

Full Capture System Trash Treatment Control Devices Delisted

(Updated September 30, 2020)

In accordance with the Trash Policy Amendments, the State Water Resources Control Board (State Water Board) Executive Director has authority to maintain a list of Approved Trash Treatment Control Devices. Previous to the Trash Policy Amendments, the trash treatment control devices listed below were found by Regional Water Board staff to trap all particles 5 mm or greater in size when maintained and properly sized for a 1-year, 1-hour storm event. This corresponds with the Full Capture System definition within the Trash Policy Amendments.

As of the effective date shown in the *Date Delisted/Reason* column, these trash treatment control devices below are delisted and no longer certified or eligible for installation for the reasons described. However, the Executive Director or Designee may allow these installed devices to continue operation as long as they are maintained to meet the Full Capture System definition.

A delisted Device may be recertified upon submittal of an application, by the Device owner/manufacture, that complies with the current State Water Board *Trash Treatment Control Device Certification and Fact Sheet Updated Requirements*.

Owner/ Manufacturer	Device Name	Device Type	Date Delisted/ Reason
Gentile Family Industries	Wavy Grate Trash Catcher	Catch Basin Insert (Fact Sheet GFI-1)	04/1/2016 - No longer in business.
West Coast Storm, Inc.	Connector Pipe Screen	Catch Basin Insert (Fact Sheet WCS-1)	04/1/2016 - No longer in business.
