

TABLE OF CONTENTS TOC

Executive Summary 5

1. Introduction 13

2. Methods 17

 2.1 Creating the Database 17

 2.2 Data Analysis 21

 2.3 GIS Mapping 22

3. Results and Discussion 24

 3.1 Summary Information 24

 3.2 The Net Impact of Pollutants on Fishing in California. 24

 3.2.1 Introduction. 24

 3.2.2 Impact of Pollutants on the Fishing Beneficial Use 27

 3.2.3 Summary and Recommendations 38

 3.3 Impact of Mercury Bioaccumulation on Fishing and Aquatic Life in California. 40

 3.3.1 Introduction. 40

 3.3.2 Impact of Mercury on Fishing in California 40

 3.3.3 Impact of Mercury on Aquatic Life in California 58

 3.3.4 Mercury Summary. 62

 3.4 The Impact of PCB Bioaccumulation on Fishing and Aquatic Life in California 67

 3.4.1 Introduction. 67

 3.4.2 Impact of PCBs on Fishing in California 68

 3.4.3 Impact of PCBs on Aquatic Life in California 86

 3.4.4 PCB Summary. 91

 3.5 Impact of Legacy Pesticide Bioaccumulation on Fishing and Aquatic Life in California 96

 3.5.1 Introduction. 96

 3.5.2 Impact of DDTs on Fishing in California 97

 3.5.3 Impact of DDTs on Aquatic Life in California 112

 3.5.4 DDT Summary 118

 3.5.5 Impact of Dieldrin on Fishing in California 118

 3.5.6 Impact of Dieldrin on Aquatic Life in California 130

 3.5.7 Dieldrin Summary. 130

 3.5.8 Impact of Chlordanes on Fishing in California 131

 3.5.9 Impact of Chlordanes on Aquatic Life in California 142

 3.5.10 Chlordanes Summary. 143

TABLE OF CONTENTS TOC

Appendices

1 Size limits for fish included in mercury analysis *Separate Document*

2 Scope of studies included *Separate Document*

3 Water bodies listed on the 2002 303(d) List *Separate Document*

4 Reviewer comments to draft report *Separate Document*

Tables

1.1 Draft objectives and assessment questions for the SWAMP 15

2.1 Studies included in the review data set 18

2.2 Studies excluded from the review data set 20

3.1.1 Most widely sampled species 26

3.2.1 Consumption advisories in California in place as of April 2007 29

3.2.2 Pollutant concentration categories used in this report 32

3.2.3 Total number of locations sampled for all pollutants and percentage in each concentration category for three different time intervals from 1978 to 2003. 35

3.3.1 Total number of locations sampled for mercury and percentage in each concentration category for three different time intervals from 1978 to 2003. 42

3.4.1 Total number of locations sampled for PCBs and percentage in each concentration category for three different time intervals from 1978 to 2003. 69

3.5.1 Use of legacy pesticides 96

3.5.2 Total number of locations sampled for legacy pesticides and percentage in each concentration category for three different time intervals from 1978 to 2003 99

Figures

1 Net assessment of pollutant concentrations in California sport fish, 1998 – 2003 6

2 Mercury concentrations in California sport fish, 1998 – 2003 8

3 PCB concentrations in California sport fish, 1998 – 2003 9

4 Long-term trends in PCB concentrations in California mussels measured by the State Mussel Watch Program 10

3.1.1 California Bioaccumulation Studies, 1969 – 2003. 25

3.2.1 Consumption advisories in California, 2007 28

TABLE OF CONTENTS TOC

3.2.2 Assessment of monitoring data based on the 2002 303(d) List 30

3.2.3 Net assessment of pollutant concentrations in California sport fish, 1998 – 2003 33

3.2.4 Net assessment of pollutant concentrations in California sport fish, 1988 – 1997 36

3.2.5 Net assessment of pollutant concentrations in California sport fish, 1978 – 1987 37

3.3.1 Mercury concentrations in California sport fish, 1998 – 2003 43

3.3.2 Mercury concentrations in California sport fish, 1988 – 1997 46

3.3.3 Mercury concentrations in California sport fish, 1978 – 1987 47

3.3.4 Long-term trends in mercury concentrations in California sport fish 49

3.3.5 Regressions of mercury concentration on fish length by site 50

3.3.6 Average mercury concentrations in largemouth bass from sampling locations in the Sacramento-San Joaquin Delta, 1999. 52

