
State Water Resources Control Board

May 10, 2021

Jason Dadakis
Orange County Water District
18700 Ward Street
Fountain Valley, CA 92708

Dear Mr. Dadakis,

This letter serves as notice that Orange County Water District has been approved for the use of an in-house method for the “Chemicals of Emerging Concern (CECs)” (in-house method) for monitoring sucralose and sulfamethoxazole pursuant to the Water Quality Control Policy for Recycled Water (Recycled Water Policy) as of the date of this letter.

Orange County Water District submitted a validation package for this in-house method on April 23, 2021. This validation package demonstrated the utility of the in-house method for analytes sucralose and sulfamethoxazole in a water quality representative of the matrices outlined in Attachment A of the Recycled Water Policy.

This approval for the use of this in-house method is only for the purposes outlined in the Recycled Water Policy, Attachment A, and this approval does not extend to the use of this method for any other purpose.

Sincerely,

Tricia Lee
