#### Comments on the Foregoing

1. October 22, 2018, Supplement. In part, the Supplement provides guidance to ensure the review is kept confidential through its course. It also notes reviewers are under no obligation to discuss their comments with third-parties after reviews have been submitted. We recommend they do not. All outside parties are provided opportunities to address a proposed regulatory action through a well-defined regulatory process. Please direct third parties to me.

Questions about the review, or material, should be for clarification, in writing – email is fine, and addressed to me. My responses will be in writing also.
