Stormwater Capture and Use: Turning Local Stormwater Successes into Solutions for California's Water Future
State Water Resources Control Board Workshop

Tuesday, November 18, 2025
Coastal Hearing Room, Joe Serna Jr. CalEPA Building, 1001 I Street, Sacramento
Webcast: https://video.calepa.ca.gov

Both in-person and virtual participation options will be available! Sign up here for updates.

The State Water Resources Control Board invites you to a staff-led public workshop focused on how California can better capture and use urban stormwater. Join us to learn about successful projects, discuss overcoming barriers, and help shape the future of stormwater management in California.

Speakers include cities, counties, local nonprofits, and research institutes.

Agenda

- **Overview of Urban Stormwater Capture**
- **Local and Regional Implementation**
- **Overcoming Funding Barriers**

Who should attend

Interested state agencies, city and county stormwater staff, Municipal Separate Storm Sewer System permittees, school districts, parks and public lands managers, Tribes, community-based and non-governmental organizations, consultants, researchers, and interested community members.
