2004 with the addition of section 13385.1.

Figure 1: NPDES Wastewater MMP Violations 2000-2010

* Data for 2010 is incomplete.

"October 1, 2010 Quarterly Update"

Table 12 shows the number of violations that are being addressed through the enforcement process by Regional Water Board office.

Table 12: Status of Violations Subject to MMPs from January 2000 to September 2010

Regional Offices	MMPs Addressed with Administrative Civil Liability (1)	MMPs Resolved with Court Order	MMPs Addressed with Expedited Payment Offer (2)	Violations without Completed MMP Enforcement	% Without	Total
1	1,548	0	13	214	12%	1,775
2	1,488	0	102	287	15%	1,877
3	719	22	38	196	20%	975
4	3,332	3,073	1,950	862	9%	9,217
5F	1,355	0	0	61	4%	1,416

7	936	0	0	199	18%	1,135
8	1,044	0	0	11	1%	1,055
9	839	28	0	6	1%	873
Total	18,066	3,130	2,103	3,106	12%	26,405

(1) MMP Addressed with ACL" which includes both pending ACL activities triggered by a complaint and completed ACL activities resolved with an ACL order or settlement.

(2) Expedited payment offer issued under the 2008 MMP initiative. The term "addressed" means that some action has been initiated regarding the MMP violation, not that the violation has been resolved.

Table 13 lists the number of facilities in each Regional Water Board office that have one or more MMP violations, the number of facilities for which MMPs have been issued for all MMP violations, and the number of facilities that would require at least one enforcement action to cover any outstanding MMP violations. As shown, 272 or more enforcement actions would be necessary to cover the 3,106 violations remaining subject to MMPs. This is a significant improvement from the 491 actions needed at the beginning of calendar year 2008.

“October 1, 2010 Quarterly Update”**Table 13: Facilities with MMP Violations and Pending Enforcement Actions
January 2000 to September 2010**

Regional Offices	Facilities with all MMP penalties issued	Facilities with pending MMP penalties	Total
1	14	21	35
2	38	41	79
3	17	15	32
4	204	89	293
5F	17	5	22
5R	8	11	19
5S	55	59	114
6A	0	1	1
6B	1	2	3
7	1	20	21
8	13	5	18
9	20	3	23
Total	388	272	660

Figure 2 displays the distribution of facilities by the number of MMP violations with and without completed enforcement. The numbers indicate that of the 678 facilities that incurred in MMP violations, 373 or 55% have incurred ten or fewer MMP violations, and 107 facilities or 16% have more than fifty MMP violations each. Figure 2 also reveals that the percentage of facilities with all MMPs addressed varies depending on the number of MMP violations per facility.

Figure 2: Distribution of Facilities by Number of MMP Violations

“October 1, 2010 Quarterly Update”***Enforcement of Mandatory Minimum Penalties on Effluent Violations***

Early trends in MMP violations indicated an overall reduction in the number of violations at NPDES facilities. We believed that the reduction was partly a result of increased compliance due to the deterrent effect of MMPs. Data for 2003 and 2004 showed an increase in violations, but we believe this is partly due to an increased emphasis on recording and collecting these mandatory penalties. Additionally, the introduction of MMPs for reporting violations in 2004 put a greater emphasis on reviewing and tracking all such reports. The Regional Water Boards generally prioritize MMP issuance to facilities with greater compliance problems because of the staff costs associated with issuing ACLs. While MMPs were intended to be a streamlined process for penalty issuance, these penalties are often challenged by dischargers and can consume as much staff time as an ordinary ACL complaint assessing discretionary penalties.

Figure 3: NPDES Wastewater MMP Effluent Violations 2000-2010 by Enforcement Type

“October 1, 2010 Quarterly Update”

Enforcement of Mandatory Minimum Penalties on Serious Late Reporting Violations

Prompt and complete submission of self monitoring reports is a priority for the Water Boards because monitoring reports are the main instrument to ensure compliance with effluent limits and monitoring requirements in NPDES permits.

Compliance rates for reporting violations vary significantly among regions and type of dischargers. Typically, most major dischargers submit their monitoring reports on time.

Figure 4 displays the distribution and number of reporting violations over time and with the level of enforcement received.

Figure 4: NPDES Wastewater Late Report Serious Violations 2004-2010 with Level of Enforcement Received

“October 1, 2010 Quarterly Update”**Compliance Rates for Major Facilities**

A key performance measure for the Water Board’s enforcement program is the compliance rate with requirements. Of special significance, because of their threat to water quality is the compliance rate for NPDES Wastewater Major Facilities. Figure 5 shows that compliance rates among Major NPDES wastewater facilities are improving overtime. Not only has the total number of Major facilities with violations recorded been reduced but the number of facilities with more than 25 violations during the year has seen a significant reduction, going from 31 in the year 2000 to only 14 in 2007 and 21 in 2009. Figure 5 displays the distribution of the number of NPDES major facilities with no violations, the number of major facilities with one to 10 violations, the number of major facilities with 11 to 25 violations and the number of major facilities with more than 25 violations.

