Subject: Re: Request to add TMDL approved listings to the 303(d) List

710

Hi Dorena,

For Arcade Creek through Strong Ranch Slough, see <http://www.waterboards.ca.gov/centralvalley/programs/tmdl/urban creeks/index.html> . For the San Joaquin River, selenium, the EPA approval letter is attached.

Joe

Hello Joe,

How are you? I am addressing your request to add approved TMDLs to the "Being Addressed" category of the 303(d) List. I am working to accomodate this request, but I will need additional information so that I can appropriately complete new fact sheets.

Can you please provide me verification of when these TMDLs were approved by the Regional Board and USEPA? You can either fax or email copies of the information for these approved TMDLs from Planner Tracker, or of course, anything that you may have in-house that documents their approval. We will add this information to our records. My fax number is 916-341-5584 or 5550.

Here are the TMDLs I need information for (taken from your email to C. Wilson):

- Arcade Creek - Chlorpyrifos and diazinon - approved 2004
- Chicken Ranch Slough - Chlorpyrifos and diazinon - approved 2004
- Elder Creek - Chlorpyrifos and diazinon - approved 2004
- Elk Grove Creek - Diazinon - approved 2004
- Morrison Creek - Chlorpyrifos and diazinon - approved 2004??
- Strong Ranch Slough - Chlorpyrifos and diazinon - approved 2004
- San Joaquin River (Tuolumne R. to Stanislaus R.) & (Stanislaus R. to South Delta Boundary) - Selenium - approved 2002.

Thank you
Dorena

Dear Mr. Carlton:

Thank you for submitting the total maximum daily load (TMDL) to address selenium impairment of the Lower San Joaquin River in the San Joaquin Basin, California. The submission letter to EPA is dated February 28, 2002. Based on our review, EPA concludes that the TMDL adequately addresses the pollutant of concern and, upon implementation, will result in attainment of water quality standards. The TMDL includes allocations as needed, takes into consideration seasonal variations and critical conditions, and provides an adequate margin of safety. The State has provided adequate opportunities for public review and comment on the TMDL and the Basin Plan Amendments on which it is based. All required elements are adequately addressed; therefore, the TMDL is hereby approved.

The attached review discusses the basis for the TMDL approval decision in greater detail. We appreciate the Regional Board's work to complete and adopt the TMDL and look forward to our continuing partnership in TMDL development. If you have questions concerning this approval, please call me at (415) 972-3572 or Debra Denton at (916) 341-5520.

Sincerely,
