**About the Data**

## Candidate Indicators

Indicators considered in assessing watershed health.

[303D Listed Waters](#)

### 303D Listed Waters

Under Section 303(d) of the Clean Water Act, each State must prepare a list of waters that are not meeting their water quality standards. These lists are required to be submitted to EPA for review and approval every April of even years (e.g. 1996, 1998). Total Maximum Daily Loads (TMDLs) are then established from the most recently approved list. View or add additional State/Tribal information about this watershed.
