

Assembly Bill No. 982

CHAPTER 495

An act to add Sections 13191 and 13192 to the Water Code, relating to water.

[Approved by Governor September 27, 1999. Filed with Secretary of State September 27, 1999.]

LEGISLATIVE COUNSEL'S DIGEST

AB 982, Ducheny. Water quality: total maximum daily loads.

Under the Porter-Cologne Water Quality Control Act, the State Water Resources Control Board and the California regional water quality control boards are the principal state agencies with regulatory authority over water quality. Under the federal Clean Water Act, each state is required to identify those waters for which prescribed effluent limitations are not stringent enough to implement applicable water quality standards and to establish, with regard to those waters, total maximum daily loads, subject to the approval of the United States Environmental Protection Agency, for certain pollutants at a level necessary to implement those water quality standards.

This bill would require the state board to convene an advisory group or groups to assist in the evaluation of program structure and effectiveness as it relates to the implementation of the requirements of a specified provision of the federal Clean Water Act and applicable federal regulations. The bill also would require the state board to report, on or before November 30, 2000, and annually thereafter until November 20, 2002, to the Legislature on the structure and effectiveness of its water quality program as it relates to that provision of the federal Clean Water Act. The bill, in addition, would require the state board, on or before November 30, 2000, to assess and report to the Legislature on the state board's and the regional board's current surface water quality monitoring programs, as specified.

The people of the State of California do enact as follows:

SECTION 1. Section 13191 is added to the Water Code, to read:

13191. (a) The state board shall convene an advisory group or groups to assist in the evaluation of program structure and effectiveness as it relates to the implementation of the requirements of Section 303(d) of the Clean Water Act (33 U.S.C. 1313(d)), and applicable federal regulations and monitoring and assessment programs. The advisory group or groups shall be comprised of persons concerned with the requirements of Section 303(d) of the

Clean Water Act. The state board shall provide public notice on its website of any meetings of the advisory group or groups and, upon the request of any party shall mail notice of the time and location of any meeting of the group or groups. The board shall also ensure that the advisory group or groups meet in a manner that facilitates the effective participation of the public and the stakeholder participants.

(b) Notwithstanding Section 7550.5 of the Government Code, on or before November 30, 2000, and annually thereafter until November 30, 2002, the state board shall report to the Legislature on the structure and effectiveness of its water quality program as it relates to Section 303(d) of the Clean Water Act. The report may include the information required to be submitted by the board to the United States Environmental Protection Agency pursuant to Section 305(b) of the Clean Water Act, and any information required to be submitted to the Legislature pursuant to the Supplemental Report of the Budget Act of 1999. In formulating its report, the state board shall consider any recommendations of the advisory group or groups.

SEC. 2. Section 13192 is added to the Water Code, to read:

13192. (a) Notwithstanding Section 7550.5 of the Government Code, the state board, on or before November 30, 2000, shall assess and report to the Legislature on the State Water Resources Control Board's and regional water control board's current surface water quality monitoring programs for the purpose of designing a proposal for a comprehensive surface water quality monitoring program for the state. The report shall include a proposal for the program, including steps and costs associated with developing the full program, cost of implementation of the program after development, and appropriate funding mechanisms, including any fee structure. The board may include in the report information required to be submitted to the United States Environmental Protection Agency pursuant to Section 305(b) of the Clean Water Act, information required to be submitted pursuant to paragraph (1) of subdivision (c) of Section 13181, and any information required to be submitted to the Legislature pursuant to the Supplemental Report of the Budget Act of 1999.

(b) In considering and designing the proposal, the state board shall address factors that include, but need not be limited to, all of the following:

(1) Physical, chemical, biological, and other parameters about which the program shall collect and evaluate data and other information and the reasonable means to ensure that the data is accurate in determining ambient water quality.

(2) The use of models and other forms of information not directly measuring water quality.

(3) Reasonable quality assurance and quality control protocols sufficient to allow sound management while allowing and

encouraging, where appropriate, data collection by entities including citizens and other stakeholders, such as dischargers.

(4) A strategy to expeditiously develop information about waters concerning which the state presently possesses little or no information.

(5) A strategy for assuring that data collected as part of monitoring programs, and any associated quality assurance elements associated with the data collection, be made readily available to the public.

(6) A strategy for assessing and characterizing discharges from nonpoint sources of pollution and natural background sources.

(7) A strategy to prioritize and allocate resources in order to effectively meet water quality monitoring goals.

(c) Nothing in this section affects the authority of the regional water quality control boards.
