¹ SmartWood is implemented worldwide by the nonprofit members of the SmartWood Network. The Network is coordinated by the Rainforest Alliance, an international nonprofit conservation organization. The Rainforest Alliance is the legally registered owner of the SmartWood certification mark and label. All uses of the SmartWood label for promotion must be authorized by SmartWood Network headquarters. SmartWood certification applies to forest management practices only and does not represent endorsement of other product qualities (e.g., financial performance to investors, product function, etc.). SmartWood is accredited by the Forest Stewardship Council (FSC) for the certification of natural forest management, tree plantations and chain of custody.
