
State Water Resources Control Board

March 22, 2021

Nilda Cox
Eurofins Eaton Analytical, LLC
Royal Oaks Dr., Suite 100
Monrovia, CA 91016

Dear Ms. Cox,

This letter serves as notice that Eurofins Eaton Analytical has been approved for the use of an in-house method “The determination of personal care products, pharmaceutical (PPCP) and endocrine disruptors compounds (EDC), herbicide and degradates in environmental matrices by online solid-phase extraction coupled with high-performance LC/MS in tandem” (in-house method) for monitoring analytes gemfibrozil, iohexol, sucralose, and sulfamethoxazole for monitoring for constituents of emerging concern pursuant to the Water Quality Control Policy for Recycled Water (Recycled Water Policy) as of the date of this letter.

Eurofins Eaton Analytical submitted a validation package for this in-house method on March 10, 2021. This validation package demonstrated the utility of the in-house method for analytes gemfibrozil, iohexol, sucralose, and sulfamethoxazole in a water quality representative of the matrices outlined in Attachment A of the Recycled Water Policy.

This approval for the use of the in-house method for analytes gemfibrozil, iohexol, sucralose, and sulfamethoxazole is only for the purposes outlined in the Recycled Water Policy, Attachment A, and this approval does not extend to the use of this method for any other purpose.

Sincerely,

Tricia Lee
