

## ACKNOWLEDGEMENTS

Preparation of this review was a formidable task, and thanks are due to many people for their direct or indirect contributions to this document.

Many colleagues graciously provided data that formed the basis for this report. The primary contacts are listed in Tables 2.1 and 2.2 of the report. Thanks are also owed to many others not listed here that helped direct us to these sources of information.

A draft of this document was reviewed and improved by comments received from Rainer Hoenicke (San Francisco Estuary Institute), Bob Brodberg (California Office of Environmental Health Hazard Assessment), Pavlova Vitale (Santa Ana Regional Water Quality Control Board), Kathy Rose (Santa Ana Regional Water Quality Control Board), Tom Kimball (State Water Resources Control Board), Robert Holmes (Central Valley Regional Water Quality Control Board), Jim Wiener (University of Wisconsin-LaCrosse), Ross Norstrom (Carleton University, Ottawa, Canada), and Chris Schmitt (U.S. Geological Survey, Columbia, Missouri).

Valerie Connor and Emilie Reyes of the State Water Resources Control Board guided the project as SWAMP Unit Chiefs.

Rusty Fairey and Max Puckett of Moss Landing Marine Lab managed the subcontract with SFEI to perform this work.

SFEI staff that contributed to this report either directly through reviewing draft material or providing input as the project progressed, or indirectly through administrative support, included Rainer Hoenicke and Jennifer Hunt (project management), Cristina Grosso (data management), and Mike Connor, Frank Leung, Irene Poche, Linda Russio, Lawrence Leung, and Stephanie Seto (administration).

Jay Davis would like to note his appreciation for the extraordinary patience and support of his wife, Nicole David, during the production of this report.

This study was funded by a contract with the State Water Resources Control Board (Agreement No. 03-200-250-0) with matching funds provided by USEPA, the CALFED Ecosystem Restoration Program, and the Regional Monitoring Program for Water Quality in the San Francisco Estuary.

The layout and design of the report was done by Doralynn Co of Greenhouse Marketing & Design, Inc.
