SSO Hearing: 2/8/06

January 18, 2006

Tam Doduc, Chair, and Members  
State Water Resources Control Board  
Executive Office  
1001 I Street, 24<sup>th</sup> Floor  
Sacramento, CA 95814  
Attn: Selica Potter, Acting Clerk to the Board

Dear Chairwoman Doduc and Members:

**COMMENT LETTER – JANUARY 19, 2006 PUBLIC HEARING  
FOR SSORP**

This letter is written on behalf of the City of La Cañada Flintridge to express opposition to the Statewide General Waste Discharge Requirements (WDR) for Wastewater Collection System Agencies and the accompanying Monitoring and Reporting Program (MRP) in their current form.

The City of La Cañada Flintridge is supportive of goals of the State Water Resources Control Board (SWRCB) to implement the Sanitary Sewer Overflow Reduction Program to reduce the number and volume of Sanitary Sewer Overflows (SSOs) throughout the state. However, the City of La Cañada Flintridge believes the projected \$72 annual cost per household to implement the Statewide WDR that is shown in the Fact Sheet may underestimate the true cost for smaller cities such as ours. Even if the cost projection proves accurate, it does represent a very significant cost increase to be borne by our ratepayers. The State should attempt to identify a source of funding to support these new costs rather than simply requiring the cities to enact rate increases to cover the costs. Most importantly, these additional costs should not be further increased by fines or third party litigation due to SSOs that occur even after full SSMP implementation and full compliance with WDR and MRP requirements.

The WDR must strongly differentiate between negligent and non-negligent SSOs, and must provide our residents with protection against the cost impact of fines and lawsuits based on SSOs that occur even after our collection system is managed, operated and maintained according to the standards and requirements established by this new regulatory program. Additionally, the City of La Cañada Flintridge believes the proposed time scheduled for implementation of the various program elements is too short and overly prescriptive. In particular, for our city, with a population of 21, 000 people, development and implementation of a comprehensive Overflow Emergency Response Program within 12 months, which will require new equipment, personnel and training, would be difficult. The City of La Cañada Flintridge believes more time should be afforded and separate deadlines for individual program elements should be eliminated.

The City of La Cañada Flintridge strongly urges the SWRCB not to adopt the WDR and MRP without cost support, protection for our ratepayers from potentially unfair and unreasonable regulatory fines and third party litigation, and additional time for program implementation.

Sincerely,

Mark R. Alexander  
City Manger
