March 21, 2007

Messrs. Gene Davis and Joe Karkoski  
Central Valley Regional Water Quality Control Board  
11020 Sun Center Drive, # 200  
Rancho Cordova, CA 95670-6114

Dear Mr. Davis and Mr. Karkoski:

Attached you will find the documents that Pacific Gas and Electric Company (PG&E) submitted February 28, 2007. In addition, we are attaching a table (Table 2) that addresses each water segment and our recommendation with regard to the 2006 303(d) listing. For each water segment and recommendation, we have submitted a fact sheet. These fact sheets explain PG&E's recommendations and provide the location of pertinent data in each report that was submitted February 28, 2007.

PG&E has also provided a fact sheet that provides a recommendation for segmenting the water bodies (Attachment A). Another fact sheet (Attachment B) summarizes concerns with the Sullivan report guidelines and the use of a single annual maximum water temperature to determine listings. PG&E believes that the Sullivan guideline should only be used as guidance or a preliminary screening tool and that further lines of evidence must be evaluated in order to make a listing decision.

Attachments C, D, E, and F contain the fact sheets for the North Fork Feather River (NFFR) listing for water temperature, the NFFR listing for mercury, the Willow Creek listing for water temperature, and the copper listing for the Lower Bear River Reservoir, respectively.

If you have any questions please contact Sara Everitt at 415 973 0707.

Sincerely,

*Tammie R. Candelario*
