FOR THE

**NORTH COAST 2008 INTEGRATED REPORT
FOR THE 305(b) WATER QUALITY ASSESSMENT
AND THE 303(d) LIST OF IMPAIRED WATERS**

Notice is hereby given that the California Regional Water Quality Control Board, North Coast Region (Regional Water Board) is proposing to revise the surface water quality assessment under Clean Water Act section 305(b) and the list of impaired waters under Clean Water Act section 303(d) in the 2008 Integrated Report.

Overview of the 2008 Integrated Report

Under Clean Water Act (CWA) section 305(b), states are required to report biennially to the US Environmental Protection Agency (US EPA) on the conditions of their surface waters. The US EPA then compiles these assessments into their biennial "National Water Quality Inventory Report" to Congress. Under CWA section 303(d), states are required to review, make changes as necessary, and submit to the US EPA a list identifying waterbodies not meeting water quality standards and identifying the water quality parameter (i.e., pollutant) not being met. Placement of a waterbody on this list generally triggers development of a total maximum daily load (TMDL).

For 2008, California is integrating the 305(b) assessment and the 303(d) list of impaired waters into a single report, appropriately called the Integrated Report. The North Coast Regional Water Board is responsible for developing and adopting the 2008 Integrated Report for the North Coast Region.

At the Public Hearing, the Regional Water Board will consider for approval each proposed listing change to the CWA Section 303(d) List of Impaired Waters, and will consider adoption of a Resolution in support of its recommendations to the State Water Resources Control Board for the statewide 2008 Integrated Report.

Written comments received after the public comment period (after 5:00 p.m. on March 20, 2009) will not be accepted, except at the discretion of the Regional Water Board Chair. All those who plan to testify at the Public Hearing are encouraged to submit written statements during the public comment period. Depending on the number of people wishing to speak at the Public Hearing, the Regional Water Board Chair may set time constraints for oral testimony or comments. A timer may be used and speakers are expected to honor the time limits.