3.3.7 Mercury concentrations in striped bass in the 1970s and 1990s 53

3.3.8 Mercury concentrations for standardized 40 cm largemouth bass from different reservoirs in the Guadalupe Watershed 53

3.3.9 Mercury concentrations in California sport fish, 1998 – 2003 55

3.3.10 Mercury concentrations in California sport fish, 1988 – 1997 56

3.3.11 Mercury concentrations in California sport fish, 1978 – 1987 57

3.3.12 Locations of past and present gold and mercury mines in California 58

3.3.13 Mercury concentrations in the eggs of Bay-Delta birds 60

3.4.1 PCB production in the U.S., 1957 – 1975. 67

3.4.2 PCB concentrations in California sport fish, 1998 – 2003 70

3.4.3 PCB concentrations in California sport fish, 1988 – 1997 73

3.4.4 PCB concentrations in California sport fish, 1978 – 1987 74

3.4.5 Long-term trends in PCB concentrations in California sport fish 76

3.4.6 Long-term trends in PCB concentrations in California mussels measured by the State Mussel Watch Program 77

3.4.7 PCB concentrations in transplanted mussels, 1982 – 2003 (ppb lipid weight) 79

3.4.8 PCB trends in shiner surfperch and white croaker, 1994 – 2003 81

3.4.9 PCB concentrations (as sums of Aroclors or congeners, depending on the data source) in California sport fish, 1998 – 2003 83

3.4.10 PCB concentrations (as sums of Aroclors or congeners, depending on the data source) in California sport fish, 1988 – 1997 84

3.4.11 PCB concentrations (as sums of Aroclors or congeners, depending on the data source) in California sport fish, 1978 – 1987 85

TABLE OF CONTENTS TOC

3.4.12 Distribution of total PCB concentrations in sanddab guild fishes on the southern California shelf at depths of 2-202 m, July-September 1998 90

3.5.1 DDT concentrations in California sport fish, 1998 – 2003 100

3.5.2 DDT concentrations in California sport fish, 1988 – 1997 102

3.5.3 DDT concentrations in California sport fish, 1978 – 1987 103

3.5.4 Long-term trends in DDT concentrations in California sport fish. 104

3.5.5 Long-term trends in DDT concentrations in California mussels measured by the State Mussel Watch Program. 106

3.5.6 Mean concentrations of Total DDT in composites of white croaker collected from coastal Southern California in September 1990. 107

3.5.7 DDT concentrations (ppb) in San Francisco Bay fish, 2003. 107

3.5.8 DDT concentrations in California sport fish, 1998 – 2003. 109

3.5.9 DDT concentrations in California sport fish, 1988 – 1997. 110

3.5.10 DDT concentrations in California sport fish, 1978 – 1987. 111

3.5.11 Total DDT in Western Gull eggs from island sampling locations along the Pacific Coast. 115

3.5.12 Dieldrin concentrations in California sport fish, 1998 – 2003 120

3.5.13 Dieldrin concentrations in California sport fish, 1988 – 1997 121

3.5.14 Dieldrin concentrations in California sport fish, 1978 – 1987 122

3.5.15 Long-term trends in dieldrin concentrations in California sport fish. 124

3.5.16 Long-term trends in dieldrin concentrations in California mussels measured by the State Mussel Watch Program 125

3.5.17 Dieldrin concentrations (ng/g) in Bay fish, 2003 126

3.5.18 Dieldrin concentrations in California sport fish, 1998 – 2003 127

3.5.19 Dieldrin concentrations in California sport fish, 1988 – 1997 128

3.5.20 Dieldrin concentrations in California sport fish, 1978 – 1987 129

3.5.21 Chlordane concentrations in California sport fish, 1998 – 2003 133

3.5.22 Chlordane concentrations in California sport fish, 1988 – 1997 134

3.5.23 Chlordane concentrations in California sport fish, 1978 – 1987 135

3.5.24 Long-term trends in chlordane concentrations in California sport fish. 136

3.5.25 Long-term trends in chlordane concentrations in California mussels measured by the State Mussel Watch Program 137

3.5.26 Chlordane concentrations (ng/g) in Bay fish, 2003 138

3.5.27 Chlordane concentrations in California sport fish, 1998 – 2003 139

3.5.28 Chlordane concentrations in California sport fish, 1988 – 1997 140

3.5.29 Chlordane concentrations in California sport fish, 1978 – 1987 141
