WASTEWATER OPERATOR CERTIFICATION TRAINING DIRECTORY

February 2019

State Water Resources Control Board
California Environmental Protection Agency
WasteWater Technology Trainers

Wastewater Associations

California Water Environment Associations (CWEA)

California Rural Water Association

Water Environment Federation
Introduction

What Is In This Directory?

This guide provides an overview of the educational requirements contained in both the Water Code, Division 7, Water Quality, Chapter 9 Waste Water Treatment Plant Classification and Operator Certification and the California Code of Regulations Title 23, Chapter 26, Division 3, and lists opportunities to satisfy those requirements.

What Is The State Water Board Authority?

Water Code, Division 7, Chapter 9, Section 13629 authorizes the State Water Resources Control Board (State Water Board) and the Wastewater Operator Certification Program (WWOCP) to approve courses of instruction at higher educational institutions. The section also gives the WWOCP authority to approve courses of instruction given by professional associations, nonprofit or for-profit private or public agencies, and educational companies if they are equivalent to courses of instruction given by higher educational institutions. Upon request, the WWOCP will assign educational points to approved courses.

California Code of Regulations Title 23, Chapter 26, Division 3, Sections 3685-3687, specify the education requirements and set out the method used by the State Water Board to calculate educational points.

Why Is Training So Critical?

The State Water Board, WWOCP certifies all operators of wastewater treatment plants with the primary goal of protecting public health and the environment by ensuring that all operators are trained in operating wastewater treatment plants. In California, all prospective wastewater treatment plant operators must demonstrate to the WWOCP that they have successfully taken technical training.

In fact, before an applicant is even all owed to take an examination, they must document their training by sending official or copies of official college transcripts, diplomas or training certificates to the WWOCP. For more information, please visit our website at: http://www.waterboards.ca.gov/water_issues/programs/operator_certification/operator_certification.shtml. Depending on grade level, prospective operators must have specific levels of training. In some cases, this means college classes; in others it means seminars or in-house programs. Several grades have more than one possible path to satisfy the requirements.
What Are The Requirements?

Please refer to the “OPERATOR CERTIFICATION REQUIREMENTS TABLE” on page six for a list of education and experience requirements for Grades I through V. There is an educational requirement to both take the Examinations and to qualify for Certifications.

NOTE: Applicants must take and pass the WWOCP Examination before applying for Certification.

Educational Points vs. Semester Units

Educational Points are automatically allotted to non-college/university coursework (continuing education, association coursework, etc.) Additionally, if an applicant submits less than 60 semester (or equivalent quarter) units of college/university coursework and less than 15 semester units were earned in biology, chemistry, wastewater treatment, engineering, math or physics, the semester or quarter units will automatically be converted to educational points. Please note that all college/university coursework must be completed at an accredited college or university. Educational Points cannot be converted into Associate’s degree or Bachelor degree educational status. College and university courses completed on a quarter system are prorated to semester units.

California Code of Regulations Title 23, Chapter 26, Division 3, Section 3685 of the regulations authorizes the State Water Board to grant educational points as follows:

(a) Pursuant to the provisions of this article, applicants may be required to obtain educational points to qualify for certification. Operators may receive educational points for completing wastewater treatment, biology, chemistry, engineering, math, or physics courses as follows:

(1) One three-unit semester course completed as part of the curriculum of an accredited college or university is equal to eight educational points. Operators who have completed courses that result in more or less than three units or in quarter units rather than semester units shall be credited with educational points on a prorated basis.

(2) Each hour of instruction given by a professional association, private/public agency, or education company is equal to one tenth of an educational point (.1); ten hours of instruction is equivalent to one educational point.

(b) At Grades III, IV, and V, operators may earn up to a maximum of sixteen educational points for completing management courses. An operator may not earn more than four educational points for each management category. The management categories are: oral communication, technical writing, public administration, business management, and finance.
Educational points for a management coursework may be earned as follows:

(1) One completed two-unit semester course (or any course worth more than two semester or three-quarter units) that is part of the curriculum of an accredited college or university is equal to four educational points.

(2) Each hour of instruction taught at a professional association, private/public agency, or education company is equal to one half of an educational point; it takes twenty hours of instruction to equal one educational point.

(c) Applicants may not substitute experience for educational points.

The chart below may be useful when converting units to educational points:

<table>
<thead>
<tr>
<th>Units (Semesters)</th>
<th>Educational Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>2.5</td>

</tr>
<tr>
<td>6</td>
<td>10.5</td>
</tr>
</tbody>
</table>

**Educational Point Substitution for Experience**

Applicants may substitute 16 educational points for one year of experience; however, educational points cannot be used to substitute the 1,800 hours (or one year) of Operator-In-Training (OIT) experience. In other words, operators must work one year or 1,800 hours prior to being able to substitute educational points for experience. An applicant must retain the minimum educational points to qualify for their Grade level and have at least sixteen additional educational points available to substitute.

For example, a Grade II applicant with one year of experience and at least 28 educational points would be eligible to substitute 16 educational points for one year of experience. The applicant would have 12 points to satisfy the education requirement and 16 points to substitute for one year of experience. (28-16=12)

Once the 16 points are used to substitute for experience, they cannot be used again to substitute for experience at another grade level or qualify for a certification examination. Operators can substitute 16 educational points for one year of experience multiple times.
Acceptable High School Diplomas

Photocopies of high school diplomas and/or transcripts are acceptable. If submitting a transcript, it must be a copy of an official copy and clearly state the graduation date, the applicant’s name, and the name of the high school. If applicants do not have a copy of their diploma or it has been misplaced, contact the high school or school district directly for a copy.

Acceptable High School Diploma Equivalents

Here is a list of acceptable high school diploma equivalents:
- General Educational Development Test (GED, administered by the GED Testing Service GEDTS).
- High School Equivalency Test (HisSET administered by ETS educational Testing Service).
- The California High School Proficiency Examination (CHSPE) issued by the State of California Board of Education.

Community Colleges

Community colleges that offer certificate programs in wastewater are listed on pages 10 to 14. Community colleges offering only a few wastewater courses are listed separately on page 15. The prospective wastewater treatment plant operator should not confuse community college certification with certification by the WWOCP. A typical community college certification program requires the student to complete a program of study totaling approximately 23 semester units in wastewater and related topics. Certification by the State of California requires the qualified individual to pass an examination administered by the State Water Board, meet the experience and educational minimum requirements and submit a certification application with the applicable fee.

Even though a community college in your area may not be listed in this document, it is recommended that you inquire directly with your local college. Wastewater programs are in a continual state of change. Demand for courses and budget constraints often dictate scheduled offerings.

Universities

There are a few universities which offer correspondence coursework that includes wastewater manuals and online programs. These programs provide an excellent alternative for those individuals who are unable to attend a college or cannot find such courses offered in their vicinity.

The curriculum covers a variety of topics including tours of pre-treatment and wastewater treatment facilities. Contact the universities listed in the directory for more information.
Associations, Organizations, and Education Companies offering Courses, Classes or Seminar Coursework

There are various regional and statewide training organizations, and educational companies which provide wastewater training seminars, courses and classes. When a course has been completed, submit a copy of the certificate of completion that includes the name of the instructor and attendee, the course title, how many minutes or hours the course took, and a signature from the course instructor. Please note that the list of Associations and Organizations is not comprehensive nor does the WWOCP endorse any specific educational entity.

Where To Go For More Information?

For additional information, please contact:

Wastewater Operator Certification Program
State Water Resources Control Board
P.O. Box 944212