Figure 5: Number of NPDES Wastewater Major Facilities 2000-2009. Compliance Rates

Appendix B: Listing and Description of Violation Types Used in the CIWQS Data System

Category 1 pollutant – Category 1 pollutants as defined by USEPA include:

<u>Oxygen Demand</u> Biochemical Oxygen Demand Chemical Oxygen Demands Total Organic Carbon Other	<u>Detergents and Oils</u> MBAS NTA Oil and Grease Other detergents or algaecides
<u>Solids</u> Total Suspended Solids (Residues) Total Dissolved Solids (Residues) Other	<u>Minerals</u> Calcium, Chloride, Fluoride, Magnesium, Sodium, Potassium, Sulfur, Sulfate, Total Alkalinity, Total Hardness, Other Minerals
<u>Nutrients</u> Inorganic Phosphorus Compounds Inorganic Nitrogen Compounds Other	<u>Metals</u> Aluminum, Cobalt, Iron, Vanadium

Category 2 pollutant – Category 2 pollutants as defined by USEPA:

Metals (all forms) - Other metals not specifically listed under Group I

Inorganics - Cyanide, Total Residual Chlorine

Organics - All organics are Group II except those specifically listed under Group I.

Other effluent violation – Any violation of an effluent requirement not cover under Category 1 or Category 2.

Chronic Toxicity – Violation of a chronic toxicity effluent requirement.

Acute Toxicity – Violation of an acute toxicity effluent requirement.

Violation of Non-effluent Permit Condition – Violation of any permit condition not pertaining to effluent requirements.

Reporting – Late report, failure to submit a report, or a report that is either not complete or contains errors.

Monitoring – Failure to conduct required monitoring

Compliance schedule – Failure to comply with a compliance schedule in a permit. This does not include schedules in an enforcement order likes a Cease & Desist and Time Schedule Orders.

Sanitary Sewer Overflow – Any spill from a sanitary sewer collection system or pump station.

Unauthorized Discharge – Any discharge other than allowed by WDRs that is not a sanitary sewer overflow.

Unregulated Discharge – Discharge from a site not currently under WDRs.

Groundwater – Any release to groundwater that violates permit conditions or basin plan prohibitions.

BMP – Failure to implement proper best management practices.

SWPPP – Failure to complete or update a stormwater pollution prevention plan.

Failure to obtain permit – Failure to obtain the appropriate permit prior to discharge or regulated activity.

Other Codes – Violations of codes sections other that the California Water Code.

Enforcement Action – Failure to comply with a previous enforcement order by not meeting its requirements, its time schedule, or failure to pay penalties.

Basin Plan Prohibition – Violation of any basin plan prohibition.

Appendix C: Types and Classification of Enforcement Actions

Type of Enforcement Action	Description	Classification
Expedited Payment Offer	A conditional offer that provides a discharger with an opportunity to resolve any outstanding violations subject to mandatory minimum penalties by acknowledging them and providing full payment of the accrued mandatory penalties identified in the payment letter	Informal
Verbal Communication	Any communication regarding the violation that takes place in person or by telephone.	Informal
Staff Enforcement Letter	Any written communication regarding violations and possible enforcement actions that is signed at the staff level.	Informal
Notice of Violation	A letter officially notifying a discharger of a violation and the possible enforcement actions, penalties, and liabilities that may result. This letter is signed by the Executive Officer.	Informal
Notice to Comply	Issuance of a Notice to Comply per Water Code Section 13399.	Formal
13267 Order	A letter utilizing Water Code Section 13267 authority to require further information or studies.	Formal
Clean-up and Abatement Order	Any order pursuant to Water Code Section 13304.	Formal
Cease and Desist Order	Any order pursuant to Water Codes Sections 13301-13303.	Formal
Time Schedule Order	Any order pursuant to Water Code Section 13300.	Formal
Administrative Civil Liability (ACL) Complaint	ACL Complaint issued by the Executive Officer.	Formal
Administrative Civil Liability (ACL) Order	An ACL Order that has been imposed by the Water Board or SWRCB.	Formal
Settlement	A settlement agreement per California Government Code Section 11415.6.	Formal
Referral	Referral to the District Attorney, Attorney General, or USEPA.	Formal
Referred to a Task Force	Any referral of a violation to an environmental crimes task force.	Formal
Referral to Other Agency	Any referral to another State Agency.	Formal
Third Party Action	An enforcement action taken by a non-governmental third party and to which the State or Water Board is a party.	Formal
Waste Discharge Requirements	Any modification or rescission of Waste Discharge Requirements in response to a violation.	Formal
