

## ATTACHMENT FIVE

### DATA FOR NEW LISTING PROPOSALS

#### Alamo River Chloride in Water (mg/L)

WARM Water Quality Criteria/Objective is 230 mg/L

Ten (10) samples out of twelve (12) samples exceeded the objective

| Date       | Alamo River North of International Boundary | Alamo River at Outlet to the Salton Sea |
|------------|---|---|
| 10/25/2005 | 528   |   |
| 10/26/2005 |   | 737                                     |
| 5/1/2006   | 556   | 434                                     |
| 5/7/2007   | 110   | 403                                     |
| 10/23/2007 | 114   | 497                                     |
| 4/21/2008  | 317   | 402                                     |
| 10/28/2008 | 581   | 519                                     |

#### Alamo River Malathion in Water (ug/L)

WARM Water Quality Criteria/Objective is 0.028 ug/L

Three (3) samples out of three (3) samples exceeded the objective

| Date       | Alamo River North of International Boundary | Alamo River at Outlet to the Salton Sea |
|------------|---|---|
| Date       | AR/IB                                       | AR/Outlet                               |
| 4/21/2008  |   | 0.061                                   |
| 10/28/2008 | 0.033                                       | 0.057                                   |

#### Alamo River Toxicity in Sediment

Any sample with the code S, SL, or SG is exceeding the WARM Water Quality Criteria/Objective

Five (5) samples out of six (6) samples exceeded the objective

| Date       | Alamo River North of International Boundary | Alamo River at Outlet to the Salton Sea |
|------------|---|---|
| 10/26/2005 |   | SL                                      |
| 5/1/2006   |   | SL                                      |
| 5/7/2007   | NSG   | NSG                                     |
| 10/23/2007 | NSG   | SG                                      |
| 4/21/2008  | NSG   | SL                                      |
| 10/28/2008 |   | SG                                      |

One of three sediment samples exhibited toxicity in 2006 data, but the data can't be tracked.

**Coachella Valley Stormwater Channel (CVSC) Ammonia in Water (mg/L)**

WARM Water Quality Criteria/Objective depends on temperature and pH

Four (4) samples out of seven (7) samples exceeded the objective

| Date       | CVSC Near Outlet to the Salton Sea | CVSC at Avenue 52 | pH   | Temperature | Objective  |
|------------|------------------------------------|-------------------|------|-------------|------------|
| 10/26/2005 |                                    | 15                | 7.69 | 25.42       | 1.79167361 |
| 5/2/2006   |                                    | 13.4              | 7.47 | 23.33       | 2.53684219 |
