2017 CLEANUP AND ABATEMENT PROJECTS**

SWRCB DIVISION OR REGION	PROJECT TITLE	FUNDING TYPE	PROJECT DESCRIPTION	AMOUNT APPROVED	APPROVED DATE
REGION 6	Alpine Watershed	Regular CAA	Hope Valley Restoration & Aquatic Habitat Enhancement Project. Project is a planning study that will support the stabilization of over 800 feet of eroding banks along the West Fork of the Carson River, and help improve aquatic habitat along nearly 1/2 mile of river at four specific sites.	\$118,550.00	7/11/2017
REGION 6	Truckee Watershed	Regular CAA	The Squaw Creek Restoration (SCR) Project would reduce sediment and improve both water quality and terrestrial wildlife habitat throughout a 150 montane wet meadow complex, along 1.8 miles of Squaw Creek. The Project would also help achieve the Squaw Creek and Truckee River TMDL water quality objectives for sediment and enhance native fisheries habitat.	\$235,638.00	10/26/2017
REGION 1	North Bay Fire Response - Hydromulch Phase 1	Fire Response	Project will be used to stabilize cut slopes along city roads in the steep Fountain Grove area of Santa Rosa that were devastated by the October 2017 fires using native, fast-germinating hydromulch treatment. Steep ravines that have been identified as being a high risk of erosion and debris flows will also be treated with hydromulch.	\$250,000.00	11/2/2017
REGION 1	North Bay Fire Response - Sonoma County Erosion Control Project	Fire Response	The proposed funding would be used to purchase erosion control supplies, such as wattles and compost socks, which will be deployed in the urban and rural areas of Sonoma County to prevent erosion runoff and debris from the fire damage areas from entering creeks and other waterways.	\$250,000.00	11/2/2017

SWRCB DIVISION OR REGION	PROJECT TITLE	FUNDING TYPE	PROJECT DESCRIPTION	AMOUNT APPROVED	APPROVED DATE
REGION 1	North Bay Fire Response Monitoring - North Coast Regional Water Quality Control Board	Fire Response	This proposed monitoring project will assess BMP effectiveness and help inform necessary corrections or modifications through the winter season. This request will support sampling, data analysis, data entry, and reporting, both for first flush/near term monitoring and for longer-term monitoring through June 30, 2018.	\$34,965.00	11/17/2017
REGION 2	North Bay Fire Response - Sonoma County Erosion Control	Fire Response	The project is for the installation of Best Management Practices (BMPs) such as mulch, straw wattles, inlet filtration devices, and others to prevent ash, sediment, and debris discharges to the storm drain systems and surface waters. Approximately 100 culverts and drain inlets and 192 burnt structure areas will be included in the project.	\$250,000.00	11/17/2017
REGION 1	North Bay Fire Response - Hydromulch Phase 2	Fire Response	PHASE 2- Project will be used to stabilize cut slopes along city roads in the steep Fountain Grove area of Santa Rosa that were devastated by the October 2017 fires using native, fast-germinating hydromulch treatment. Steep ravines that have been identified as being a high risk of erosion and debris flows will also be treated with hydromulch.	\$300,000.00	11/21/2017
