Re: Humboldt Bay 303d Listing  
Water Quality Data

Dear Mr. Gwynne,

Enclosed please find copies (hard and digital) of all Wiyot Tribe water quality data and meta data for our sampling locations in Humboldt Bay. (Data for McNulty Slough, Eel River and the reservation's wetland are also included). This data is water column data only.

The Wiyot Tribe maintains a water quality monitoring program in Humboldt Bay under Section 106 of the Clean Water Act, as funded by the US EPA. We have established sampling stations at Mad River Slough, Indian Island, and the mouth of Humboldt Bay. This data is available to the public on our website as well as on Humboldt State University's website.

The Wiyot Tribe is a strong advocate of improved water quality in Humboldt Bay, a bountiful place that once provided food, shelter, and cultural sustenance for the Wiyot people. The Wiyot Tribe hopes you will be able to use this information to result in real improvements in the health of Humboldt Bay.

Please contact Dylan Gray, Environmental Specialist, if you have any questions regarding the enclosed data. He can be reached at 707-733-5055.

Sincerely,

Andrea Davis  
Environmental Director
