

## State Water Resources Control Board

### DIVISION OF FINANCIAL ASSISTANCE (DIVISION) DEPUTY DIRECTOR APPROVAL OF THE STORM WATER GRANT PROGRAM (SWGPP) PROPOSITION 1 (PROP 1) ROUND 1 IMPLEMENTATION FUNDING LIST (FUNDING LIST)

#### **BACKGROUND**

The Water Quality, Supply, and Infrastructure Improvement Act of 2014 (Prop 1) was approved by California voters in the general election on November 4, 2014. Among other funds, Prop 1 provided \$200 million for matching grants to public agencies, nonprofit organizations, public utilities, state and federally recognized Indian tribes, and mutual water companies for multi-benefit storm water management projects (Water Code section 79747). After bond and program administration costs, approximately \$186 million will be available for projects.

The State Water Resources Control Board (State Water Board) adopted the SWGPP Funding Guidelines for administering SWGPP Prop 1 funds on December 15, 2015 (Resolution 2015-0076). The Resolution adopting the Funding Guidelines authorizes the Deputy Director of the Division to award grants and execute grant agreements.

Approximately \$175 million of Prop 1 funds are available for implementation projects. Approximately \$80 million of Prop 1 funds are available to fund implementation projects during the first solicitation (Round 1) and \$95 million is expected to be available to fund projects during the second solicitation (Round 2) anticipated for awarding in mid to late 2018.

The Prop 1 program also made available approximately \$25 million for storm water or dry weather runoff projects that address discharge to an Area of Special Biological Significance (ASBS) or coastal waters, as identified in the Clean Beach Initiative (CBI) Program. This additional funding is available from unused or re-appropriated Proposition 84 (Prop 84) funds, Proposition 13 (Prop 13) Coastal Nonpoint Source funds, Proposition 40 (Prop 40) funds, and Proposition 50 (Prop 50) Coastal Non-Point Source funds.

The Prop 1 SWGPP Round 1 Implementation solicitation opened in January 2016 and closed on July 8, 2016. The Division received 84 applications requesting a total of \$322 million in grant funds and reporting approximately \$402 million in matching funds. Applications were reviewed by the Division, applicable Regional Water Quality Control Boards (Regional Water Boards), and Division of Water Quality staff utilizing pre-established scoring criteria for aspects including: project/applicant eligibility, application completeness, and application quality. The draft funding list was provided to the Regional Water Boards' staff and the CBI and ASBS Task Force committees for their review and concurrence with the funding list.

The Funding List includes 27 projects totaling \$80 million in Prop 1 funds, approximately \$14.6 million in CBI funds, and approximately \$9.6 million in ASBS funding.

Division staff will work with the unselected applicants that are interested in continuing with their project to provide feedback on the grant proposals and to see if they are eligible for other funding programs, such as the Round 2 SWGP implementation funding in 2018, the Green Project Reserve in the Clean Water State Revolving Fund program, or Prop 1 funding programs administered by other state agencies.

**APPROVAL**

I, Darrin Polhemus, Deputy Director of the State Water Board's Division of Financial Assistance, approve the SWGP Funding List (Attachment 1). The grant awards included in the Funding List are conditional; the final amount awarded will be subject to each applicant providing an acceptable scope of work, budget, and schedule. The Funding List includes projects that are awarded funding from the Proposition 1, Clean Beaches Initiative, and Areas of Special Biological Significance Funding programs (Attachment 1, Table 1).

Projects may be removed from the Funding List by the Deputy Director of the Division if applicants do not respond to Division staff requests for changes to the scopes of work and budgets in a timely and appropriate manner. Projects may also be removed from the Funding List if the applicant's Storm Water Resource Plan or Functionally Equivalent Plan does not meet the Water Code requirements set forth in Senate Bill 985 and Storm Water Resource Plan Guidelines, or an applicant is found to not meet other funding eligibility requirements.

The Deputy Director of the Division has the authority to utilize additional funds that become available (e.g., if a project is withdrawn or completed under budget) to fund projects on the Standby Project List (Attachment 1, Table 2), projects in future solicitations, or to augment the scope and budget of projects previously awarded, subject to the maximum grant amounts allowed in the SWGP Funding Guidelines. This authorization includes augmentation of project budgets to provide sufficient funds to ensure each project is properly implemented to meet its stated goals.

The Deputy Director of the Division is authorized to execute grant agreements and amendments thereto.

Approved:   
for Darrin Polhemus  
Deputy Director, Division of Financial Assistance
