

**Fourteenth National Nonpoint Source (NPS)
Monitoring Workshop:
Measuring Project and Program Effectiveness**
September 24-28, 2006
Minneapolis, Minnesota

Call for Papers Announcement

The 14th National Nonpoint Source (NPS) Monitoring Workshop: Measuring Project and Program Effectiveness, will be held September 24-28, 2006 in Minneapolis, Minnesota. This workshop will once again bring together land managers and water quality specialists to share information on the effectiveness of best management practices in improving water quality, effective monitoring techniques, and statistical analysis of watershed data. The workshop will focus on the successes of Section 319 National Monitoring Program projects and other innovative projects from throughout the United States.

**Workshop Sponsors: United States Environmental Protection Agency
Minnesota Pollution Control Agency**
