Industrial General Permit Amendment
Total Maximum Daily Load Compliance Options

Stakeholder Meeting
Conceptual Draft Compliance Options

Option 1
- On-site TMDL Compliance

Option 2
- Watershed Based TMDL Compliance
Option 1: On-site TMDL Compliance

- BMP implementation for capture and use, infiltration, and/or evapotranspiration of storm water associated with industrial activities and authorized non-storm water discharges to comply with TMDL requirements.

- BMP design:
  - Continuously maintain runoff produced up to and during the 85th percentile 24-hour precipitation event.
Option 1: On-site TMDL Compliance

Issues with Option 1 compliance:

1. Liability of bypass monitoring
2. Issue #2
3. Issue #3
Option 2: Watershed Based TMDL Compliance

- Discharges that meet one or more of the following criteria are eligible to enter into agreement with the local municipality for compliance with the TMDL using watershed-based BMPs
  - Facility is located within a watershed that has a municipal watershed management programs
  - Municipality agrees for the facility to be a part of the watershed-based BMP
Option 2: Watershed Based TMDL Compliance

Issues with Option 2 compliance:

1. Discharger’s compliance point is outside of facility boundary (conflict with IGP point of compliance requirements)
2. How to legally enter into agreement with a local municipality
3. Issue #3
