**Subject:** R9 map corrections to the 303(d) list

262

Hi Nancy and Craig,

Region 9 would still like to see the following corrections made to the GIS layers for the Clean Water Act Section 303(d) list. Please consider this a formal request for these changes to be made.

1. - The stretch of Pacific Ocean Shoreline, at Bermuda Avenue should not be listed. The following was emailed to Adam Morrill on 5 Nov 02: For the listing "Pacific Ocean Shoreline, San Diego HU" the extent of listing should include only Part 1 of 2 and not the more southern stretch identified as Part 2 of 2. If you have not yet digitized the maps, please exclude this southern extent of impairment. The total linear distance should only be 0.5 miles. Please let me know if you are able to do this.
2. - Green Valley Creek is improperly represented. The correct shapefiles were emailed to you guys on 6 May 03 by Mettja Hong (former intern). Please update.
3. - Chollas Creek. Can we add about 0.5 miles of impairment to the Southern Fork? This fork joins the currently listed portion NW of the I5 / I15 interchange.
4. - Mission Bay should have just the shoreline listed for Bacterial Impairments and just the areas near the mouths of Rose and Tecolote Creek listed for eutrophic and lead. I understand that this may not be possible due to the constraints of 'one area represented for one waterbody' in the system.
5. - The San Diego River should be a continuous line from Carlton Hills Blvd Bridge all the way down to the Pacific Ocean. The line currently is missing the upper portion and contains 4 other missing segments.
6. - The Tijuana River should also be a continuous line, but it has 2 missing segments.
7. - "pName" issues: Kit Carson Creek is improperly named San Bernardo Valley, the upper portion of the Santa Margarita River (u/s of Rainbow Creek) is improperly named Temecula Creek and the upper most portion of the impaired segment of the San Diego River is improperly named Forrester Creek.

Cheers,  
-jimmy
